**RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099**

It has been brought to my attention that the proposed telecommunications tower is NOT at Huston Pde North Curl Curl but at Abbott Road Sports Fields. On two occasions the residents of this area and further afield, have opposed this site and two times have been assured it will NOT go ahead. The notice on the poles on the playing fields, which were placed only a few days ago, state the proposed tower will be placed at Huston Pde. This is extremely deceiving and makes me so disappointed that the public are actually being lied to. Everytime, the residents have suggested alternative locations as we do realise that towers are needed in this day and age. Why is it so hard to point out that Abbott Road consists of playing fields, netball courts, the community youth centre, a community hall with community gardens and hire facilities, a new skatepark and a primary school? Therefore, the pedestrian traffic is hugely made up of children. These fields and community centres are used extensively every day of the year.

Please DO NOT place this telecommunication tower on these fields. How many times must we have to oppose this and how many times will we be told that the tower will NOT go ahead? And now the insult of the deception of the false location. There are so many other places in North Curl Curl that would be far better suited for this proposal. E.G. The industrial area around Winbourne Rd through to Orchard Rd (there are many buildings that a communications pole could be placed) or even the dog walking park which has no housing and a huge area to place a pole without intruding or causing any angst due to having large amounts of children in the area every day. The use of existing poles could even solve this issue.

Please consider the residents and especially the younger generation of this community.

Stephen Grant
