**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

We are the guardians of the environment and we are failing miserably to protect native wildlife and our flora from overpopulating the landscape. This development is totally unnecessary and a more efficient use of already urbanised areas should be prioritised, rather than devastating more natural areas and killing off the inhabitants in the process. Removal of native vegetation is aiding climate change and abetting extinctions. Increased revenue for council is of no value if you have no amenity left to give quality of life.
