RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

As an environmental health student in my second science degree I can confirm it is a proven scientific fact that habitat fragmentation is one of the leading causes of terrestrial biodiversity loss. Given Australia has some of the highest extinction rates in the world - we need to do our bit to ensure development impacts on wildlife are minimised. Allowing this development to go ahead does not achieve that.

I therefore object to DA1274/2017 to develop 7 apartment buildings in the middle of the designated high priority wildlife corridor home to many vulnerable species. This is Biodiversity land and should not be destroyed by this development.
