**RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104**

Why were previous council generations enlightened enough to set aside wildlife corridors but present councils are so greedy that they need to undo for all time the good works of the past?

Especially in the time of great climate change, these corridors are more needed than ever. Our wildlife is unique in the world and will always be a great tourist attraction but cannot be sustained in zoos alone. There is a more desperate need for natural space and wildlife refuges than for yet more human habitation.
