RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

What is the point of local and state governments identifying nature reserves, evaluated against established scientifically-validated criteria, if they are up for grabs as soon as a developer has a lot of money to undo the public's will.

I urge the government to see its plans to develop a high priority wildlife Corridor of Bayview.

Increasingly, we the public, are fed up with local councils and state governments who promise at elections then defer to the bidding of developers.

I acknowledge that people need to be housed, that suburbs need to be developed. But what we ask of our legislators is that they come up with imaginative and sustainable solutions to a future that is very different to the past.

Please step up for the environment and community and step away from greed, ego and big developers .
