RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

We are writing to lodge a firm objection to the proposal DA1274/2017.

As recent long-term residents and familiar with the area, we hold fundamental concerns in respect of this project to develop 7 apartment buildings in an area which is located right in the middle of this designated high priority wildlife corridor, which is both home to many vulnerable species and an essential linkage and transit area essentially important for the sustainability of these and other species. This is a critically important element of the total living environment essential for their survival here and in surrounding areas. This is Biodiversity land and as such must be retained as such; not be destroyed by what is proposed as a gross over-development of the site to the detriment of the ecological integrity of the area and its vulnerable and irreplaceable species.
