RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

As a frequent visitor to this area and someone who is very concerned about development taking over every natural habitat that contributes to the biodiversity of our environment, I am concerned that greed and profit is blinding the very people who are supposed to be protecting the natural environment for our future generations. Each species that goes extinct both plant or animal brings the human race closer to extinction. Science has shown that maintaining effective wildlife corridors and natural areas for breeding plays a significant role in maintaining the biodiversity required to assure the future of all living things on earth. The time has come to stop development in those spaces that are shown to be a significant part of the local fauna and flora, not only for the natural inhabitants of these areas, but for all future generations. Unless we take steps to ensure the protection of these areas, we will leave a legacy of destruction that will seriously impact the planet our children and grandchildren will inherit. Stop this development now.
