RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Dear Assessing Officer

I am writing to ask you to not support the proposed further development of Bayview. The natural habitat corridor is the home to Australian native animals, birds and their habitat is vital for their continued survival. There has been enough thoughtless destruction of native habitat in NSW, Sydney has lost some much native habitat and wildlife already. Australia has one of the world's highest extinction rates for native animal and wildlife species due to deforestation and destruction of native habitat. It is negligent to know the risks and not provide a duty of care to support the little native wildlife that is left in the Sydney surroundings and NSW.

There is already cleared land around Sydney for development purposes that does not rely on the destruction of native habitat and elimination of animal, plant and wildlife species.

I ask you to support the wildlife corridor and provide a duty of care to protect the wildlife corridor from destruction and elimination for the survival of the animal, plant and wildlife that depends on this already diminished area for survival.

Yours sincerely
Judy Medway
