**RE: DA2020/1233 - 68 - 90 Evans Street FRESHWATER NSW 2096**

We have been residents of Watermark Freshwater for two years and strongly object to the DA that has been lodged to change our village green into a bowling green. Our main concerns are as follows.

- . There was no consultation with Residents of Watermark before DA was lodged.
- . Our safety and privacy will be impacted by up to 50 members and guests attending games and competitions
- . Our croquet games which we now play three times a week, and are very popular with a large number of residents, will be restricted to one game a week on a Monday morning.
- . As our apartment faces the proposed bowling green, and this will be a licensed area, the noise generated by bowlers and their guests is also a concern plus the two months of construction changing the village green into a bowling green.
- . As residents of an over 55's village we thought we were buying into a safe and secure environment that would be peaceful and quiet. The area proposed for the bowling green is the only green space in the Watermark complex.
