RE: DA2020/0661 - 7356 / 1167221 Huston Parade NORTH CURL CURL NSW 2099

Dear Mr Lane

I wish to provide a submission in support of DA2020/0661 which proposes a new telephone basestation at North Curl Curl for the following reasons:

- It is well sited in terms of seperation from residential and other sensitive uses
- There is a clear need for reception in the locality (can't recieve calls at my residence)
- Its visual impact is reasonable considering the proposed design and surrounding structures
- It is compliant with ARPANSA EME standards and is therefore safe (despite the concerns of the ill-informed)
- It will have a significant public benefit when considering the social and economic benefit that arises from the technology (internet of things, high bandwidth internet for businesses, etc.).

I respectfully request that you provide consent for the subject application to ensure Curl Curl does not get left behind

Sincerely
Evan Matthews
