RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

I would like to object to DA1274/2017 to develop 7 apartment buildings in the middle of the designated high priority wildlife corridor which is home to many vulnerable species.

This is Biodiversity land and should not be destroyed by this development."

In Australia so much of our fauna and flora is disappearing at an alarming rate. It is a death by a thousands cuts. We need to keep wildlife corridors so that our precious wildlife can move from one area to another. Otherwise we will end up with these. little 'islands' where animals will just die out. And climate change makes this even more important. We already see that e.g. coral is moving down the coast because of climate change. Please ensure that animals on land can move from one area to another as well! In the last 40 years 50%!!!! of all animals have disappeared from our planet! When is enough enough? Are we the only species in the world who is entitled to living on our planet? Who is going to stand up for animals? They cannot defend themselves. They need YOU to do it! Please ensure that these wildlife corridors are kept!!!!!! Once they are gone they will be gone forever!

please note that I would like an e-mail reply not a phone call if you decided to contact me.
