**RE: DA2016/0933 - 51 / 1 - 5 Collaroy Street COLLARROY NSW 2097**

Dear Assessing Officer

I would like to submit a comment on regarding the Parking of the swim school application. In the application they state ;

"....Typical class sizes: Maximum 4 children per teacher. Maximum of 2 classes at same time. Maximum of 6 children in parent / infant classes.

- Length of classes: 30 minutes
- On-site parking: 8 reserved tandem parking spaces.."

Most of us have experienced taking children to swim school and watching them learn to swim. With 30min lessons, parents park, stay and watch their child. 8 parents with 8 cars plus 2-3 staff is 11 cars, then the next class arrives 10 mins early, so another 8 cars.

2-3 staff cars parked and then a possible 16 cars arriving over a 30min period.

All serviced by a small underbuilding carpark with 4 tandem spots at the end, and one entrance/exit and concrete columns everywhere.

Everyone knows there is no capacity for off street parking available in Collaroy, so this is application just does not make sense.

I don't think the applicant has thought this through.

Regards
