RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Dear Sir

Destruction of the wildlife corridor is a very serious assault on the wildlife in the adjoining areas at either end of the corridor. These populations lose habitat, the ability to move safely and will suffer losses due to traffic, pet and feral animals and loss of breeding opportunities.

Wildlife corridors are a minor proportion of the land in Sydney but have very high importance for survival of the remaining species that exist in the Sydney region.

Removal of corridors should not be allowed at all and the revised plans to build on the corridor rejected.
