RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Dear Madam/Sir,

I am writing to submit my objection to the development DA1274/2017 for apartment buildings to be constructed in the middle of a designated High Priority wildlife corridor. It is my understanding that this proposed development has significant objections already put forward.

Housing/dwelling projects are obviously necessary but so are wild life sanctuaries. if we are to have designated High Priority wildlife corridors and then destroy them we cannot build new ones elsewhere unlike the ability to find a more appropriate location for Housing developments.

I put forward my request to to you to veto the proposal for this development on the grounds that there has to be a line in the sand we do not cross when it comes to the preservation of the other inhabitants on this earth and the environment that we all share.

I would like to have some faith restored that there is some humanity in the powers that be that the right course can be taken.

P.S Nature is beautiful, greed is ugly.

Yours sincerely
Kevin Chalker
