RE: DA2017/1274 - 52 Cabbage Tree Road BAYVIEW NSW 2104

Communities are made much richer places for their human inhabitants by being developed with respect for the natural environment. We risk our suburbs becoming sterile, soulless places if we cannot find ways to co-exist with wildlife that allow for the free movement of a diversity of species within these areas.

This land is merely a small concession towards the needs of wildlife and must remain undeveloped.
