What we are seeking to achieve today

PWG 1 Re-cap

Re-cap on outcomes from last session

Workshop Re-cap

- To present key issues and opportunities for the study area across an array of core matters, drawn from a review of existing policies and strategies.

Workshop Aim

- To gather community insight and input on the key issues and opportunities around priority core matters, to assist with the development of draft vision and principles for the Manly Place Plan.

These are some of the key insights from the survey you responded to

What makes you proud of Manly and what would you like to preserve?

- Natural environment including beaches and national parks
- Social and cultural aspects (buskers and food vans over summer)
- Heritage buildings and first nations history
- Natural assets like the beaches, bush and public parks
- Proximity to Sydney CBD
- Being part of a close, engaged, and friendly community

What concerns you about Manly and what would you like to see change?

- Late-night tenancies that attract dangerous behaviour
- Ugly and badly maintained building facades along the Corso (rubbish, signage, air conditioning units etc)
- Limited opportunities for live music, especially outdoor
- Housing affordability
- Overdevelopment and impacts on traffic congestion
- Need to attract long term holiday makers – not just day trippers
- Improved and balanced community forum

This is what we heard from you last session

Movement

- Manly has a high bicycle user group
- Cycling is a popular tourist activity, and more dedicated and shared cycle paths are needed to improve cyclist safety
- Uber drop off and pickup points
- Future-proofing for autonomous vehicles
- Greater use of e-bikes and e-scooters
- Opportunities for secure bike lockup environments at key locations
- Event parking outside the CBD
- Impacts of development on traffic congestion

Parks and Open Spaces, Social Infrastructure & Public Domain

- Role, identity and uses of the Corso
- Smaller and intimate performance spaces to activate the night-time economy
- Activation and role of the Library / Town Hall, possibility of a community hub or civic precinct
- Concerts on the beachfront 'summer concert series'
- A calendar of community events
- Activation of Sydney Road

This is what we heard from you last session

Heritage & Buildings Design

- Maintaining the heritage character of Manly is a priority
- Co-ordinated approach for shop top awnings along the Corso
- Signage regulation
- Financial assistance for heritage maintenance and restoration

Economy & Night-time Economy

- More live music venues and intimate performance spaces
- Balance between daytime and nighttime activities for street activation
- Public art incentives and support
- Innovative digital platforms and improved user interface

What is a place plan Vision and what is its purpose?

A shared statement that is developed in collaboration with the local community about the future of Manly as a place.

The vision will inform development of the Manly Place Plan and guide the decision-making process around Manly's future.

A draft Vision for Manly's Place Plan, based on the Local Strategic Planning Statement (LSPS) that was developed for the Northern Beaches

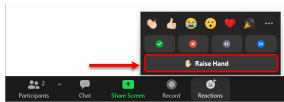

"Sydney's premier seaside destination, embracing a healthy and welcoming day and night economy, iconic natural features and vibrant public spaces."

Do you agree with this draft vision statement?

What are Principles and what are their purpose?

Principles reflect and enliven the community's vision. They help organise and categorise more tangible initiatives.

The guiding principles are underpinned by an integrated, sustainable planning approach that balances, economic, environment, social and cultural impacts and opportunities.
