RE: DA2019/0997 - 50 East Esplanade MANLY NSW 2095

As an owner of a unit in the Corsoleil building, I have grave concerns about this proposed development.

- There are discrepancies and inconsistencies in the architectural drawings. (see Doug McMillan's submission).
- The removal of asbestos is a potential danger to residents of Corsoleil if this is not carried out safely and correctly.
- The noise of the building works is of concern and depends on the crane type and power source.
- The hours of working are a major concern as they are outside Council hours that are normally allowed, and this would be extremely disruptive for residents in our building.
