

NOTICE OF DETERMINATION

Application Number:	DA2014/1062
----------------------------	-------------

APPLICATION DETAILS

Applicant Name and Address:	Dan Maurici c/- City Plan Services Level 1, 364 Kent Street SYDNEY NSW 2000
------------------------------------	--

Land to be developed (Address):	Lot 1113, DP 752038 (Por 1113/752038) Oxford Falls Road FRENCHS FOREST NSW 2086
--	---

Proposed Development:	Demolition works and construction of a residential care facility with associated carparking, internal roads and landscaping
------------------------------	---

**DETERMINATION – APPROVED
DEFERRED COMMENCEMENT CONSENT**

Consent Authority	Sydney East Joint Regional Planning Panel
--------------------------	---

Made on (Date):	12 August 2015
------------------------	----------------

Consent to operate from (Date):	Once Council is satisfied as to those matters specified in the deferred commencement conditions, Council will nominate by way of written notice to the Applicant, the date from which the consent operates
--	--

Consent to lapse on (Date):	5 years from activation of Consent
------------------------------------	------------------------------------

**Details of Conditions**

The conditions, which have been applied to the consent, aim to ensure that the Environmental Impacts of Development are minimised and the Health and Safety of the community is maintained in accordance with the relevant standards and the Building Code of Australia.

NOTE:

If the works are to be certified by a Private Certifying Authority, then it is the certifier's responsibility to ensure all outstanding fees and bonds have been paid to Council prior to the issue of the Construction Certificate or as otherwise specified by Consent conditions.

DEFERRED COMMENCEMENT CONDITIONS

This consent shall not operate until the following deferred commencement conditions have been satisfied.

1. Rural Fire Service Requirements (Integrated Development)

The following conditions of the NSW Rural Fire Service are to be satisfied:

- a. An amended plan shall be provided clearly showing a feasible alternate route/s of exit/s through the northern part of the facility (Building 4 or 5) which can be utilised in an emergency situation should a bush fire threaten from the South;
- b. A suitable 'residents pickup point/s' shall be provided and shown on the plans; and
- c. Proposed Building 6 shall not be used by the Residents and is to be clearly marked on the plans.

Evidence required to satisfy these conditions must be submitted to Council within 5 years of the date of this consent, or the consent will lapse in accordance with Section 95 of the Environmental Planning and Assessment Regulation 2000.

Upon satisfaction of the deferred commencement condition/s, the following conditions apply:

DEVELOPMENT CONSENT OPERATIONAL CONDITIONS

2. Approved Plans and Supporting Documentation

The development must be carried out in compliance (except as amended by any other condition of consent) with the following:

- a) Approved Plans

Architectural Plans - Endorsed with Council's stamp		
Drawing No.	Dated	Prepared By
DA0.00 – DA1.02	20/06/2014	Marchese Partners International Pty Ltd

- b) Any plans and/or documentation submitted to satisfy the Deferred Commencement Conditions of this consent as approved in writing by Council.
- c) Any plans and /or documentation submitted to satisfy the Conditions of this consent.
- d) No construction works (including excavation) shall be undertaken prior to the release of the Construction Certificate.
- e) The development is to be undertaken generally in accordance with the following:

Landscape Plans		
Drawing No.	Dated	Prepared By
01,02, and 03	16/04/2015	Marchese Partners

		Landscape Architects
Waste Management Plan		
Drawing No.	Dated	Prepared By
Warringah Waste Management Plan 2010	-	-

In the event of any inconsistency between conditions of this consent and the drawings/documents referred to above, the conditions of this consent will prevail.

Reason: To ensure the work is carried out in accordance with the determination of Council and approved plans. (DACPLB01)

3. Compliance with Other Department, Authority or Service Requirements

The development must be carried out in compliance with the following:

Other Department, Authority or Service	eServices Reference	Dated
Sydney Water	Response Sydney Water	7 November 2014
Office of Water	Response Office of Water	21 July 2015
NSW Rural Fire Services (See also Deferred Commencement Condition of this consent – Condition No. 1)	Response NSW RFS	12 August 2015

(NOTE: For a copy of the above referenced document/s, please see Council's 'E-Services' system at www.warringah.nsw.gov.au)

Reason: To ensure the work is carried out in accordance with the determination and the statutory requirements of other Department, Authority or Body's. (DACPLB02)

4. Prescribed Conditions

(a) All building works must be carried out in accordance with the requirements of the Building Code of Australia (BCA).

(b) BASIX affected development must comply with the schedule of BASIX commitments specified within the submitted BASIX Certificate (demonstrated compliance upon plans/specifications is required prior to the issue of the Construction Certificate);

(c) A sign must be erected in a prominent position on any site on which building work, subdivision work or demolition work is being carried out:

- (i) showing the name, address and telephone number of the Principal Certifying Authority for the work, and
- (ii) showing the name of the principal contractor (if any) for any building work and a telephone number on which that person may be contacted outside working hours, and
- (iii) stating that unauthorised entry to the work site is prohibited.

Any such sign is to be maintained while the building work, subdivision work or demolition work is being carried out, but must be removed when the work has been completed.

(d) Residential building work within the meaning of the Home Building Act 1989 must not be carried out unless the Principal Certifying Authority for the development to which the work relates (not being the Council) has given the Council written notice of the following information:

(i) in the case of work for which a principal contractor is required to be appointed:

- A. the name and licence number of the principal contractor, and
- B. the name of the insurer by which the work is insured under Part 6 of that Act,

(ii) in the case of work to be done by an owner-builder:

- A. the name of the owner-builder, and
- B. if the owner-builder is required to hold an owner-builder permit under that Act, the number of the owner-builder permit.

If arrangements for doing the residential building work are changed while the work is in progress so that the information notified under becomes out of date, further work must not be carried out unless the Principal Certifying Authority for the development to which the work relates (not being the Council) has given the Council written notice of the updated information.

(e) Development that involves an excavation that extends below the level of the base of the footings of a building on adjoining land, the person having the benefit of the development consent must, at the person's own expense:

- (i) protect and support the adjoining premises from possible damage from the excavation, and
- (ii) where necessary, underpin the adjoining premises to prevent any such damage.
- (iii) must, at least 7 days before excavating below the level of the base of the footings of a building on an adjoining allotment of land, give notice of intention to do so to the owner of the adjoining allotment of land and furnish particulars of the excavation to the owner of the building being erected or demolished.
- (iv) the owner of the adjoining allotment of land is not liable for any part of the cost of work carried out for the purposes of this clause, whether carried out on the allotment of land being excavated or on the adjoining allotment of land.

In this clause, allotment of land includes a public road and any other public place.

Reason: Legislative Requirement (DACPLB09)

5. General Requirements

(a) Unless authorised by Council:

Building construction and delivery of material hours are restricted to:

- o 7.00 am to 5.00 pm inclusive Monday to Friday,
- o 8.00 am to 1.00 pm inclusive on Saturday,
- o No work on Sundays and Public Holidays.

Demolition and excavation works are restricted to:

- o 8.00 am to 5.00 pm Monday to Friday only.

(Excavation work includes the use of any excavation machinery and the use of jackhammers, rock breakers, excavators, loaders and the like, regardless of whether the activities disturb or alter the natural state of the existing ground stratum or are breaking up/removing materials from the site).

(b) At all times after the submission the Notice of Commencement to Council, a copy of the Development Consent and Construction Certificate is to remain onsite at all times until the issue of a final Occupation Certificate. The consent shall be available for perusal of any Authorised Officer.

(c) Where demolition works have been completed and new construction works have not commenced within 4 weeks of the completion of the demolition works that area affected by the demolition works shall be fully stabilised and the site must be maintained in a safe and clean state until such time as new construction works commence.

(d) Onsite toilet facilities (being either connected to the sewer or an accredited sewer

management facility) for workers are to be provided for construction sites at a rate of 1 per 20 persons.

(e) Prior to the release of the Construction Certificate payment of the Long Service Levy is required. This payment can be made at Council or to the Long Services Payments Corporation. Payment is not required where the value of the works is less than \$25,000. The Long Service Levy is calculated on 0.35% of the building and construction work. The levy rate and level in which it applies is subject to legislative change. The applicable fee at the time of payment of the Long Service Levy will apply.

(f) Where works are to be carried out to a Class 1a building, smoke alarms are to be installed throughout all new and existing portions of that Class 1a building in accordance with the Building Code of Australia prior to the occupation of the new works.

(g) The applicant shall bear the cost of all works associated with the development that occurs on Council's property.

(h) No building, demolition, excavation or material of any nature shall be placed on Council's footpaths, roadways, parks or grass verges without Council Approval.

(i) Demolition materials and builders' wastes are to be removed to approved waste/recycling centres.

(j) All sound producing plant, equipment, machinery or fittings and the use will not exceed more than 5dB (A) above the background level when measured from any property boundary and/or habitable room(s) consistent with the Environment Protection Authority's NSW Industrial Noise Policy and/or Protection of the Environment Operations Act 1997.

(k) No trees or native shrubs or understorey vegetation on public property (footpaths, roads, reserves, etc.) or on the land to be developed shall be removed or damaged during construction unless specifically approved in this consent including for the erection of any fences, hoardings or other temporary works.

(l) Prior to the commencement of any development onsite for:

- i) Building/s that are to be erected
- ii) Building/s that are situated in the immediate vicinity of a public place and is dangerous to persons or property on or in the public place
- iii) Building/s that are to be demolished
- iv) For any work/s that is to be carried out
- v) For any work/s that is to be demolished

The person responsible for the development site is to erect or install on or around the development area such temporary structures or appliances (wholly within the

development site) as are necessary to protect persons or property and to prevent unauthorised access to the site in order for the land or premises to be maintained in a safe or healthy condition. Upon completion of the development, such temporary structures or appliances are to be removed within 7 days.

(m) Any Regulated System (e.g. air-handling system, hot water system, a humidifying system, warm-water system, water-cooling system, cooling towers) as defined under the provisions of the Public Health Act 2010 installed onsite is required to be registered with Council prior to operating.

Note: Systems can be registered at www.warringah.nsw.gov.au

(n) Requirements for new swimming pools/spas or existing swimming pools/spas affected by building works.

(1) Child resistant fencing is to be provided to any swimming pool or lockable cover to any spa containing water and is to be consistent with the following;

Relevant legislative requirements and relevant Australian Standards (including but not limited) to:

(i) Swimming Pools Act 1992

(ii) Swimming Pools Amendment Act 2009

(iii) Swimming Pools Regulation 2008

(iv) Australian Standard AS1926 Swimming Pool Safety

(v) Australian Standard AS1926.1 Part 1: Safety barriers for swimming pools

(vi) Australian Standard AS1926.2 Part 2: Location of safety barriers for swimming pools.

(2) A 'KEEP WATCH' pool safety and aquatic based emergency sign, issued by Royal Life Saving is to be displayed in a prominent position within the pool/spa area.

(3) Filter backwash waters shall be conveyed to the Sydney Water sewerage system in sewered areas or managed on-site in unsewered areas in a manner that does not cause pollution, erosion or run off, is separate from the irrigation area for any wastewater system and is separate from any onsite stormwater management system.

(4) Swimming pools and spas must be registered with the Division of Local Government.

(n) New solid fuel burning heaters or existing solid fuel heaters affected by building works must comply with the following:

- (1) AS 2918:2001 Domestic Solid Fuel Burning Appliances – Installation.
- (2) AS 4013:2014 Domestic Solid Fuel Burning Appliances – Method of Determination of Flue Gas Emissions.

Reason: To ensure that works do not interfere with reasonable amenity expectations of residents and the community. (DACPLB10)

6. Occupation of Seniors Housing or Housing for Persons with a Disability

A positive covenant pursuant to s88E of the Conveyancing Act 1919 is to be registered on the title of the land to which this development consent applies.

The covenant shall stipulate that Council is the sole authority to release or modify the covenant and that the development is only permitted to be occupied by persons detailed as follows:

- (a) seniors or people who have a disability;
- (b) people who live within the same household with seniors or people who have a disability;
- (c) staff employed to assist in the administration of and provision of services to housing provided under this Policy.

(Note: Under State Environmental Planning Policy (Housing for Seniors or People with a Disability) 2004):

Seniors are people aged 55 or more years, people who are resident at a facility at which residential care (within the meaning of the Aged Care Act 1997 <http://www.comlaw.gov.au/> of the Commonwealth) is provided and / or people who have been assessed as being eligible to occupy housing for aged persons provided by a social housing provider.

AND

People with a disability are people of any age who have, either permanently or for an extended period, one or more impairments, limitations or activity restrictions that substantially affect their capacity to participate in everyday life.)

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue any Interim / Final Occupation Certificate.

Reason: Statutory requirements. (DACPLB11)

7. A Waterway Impact Statement to be Submitted That is Specific to the Creek Bank Stabilisation Works

Waterway Impact Statement for Creek Bank Stabilisation Works to be submitted prior to the Operational Certificate.

A Waterway Impact Statement that is specific to creek bank stabilisation works as per Guidelines for Preparing a Waterway Impact Statement that includes:

- o Waterway Analysis
- o Assessment of Impacts
- o Assessment of Compliance with the Warringah Development Control Plan
- o Provision of Mitigation Measures

See the following link for the Guidelines for Preparing a Waterway Impact Statement <http://www.warringah.nsw.gov.au/sites/default/files/documents/general-information/waterways/2014-022181-guidelines-preparing-waterways-impact-statement-updated-final.pdf>

Reason: Environmental Protection, Monitoring and Enhancement (DACNEBOC1)

Further Information Required for Creek Bank Stabilisation Works

Further Information Required for Creek Bank Stabilisation Works prior to the Operational Certificate.

All in-stream works/activities must be designed and certified by suitably qualified persons.

The following additional information is required:

- Detailed design drawings of proposed works (engineering certification may also be required).
- Detailed design drawings which include a surveyed plan, cross sections (across the watercourse) and a long section of the watercourse, showing the proposed works relative to existing and proposed bed and bank profiles and water levels. The cross section should extend to the landward limit of the identified riparian corridor. All plans must include a scale bar.
- Detailed report of pre and post construction hydraulic conditions. The report should address bank full discharge, velocity, tractive force or shear stress, afflux (Modified RTA method is acceptable), Froude and Manning's 'n' roughness values, relative to the proposed structure.

- Detailed plans of permanent bed and bank stabilisation works for scour protection.
- Photographs of the site. To assist with future monitoring and reporting, all photo points should be identified by GPS coordinates or by survey.

Reason: Environmental Protection, Monitoring and Enhancement (DACNEBOC2)

FEES / CHARGES / CONTRIBUTIONS

8. Policy Controls

Warringah Section 94A Development Contribution Plan

The proposal is subject to the application of Council's Section 94A Development Contributions Plan.

The following monetary contributions are applicable:

<i>Warringah Section 94A Development Contributions Plan</i>		
Contribution based on total development cost of		\$ 23,760,759.00
Contribution - all parts Warringah	Levy Rate	Contribution Payable
Total S94A Levy	0.95%	225,727
S94A Planning and Administration	0.05%	11,880
Total	1.0%	\$237,608

The amount will be adjusted at the time of payment according to the quarterly CPI (Sydney - All Groups Index). Please ensure that you provide details of this Consent when paying contributions so that they can be easily recalculated.

Reason: To provide for contributions in accordance with the Warringah Section 94A Development Contributions Plan 2012.

9. Bonds

(a) Security Bond

A bond (determined from cost of works) of \$10,000.00 and an inspection fee in accordance with Council's Fees and Charges paid as security to ensure the rectification of any damage that may occur to the Council infrastructure contained within the road reserve adjoining the site as a result of construction or the transportation of materials and equipment to and from the development site.

(b) Construction, Excavation and Associated Works Bond (Pollution)

A Bond of \$5000.00 as security to ensure that there is no transmission of material, soil

etc. off the site and onto the public road and/or drainage systems.

(c) Construction, Excavation and Associated Works Bond (Drainage)

A Bond of \$5000.00 as security against any damage or failure to complete the construction of stormwater drainage works as part of this consent.

(d) Construction, Excavation and Associated Works Bond (Failure to Remove Waste)

a bond of \$5000.00 as security against damage to Council's road(s) fronting the site caused by the transport and disposal of materials and equipment to and from the site.

An inspection fee in accordance with Council adopted fees and charges (at the time of payment) is payable for each kerb inspection as determined by Council (minimum (1) one inspection)

All bonds and fees shall be deposited with Council prior to Construction Certificate or demolition work commencing, details demonstrating payment are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

To process the inspection fee and bond payment a Bond Lodgement Form must be completed with the payments (a copy of the form is attached to this consent and alternatively a copy is located on Council's website at www.warringah.nsw.gov.au/your-council/forms).

Reason: To ensure adequate protection of Councils infrastructure. (DACENZ01)

CONDITIONS TO BE SATISFIED PRIOR TO THE ISSUE OF THE CONSTRUCTION CERTIFICATE

10. Stormwater Disposal

Engineering Plans certified by an appropriately qualified and practicing Civil Engineer, indicating all details relevant to the collection and disposal of stormwater from the site, buildings, and paved areas and where appropriate adjacent catchments. Stormwater shall be conveyed from the site to the water course generally in accordance with plans prepared by JMD Development Consultants reference 12253(B)E1 dated 11-07-2014

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

Reason: To ensure appropriate provision for disposal and stormwater management arising from the development. (DACENC06)

11. Fire Sprinkler System

Fire Sprinkler system must be installed for the development in accordance with the requirement of Clause 55 of SEPP (Housing for seniors or People with a Disability) 2004.

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

Reason: compliance with SEPP (HSPD) 2004

12. Submission of Engineering Plans

Engineering plans are to be submitted to Council for approval under the provisions of Sections 68 Local Government Act 1993. The submission is to include four (4) copies of Civil Engineering plans for the design and construction of pit and 3.0 metres wide lintel at the vehicular entrance which are to be generally in accordance with the civil design approved with the Development Application and Council's specification for engineering works - AUS-SPEC #1 and or Council's Minor Works Policy.

The Fee Associated with the assessment and approval of the plans is to be in accordance with Council's Fees and Charges.

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

Reason: To ensure compliance with Council's specification for engineering works. (DACENC08)

13. Sydney Water (Fire Hydrant System)

Subdivisions involving the creation of private roads are to be serviced with fire hydrant systems to ensure that coverage of no less than 90 metres is maintained to all areas of the development.

(Note: The fire hydrants are to be installed in accordance with all relevant Australian Standards and the requirements of the Sydney Water Authority and the NSW Fire Brigades.)

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

Reason: NSW Fire Brigades Requirement. (DACENC11)

14. Vehicle Crossings Application Formwork Inspection

An application for street levels shall be made with Council subject to the payment of fee applicable at the time of payment. The fee includes all Council inspections relating to the driveway construction and must be paid.

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

Reason: To facilitate suitable vehicular access to private property. (DACENC12)

15. Positive Covenant - Asset Protection Zone

The establishment of an Asset Protection Zone (APZ) within the Barnes Road reserve, subject to s.138 of the Roads Act, 1993 consent as necessary, is to be subject to a Positive Covenant placed on the title of Lot 1113 in DP 752038 Barnes Road that outlines the property owner's responsibilities under the "Planning for Bushfire Protection 2006".

The applicant is required to meet Council's requirements in establishing an appropriate Positive Covenant, including but not limited to:

- i) A detailed survey plan is to be provided to Council indicating the extent of the position of the APZ by reference to the road reserve and a plan in registrable form showing the APZ.
- ii) The applicant/owner is to pay any associated fees and charges for the establishment of Positive Covenant including all legal fees and costs of registration.
- iii) The Positive Covenant is to outline the responsibilities of the property owner benefiting from the APZ including initial start-up works and ongoing maintenance in accordance with the requirements of Council and any other relevant authority.
- iv) Provide that the owner take out and maintain all necessary insurances and indemnify Council against any claims or damages arising from the works upon the road reserve in establishing the APZ and failure to maintain the APZ area.
- v) Provide that written notice by the Council can require the registered proprietor to promptly attend to any matters and to carry out works within such time as the Council may require to ensure that the APZ is maintained to the requirements of Council or any other relevant authority.
- vi) Provide for the applicant/owner to obtain consent under s.138 of the Roads Act, 1993 as necessary.
- vii) Ensure current and future owners are bound by the covenant.
- viii) If the development, the subject of this consent, does not proceed then the covenant is to be extinguished. In any event, the party with the right to vary, modify or extinguish the covenant is Warringah Council.

Details are to be submitted to Council for approval and registered on the title prior to the issue of the Construction Certificate.

Reason: Fire Safety and appropriate property management. (DACHPCPCC1)

16. Approval of an on-site sewage management system

Where there is a requirement from Sydney Water for a waste water pre-treatment device to be provided prior to connection to the Sydney Water Sewerage System, prior to the release of the Construction Certificate, the applicant must receive an 'Approval to

Install an On Site Sewage Management System' from Council.

Reason: To fulfil the requirements under Section 68 of the Local Government Act 1993.
(DACHPCPCC3)

17. Confirmation of Waste Water disposal to Sydney Water Sewage System

A Section 73 Approval under the Sydney Water Act 1994 must be obtained from Sydney Water and provided to Council prior to the issue of a construction certificate.

Reason: To ensure that the development is permitted to dispose of waste water to the Sydney Water Sewage System (DACHPCPCC4)

18. Contaminated Land Requirements

Prior to the issue of any Construction Certificate a Contamination Management Plan is to be prepared by an appropriately qualified Environmental Consultant and provided to the satisfaction of the Certifying Authority. The plan shall detail:

- (a) How all the requirements and / or recommendations contained within the Contamination Reports entitled Preliminary comments and assessment on contamination and geotechnical issues prepared by Geo Enviro Consultancy Pty Ltd dated January 2004 are to be implemented;
- (b) A Remedial Action Plan (RAP) prepared by a suitably qualified Environmental Consultant in accordance with State Environmental Planning Policy No. 55 - Remediation of Land, and with any contaminated land planning guidelines under the Contaminated Land Management Act 1997;
- (c) Stipulate reporting and processes associated with discovery of any new contamination that is revealed during excavation, demolition or development works. This process shall include the ability to contact NSW Fire and Rescue for pollution incidents, have on call (24 hours a day), a suitably qualified Environmental Consultant to undertake immediate investigations and provide recommendations for containment and rectification of contaminants or toxins and a process for notification to Warringah Council and the Principal Certifying Authority.
- (d) A requirement to complete ongoing water and soils testing during excavation, demolition and development works as follows:
 - (a) During construction in order to monitor water and soil quality the following is to be implemented:
 - i) Water testing is to be completed in accordance with Section 3 of the NSW RTA's Guideline for Construction Water Quality Monitoring
 - ii) Soil Testing in order to detect contaminates is occur weekly with two (2) samples in accordance with the NSW EPA Contaminated Site Sampling Design Guidelines.

(b) The requirements of (i) and (ii) above are to be implemented from the commencement of works as follows:

- i) Fortnightly during excavation works
 - ii) Monthly during building works
- (e) To ensure water quality is maintained runoff must be drained to an adequately banded central collection sump and treated, to meet NSW Department of Environment and Climate Change (formerly Environment Protection Authority) discharge criteria.

Note: Other options for the disposal of excavation pump-out water include disposal to sewer with prior approval from Sydney Water, or off-site disposal by a liquid waste transported for treatment/disposal to an appropriate waste treatment/processing facility.

- f) All stockpiles of potentially contaminated soil must be stored in a secure area on the site (no greater than 48 hours) so as not to cause pollution or public health risk until disposed of at a waste facility.

All contaminated soil removed from the site must be disposed of at a waste facility that can lawfully receive that waste and must be done in accordance with all relevant Acts, Regulations and Guidelines. Copies of all test results and disposal dockets must be retained for at least 3 years and be made available to authorised Council officers on request.

Note: The following Acts and Guidelines applied at the time of determination:

- i) Protection of the Environment Operations Act 1997; and
- ii) Environment Protection Authority's Environmental Guidelines: Assessment, Classification and Management of Liquid and Non-Liquid Wastes (1999).
- g) Hazardous or intractable wastes arising from the demolition process shall be removed and disposed of in accordance with the requirements of WorkCover NSW and the Environment Protection Authority and the provisions of all relevant Acts, Regulations and Guidelines.

Note: The following standards applied at the time of determination:

- i) Environment Protection Authority's Environmental Guidelines: Assessment, Classification and Management of Liquid and Non-Liquid Wastes (1999).
- h) Stipulate protocols for the importation of any landfill material onto the site the protocols shall include:
 - o 'Chain of Custody' documentation shall be kept and submitted for the transport of the validated fill material from a site, to the subject premises.

- o Requirement that any landfill material being brought to the site shall be free of contaminants or toxins and shall be suitable for the use on the land.
- o Any landfill material being brought to the site shall have a validation report prepared to the satisfaction of the Principal Certifying Authority (prepared in accordance with the Department of Environment & Climate Change's guidelines).

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

Reason: Protection of the environment, SEPP 55 compliance. (DACHPCPCC6)

19. Trees and / or Landscaping

In order to protect and enhance onsite vegetation and trees the following applies to the development site:

(a) Existing trees which must be retained

All trees not indicated for removal on Landscape Plans - Endorsed with Council's stamp		
Drawing Numbers	Dated	Prepared By
01 Rev. P6, 02 Rev. P6 and 03 Rev. P6	16/04/15	JCA

(b) Tree protection

- i) No tree roots greater than 50mm diameter belonging to trees to be retained are to be cut unless authorised by a qualified Arborist on site.
- ii) All structures are to bridge or tunnel bore under tree roots greater than 50mm diameter unless directed otherwise by a qualified Arborist on site.
- iii) All tree protection to be in accordance with AS4970-2009 Protection of trees on development sites, with particular reference to Section 4 Tree Protection Measures. .
- iv) All tree protection measures, including fencing, are to be in place prior to commencement of works
- v) Tree pruning within the subject site is approved to enable construction in accordance with the approved plans.
- vi) Tree pruning is not to exceed 15% of any existing tree canopy
- vii) All tree pruning to be in accordance with AS4373-2007 Pruning of amenity trees.

Reason: To ensure compliance with the requirement to retain and protect significant planting on the site. (DACLAC01)

20. Soil and Water Management Plan

A Soil and Water Management Plan (SWMP) shall be prepared by an appropriately qualified person and implemented onsite prior to commencement. The SWMP must meet the requirements outlined in the Landcom publication Managing Urban Stormwater: Soils and Construction - Volume 1, 4th Edition (2004). The SWMP must include the following as a minimum:-

- o Site boundaries and contours;
- o Vehicle access points, proposed roads and other impervious areas (e.g. parking areas and site facilities)
- o Location of all drains, pits, downpipes and waterways on and nearby the site;
- o Planned stages of excavation, site disturbance and building;
- o Stormwater management and discharge points;
- o Integration with onsite detention/infiltration;
- o Sediment control basin locations and volume (if proposed);
- o Proposed erosion and sediment controls and their locations;
- o Location of wash-down and stockpile areas including covering materials and methods;
- o Vegetation management including removal and revegetation;
- o A schedule and programme of the sequence of the sediment and erosion control works or devices to be installed and maintained.
- o Inspection and maintenance program;
- o North point and scale.

All Site drainage and sediment and erosion control works and measures as described in the SWMP, and any other pollution controls, as required by these conditions, shall be implemented prior to commencement of any other works at the Site.

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

Reason: To promote the long-term sustainability of ecosystem functions (DACNEC11)

21. Utilities and Services

Utility and service lines are not to be located within riparian zones, unless they:

- a) Do not require access tracks for maintenance or other purposes; and
- b) Do not restrict existing vegetation or rehabilitation.

Details demonstrating compliance are to be submitted to the Certifying Authority prior

to the issue of the Construction Certificate.

Reason: Environmental Protection, Monitoring and Enhancement (DACNEC16)

22. Erosion and Sediment Control Plan

An Erosion and Sediment Control Plan (ESCP) shall be prepared by an appropriately qualified person and implemented onsite prior to commencement. The ESCP must meet the requirements outlined in the Landcom publication Managing Urban Stormwater: Soils and Construction - Volume 1, 4th Edition (2004). The ESCP must include the following as a minimum:-

- o Site Boundaries and contours;
- o Approximate location of trees and other vegetation, showing items for removal or retention (consistent with any other plans attached to the application)
- o Location of site access, proposed roads and other impervious areas (e.g. parking areas and site facilities);
- o Existing and proposed drainage patterns with stormwater discharge points
- o Locations and methods of all erosion and sediment controls;
- o North point and scale.

Details demonstrating compliance are to be submitted to the Certifying Authority for approval prior to the issue of the Construction Certificate.

Reason: To mitigate environmental impact resulting from site disturbance (DACNEC22)

23. Compliance with Standards

The development is required to be carried out in accordance with all relevant Australian Standards.

Advice to Applicants: At the time of determination in the opinion of Council, the following (but not limited to) Australian Standards are considered to be appropriate:

- (a) AS2601.2001 - Demolition of Structures**
- (b) AS4361.2 - Guide to lead paint management - Residential and commercial buildings**
- (c) AS4282:1997 Control of the Obtrusive Effects of Outdoor Lighting**
- (d) AS 4373 - 2007 'Pruning of amenity trees' (Note: if approval is granted) **
- (e) AS 4970 - 2009 'Protection of trees on development sites'**
- (f) AS/NZS 2890.1:2004 Parking facilities - Off-street car parking**
- (g) AS 2890.2 - 2002 Parking facilities - Off-street commercial vehicle facilities**
- (h) AS 2890.3 - 1993 Parking facilities - Bicycle parking facilities**
- (i) AS 2890.5 - 1993 Parking facilities - On-street parking**
- (j) AS/NZS 2890.6 - 2009 Parking facilities - Off-street parking for people with disabilities**
- (k) AS 1742 Set - 2010 Manual of uniform traffic control devices Set**
- (l) AS 1428.1 - 2009* Design for access and mobility - General requirements for access - New building work**

(m) AS 1428.2 - 1992*, Design for access and mobility - Enhanced and additional requirements - Buildings and facilities**

(n) AS 4674 Design, construction and fit out of food premises

(o) AS1668 The use of mechanical ventilation

*Note: The Australian Human Rights Commission provides useful information and a guide relating to building accessibility entitled "the good the bad and the ugly: Design and construction for access". This information is available on the Australian Human Rights Commission website

http://www.humanrights.gov.au/disability_rights/buildings/good.htm

**Note: the listed Australian Standards is not exhaustive and it is the responsibility of the applicant and the Certifying Authority to ensure compliance with this condition and that the relevant Australian Standards are adhered to.

Details demonstrating compliance with the relevant Australian Standard are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.
Reason: To ensure the development is constructed in accordance with appropriate standards. (DACPLC02)

24. External Finishes to Roof

The external finish to the roof shall have a medium to dark range in order to minimise solar reflections to neighbouring properties. Light colours such as off white, cream, silver or light grey colours are not permitted.

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

Reason: To ensure that excessive glare or reflectivity nuisance does not occur as a result of the development. (DACPLC03)

25. External Colours and Materials (Industrial, Commercial, Mixed & Apartment Buildings)

(a) External Glazing - The reflectivity index of external glazing for windows, walls or roof finishes of the proposed development is to be no greater than 20% (expressed as a per centum of the reflected light falling upon any surface).

(b) External Roofing - The external finish to the roof shall have a medium to dark range in order to minimise solar reflections to neighbouring properties. Light colours such as off white, cream, silver or light grey colours are not permitted.

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

Reason: To ensure that excessive glare or reflectivity nuisance from glazing does not occur as a result of the development. (DACPLC04)

26. Geo-Technical Report

A Geo-Technical Report and certificate shall be prepared by an appropriately qualified Geo-technical Engineer certifying that the existing rock formations and substrate on the site are capable of withstanding:

the proposed loads to be imposed;

- a) the extent of the proposed excavation, including any recommendations for shoring works that may be required to ensure the stability of the excavation;
- b) protection of adjoining properties;
- c) the provision of appropriate subsoil drainage during and upon completion of construction works.

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

Reason: To ensure the structural integrity of the subject site and adjoining sites during the excavation process. (DACPLC14)

27. Surrender of Consent

The applicant shall surrender to Council Development Consent No DA2013/0575 in accordance with the requirements of the Environmental Planning and Assessment Act 1979.

Details demonstrating compliance are to be submitted to the Certifying Authority prior to the issue of the Construction Certificate.

Reason: To prevent inconsistencies between consent applying the site (ref s80A (5) EPAA & cl97 EPA Reg). (DACPLC10)

CONDITIONS THAT MUST BE ADDRESSED PRIOR TO ANY COMMENCEMENT

28. Public Liability Insurance - Works on Public Land

Any person or contractor undertaking works on public land must take out Public Risk Insurance with a minimum cover of \$10 million in relation to the occupation of, and approved works within Council's road reserve or public land, as approved in this consent. The Policy is to note, and provide protection for Warringah Council, as an interested party and a copy of the Policy must be submitted to Council prior to commencement of the works. The Policy must be valid for the entire period that the works are being undertaken on public land.

Reason: To ensure the community is protected from the cost of any claim for damages arising from works on public land. (DACEND01)

29. Tree Protection

- i) All tree protection measures as required by the conditions of this consent are to be installed prior to commencement of approved works on the site.

ii) Details demonstrating compliance are to be submitted to the Principal Certifying Authority prior to commencement of construction.

Reason: Protection of retained trees (DACLADPC1)

30. Installation and Maintenance of Sediment and Erosion Control

Sediment and erosion controls must be installed in accordance with Landcom's 'Managing Urban Stormwater: Soils and Construction' (2004).

Techniques used for erosion and sediment control on site are to be adequately maintained and monitored at all times, particularly after periods of rain, and shall remain in proper operation until all development activities have been completed and the site is sufficiently stabilised with vegetation.

Reason: To protect the surrounding environment from the effects of sedimentation and erosion from the site (DACNED06)

CONDITIONS TO BE COMPLIED WITH DURING DEMOLITION AND BUILDING WORK

31. Vehicle Crossings

The provision of normal vehicle crossing 6.0 metres wide in accordance with Warringah Council Drawing No A4-3330/1 and specifications. An Authorised Vehicle Crossing Contractor shall construct the vehicle crossing and associated works within the road reserve in plain concrete. Prior to the pouring of concrete, the vehicle crossing is to be inspected by Council and a satisfactory "Vehicle Crossing Inspection" card issued.

Details demonstrating compliance are to be submitted to the Principal Certifying Authority.

Reason: To facilitate suitable vehicular access to private property. (DACENE05)

32. Layback Construction

A layback 6.0 metres wide (excluding the wings) is to be constructed in accordance with Warringah Council Drawing No A4-2276 and specifications. The lay back shall be constructed 1.0 metres away from Council's pit located at the low point.

Reason: To ensure suitable vehicular access to private property. (DACENE08)

33. Maintenance of Road Reserve

The public footways and roadways adjacent to the site shall be maintained in a safe condition at all times during the course of the work.

Reason: Public Safety. (DACENE09)

34. Requirement to Notify about New Contamination Evidence

Any new information revealed during demolition works that has the potential to alter

previous conclusions about site contamination or hazardous materials shall be immediately notified to the Council and the Principal Certifying Authority.

Reason: To protect human health and the environment. (DACHPE01)

35. Trees Condition

During the construction period the applicant is responsible for ensuring all protected trees are maintained in a healthy and vigorous condition. This is to be done by ensuring that all identified tree protection measures are adhered to. In this regard all protected plants on this site shall not exhibit:

- (a) A general decline in health and vigour.
- (b) Damaged, crushed or dying roots due to poor pruning techniques.
- (c) More than 10% loss or dieback of roots, branches and foliage.
- (d) Mechanical damage or bruising of bark and timber of roots, trunk and branches.
- (e) Yellowing of foliage or a thinning of the canopy untypical of its species.
- (f) An increase in the amount of deadwood not associated with normal growth.
- (g) An increase in kino or gum exudation.
- (h) Inappropriate increases in epicormic growth that may indicate that the plants are in a stressed condition.
- (i) Branch drop, torn branches and stripped bark not associated with natural climatic conditions.

Any mitigating measures and recommendations required by the Arborist are to be implemented.

The owner of the adjoining allotment of land is not liable for the cost of work carried out for the purpose of this clause.

Reason: Protection of Trees. (DACLAE03)

36. Protection of rock

All rock outcrops outside of the area of approved works are to be preserved and protected at all times during demolition and construction works.

Reason: Preservation of significant environmental features (DACLAEDW1)

37. Works Environmental Protection Plan

A Works Environment Protection Plan (WEPP) is to be prepared and must be kept in the site office. All staff must be inducted by the Project Ecologist with an induction record being maintained and available onsite at all times.

Personnel conducting the site induction will be able to:-

- (a) Be familiar with the names and contact details of relevant people and authorities in the event of any environmental or site management emergency that may arise.

- (b) Be familiar with the presence of environmentally significant areas within and surrounding the site.
- (c) Be familiar with the location of trees with hollows and the importance of tree hollows to a variety of wildlife species and the protection and significance of tree hollows.
- (d) Be familiar and aware of the presence of weed locations, spoil mounds and the potential of weed infections and weed seed propagules accidentally being introduced to the site.
- (e) Identify threatened species of fauna that may venture into the subject site.
- (f) Identify threatened species of fauna that may be cryptic such as the Red-crowned Toadlet, Heath Monitor, etc.
- (g) Be familiar with animal welfare issues and procedures should human-wildlife interactions take place during the construction phase.
- (h) Have an understanding of flora and fauna management issues.

A certificate demonstrating compliance must be prepared by the Project Ecologist and submitted to the Certifying Authority prior to the issue of the Occupation Certificate.

Reason: Protection of Bushland (DACNEE03)

38. Installation and Maintenance of Sediment Control

Measures used for erosion and sediment control on building sites are to be adequately maintained at all times and must be installed in accordance with Warringah Council Specifications for Erosion and Sediment Control. All measures shall remain in proper operation until all development activities have been completed and the site fully stabilised.

Details demonstrating compliance are to be submitted to the Principal Certifying Authority.

Reason: To protect the environment from the effects of sedimentation and erosion from development sites. (DACPLE02)

**CONDITIONS WHICH MUST BE COMPLIED WITH PRIOR TO THE ISSUE OF THE
OCCUPATION CERTIFICATE**

39. Stormwater Disposal

The stormwater drainage works shall be certified as compliant with all relevant Australian Standards and Codes by a suitably qualified person.

Details demonstrating compliance are to be submitted to the Principal Certifying Authority prior to the issue of any interim / final Occupation Certificate.

Note: The following Standards and Codes applied at the time of determination:

- (a) Australian/New Zealand Standard **AS/NZS 3500.3** - 2003 - Plumbing and drainage - Stormwater drainage
- (b) Australian/New Zealand Standard **AS/NZS 3500.3** - 2003/Amdt 1 - 2006 - Plumbing and drainage - Stormwater drainage
- (c) National Plumbing and Drainage Code.

Reason: To ensure appropriate provision for the disposal of stormwater arising from the development. (DACENF05)

40. Waste Water System

Where a waste water treatment device is required prior to disposal of sewage to Sydney Water Sewage System, a s68 (Local Government Act 1993) approval to operate the Waste Water System must be obtained from Council, and the waste water system must be activated and effectively operating to the satisfaction of the Principal Certifying Authority, prior to the issuing of any interim / final occupation certificate.

Details demonstrating compliance are to be submitted to the Principal Certifying Authority.

Reason: To fulfill the requirements under Section 68 of the Local Government Act 1993. (DACHPFPOC6)

41. Required Planting

The tree/s listed in the following schedule shall be planted in accordance with the following schedule:

No. of Trees Required.	Species	Location	Pot Size
All trees	As indicated on Landscape Plans drawing numbers 01 Rev. P6, 02 Rev. P6 and 03 Rev. P6 dated 16/04/15 prepared by JCA	As indicated on the Landscape Plans	As indicated on the Landscape Plans

Details demonstrating compliance are to be submitted to the Principal Certifying Authority prior to the issue of any interim / final Occupation Certificate.

Reason: To maintain environmental amenity. (DACLAF01)

42. Post-Construction Dilapidation Survey

A post-construction Dilapidation Survey of Council's Stormwater Assets is to be

prepared by a suitably qualified person in accordance with Council's Guidelines for Preparing a Dilapidation Survey of Council Stormwater Asset in order to determine if the asset has been damaged by the works. Council's Guidelines are available at

<http://www.warringah.nsw.gov.au/sites/default/files/documents/general-information/engineering-specifications/2009084729guidelineforpreparingadilapidationsurveyofcouncilstormwaterassets2.pdf>

The post construction dilapidation report must be submitted to the Council for review and the Certifying Authority prior to the issue of the Occupation Certificate. Any damaged to Council's stormwater infrastructure is to be rectified in accordance with Council's technical specifications prior to the release of the security bond.

Reason: Protection of Council's Infrastructure (DACNEF11)

43. Removal of All Temporary Structures/Material and Construction Rubbish

Once construction has been completed all silt and sediment fences, silt, rubbish, building debris, straw bales and temporary fences are to be removed from the site.

Details demonstrating compliance are to be submitted to the Principal Certifying Authority prior to the issue of any interim / final Occupation Certificate.

Reason: To ensure bushland management. (DACPLF01)

44. Sydney Water

A Section 73 Compliance Certificate under the Sydney Water Act 1994 must be obtained from Sydney Water Corporation.

Application must be made through an authorised Water Servicing Co-ordinator. Please refer to the Building Developing and Plumbing section of the web site www.sydneywater.com.au <<http://www.sydneywater.com.au>> then refer to "Water Servicing Coordinator" under "Developing Your Land" or telephone 13 20 92 for assistance.

Following application a "Notice of Requirements" will advise of water and sewer infrastructure to be built and charges to be paid. Please make early contact with the Co-ordinator, since building of water/sewer infrastructure can be time consuming and may impact on other services and building, driveway or landscape design.

Details demonstrating compliance are to be submitted to the Principal Certifying Authority prior to the issue of any interim / final Occupation Certificate.

Reason: To ensure compliance with the statutory requirements of Sydney Water. (DACPLF08)

ON-GOING CONDITIONS THAT MUST BE COMPLIED WITH AT ALL TIMES

45. Rehabilitation and maintenance

The consent holder must carry out a maintenance period of 2 years after completion of works within the 'river' or 'waterfront land' as defined by the Water Management Act 2000, including rehabilitation and vegetation management works in accordance with the Biodiversity Management Plan required under this development consent.

Reason: Environmental Protection, Monitoring and Enhancement. (DACNEG02)

46. Exotic Plant Species/Weeds

All exotic plant species, noxious and environmental weeds are to be managed continuously and are not to be imported to the site. Further information is available on Warringah Council's website.

Only certified weed free and contaminant free mulch is to be used on the site, as they may contain weed seeds and viable vegetative matter and other contaminants, which may impact adversely on the vegetation, soil, water quality or ecology of the site.

Reason: To ensure bushland and riparian management (DACNEG05)

47. Visitors Sign

A sign, legible from the street, shall be permanently displayed to indicate that visitor parking is available on the site and the visitor car parking spaces shall be clearly marked as such.

Details demonstrating compliance are to be submitted to the Principal Certifying Authority prior to the issue of any interim / final Occupation Certificate.

Reason: To ensure that visitors are aware that parking is available on site and to identify those spaces to visitors. (DACPLG04)

48. Loading Within Site

All loading and unloading operations shall be carried out wholly within the confines of the site and within the approved loading areas, at all times.

Reason: To ensure that deliveries can occur safely within the site and does not adversely affect traffic or pedestrian safety and amenity. (DACPLG20)

49. Delivery Hours

No deliveries, loading or unloading associated with the premises are to take place between the hours of 10pm and 6am on any day.

Reason: To protect ensure the acoustic amenity of surrounding properties. (DACPLG21)

Review of Determination

You may request Council review the determination of the application under Section 82A of the Environmental Planning & Assessment Act 1979 if it is NOT integrated or designated development. Any request to review the application must be made and determined within 6 months from the date of determination.

NOTE: A fee will apply for any request to review the determination.

Right of Appeal

If you are dissatisfied with this decision Section 97 of the Environmental Planning & Assessment Act 1979 may give you the right to appeal to the Land and Environment Court within 6 months after the date on which you receive this notice.

Signed on behalf of the consent authority

Signature:

Name David Kerr, Group Manager Development & Compliance Services

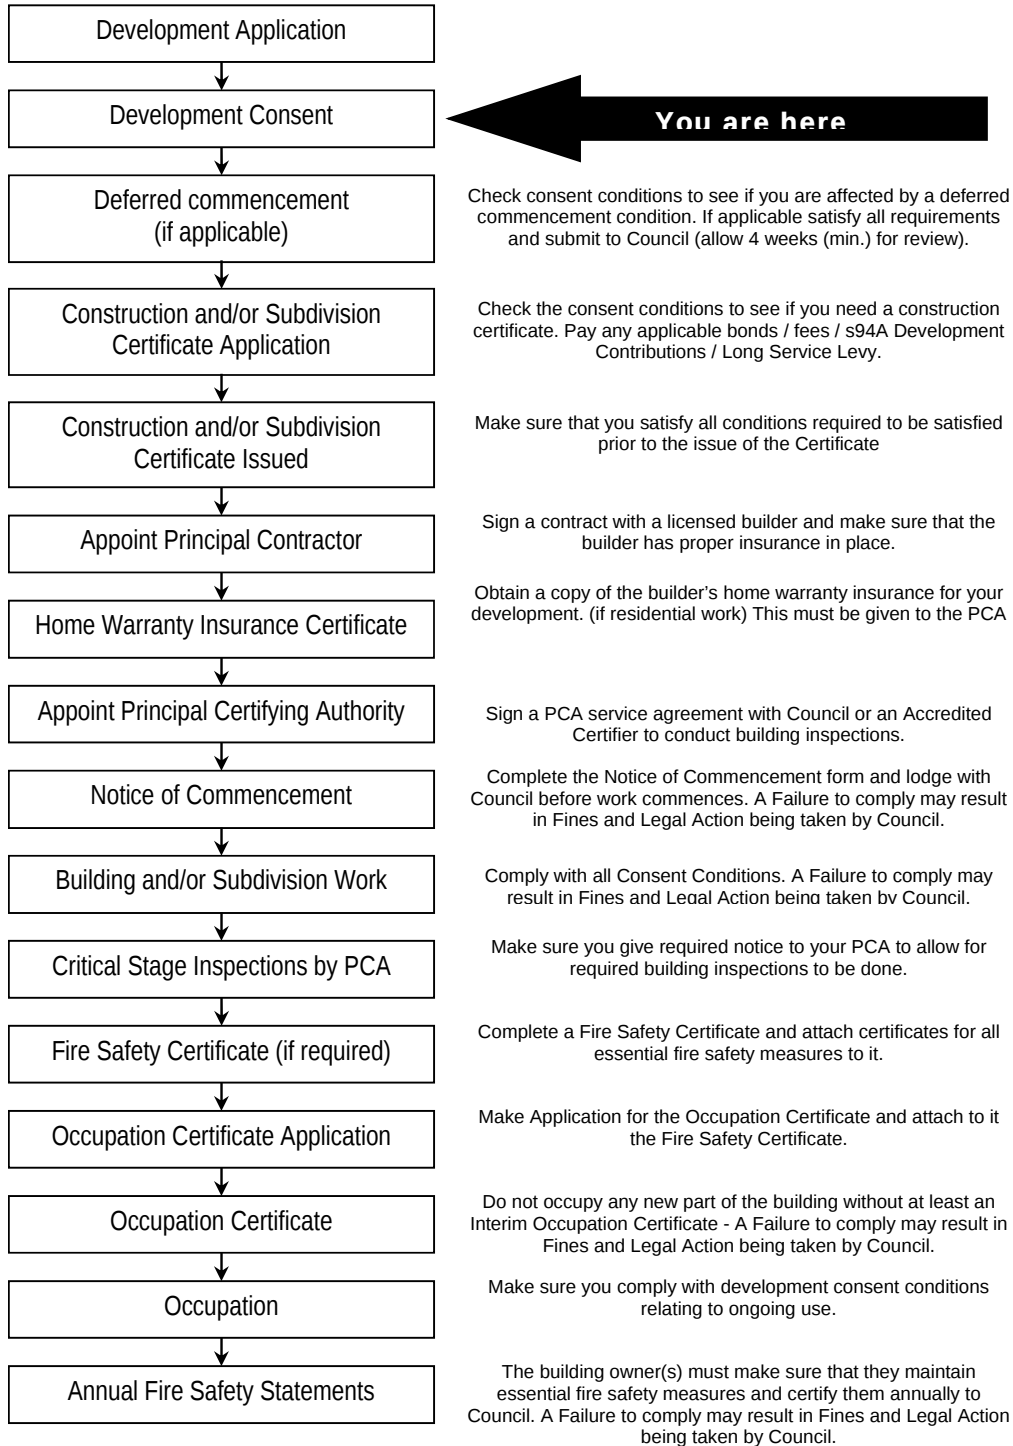

Date:

20/8/2015

NOTE: Signed by Warringah Council in accordance with the EP&A Act 1979 and EP&A Reg 2000 as determined by the Sydney East Joint Regional Planning Panel on **12 August 2015**.

Where are you in the development process?

**General Advice**

The attached Notice of Determination includes conditions of consent which must be complied with.

(Note: A failure to comply is a serious breach of the Environmental Planning & Assessment Act 1979 which attracts penalties and may also result in legal action being taken, and orders for demolition.)

Building Certification

The Environmental Planning and Assessment Act 1979 provides that:

- Building work cannot occur unless a construction certificate has been issued;
- Occupation of building works cannot occur unless an occupation certificate has been issued
- Subdivision cannot be registered until a subdivision certificate has been issued
- Mandatory Inspection for building work must be completed

Please refer to process chart for more detail.

(Note: A failure to gain approval prior to the works being carried out is a serious breach of the Environmental Planning & Assessment Act 1979 which attracts penalties and may also result in legal action being taken, and orders for demolition.)

Certification Services

Construction Certificates / Occupation Certificate / Subdivision Certificates / Strata Certificate, can be issued by Council or an accredited private certifier (Note Council must be the Principal Certifying Authority (PCA) for subdivisions).

Council is well placed to provide Certification Services. Council can issue Construction Certificates and act as your Principle Certifying Authority at competitive rates. Please visit our web site www.warringah.nsw.gov.au or speak to our Customer Service Officers if you have any further questions about our Certification Services or if you wish to use Council as your certifier.

Charges Associated with the Development Consent

All bonds, fees, (s94A) Development Contributions, Long Service Levy detailed within the Notice of Determination are required to be paid prior to the issuing of any Construction Certificate.

Acceptable Form of Security Bonds

Council will accept bank guarantee (in a form acceptable to Council) in lieu of cash and is required prior to the issue of a construction certificate.

Modifications to the consent

If you seek to make any changes to the development (which may include internal / external configuration of the building, variation to facades, site layout or any changes to the proposed operation or use), the modifications *will* require the submission and approval of an application to modify the development consent prior to the issuing of a Construction Certificate and prior to the works being carried out.

(Note: A failure to gain approval prior to the works being carried out is a serious breach of the Environmental Planning & Assessment Act 1979 which attracts penalties and may also result in legal action being taken, and orders for demolition.)

Other Matters not detailed within the Notice of Determination

The Notice of Determination does not stipulate every requirement that must be completed to satisfy New South Wales and Commonwealth legislation.

You should check, as may be relevant, with other authorities including but not limited to:

- ☐ *Workcover NSW* for work safety and asbestos requirements
- ☐ *Sydney Water – Quick Check Agent* for the provision of water and sewer services
- ☐ Energy & Gas suppliers for utility services
- ☐ *Department of Fair Trading* for advice about builders and licensing
- ☐ *Building Professionals Board* for advice about private certifiers
- ☐ *NSW Roads and Traffic Authority* for works on state roads only
- ☐ *Human Rights and Equal Opportunity Commission* for access issues
- ☐ *NSW Land and Property Information Service* for Land Title matters
- ☐ *Australia Post* for the positioning and dimensions of mail boxes in new commercial and residential developments;

Model

If you submitted a model with the application it must be collected from the Council offices within fourteen (14) days of the date of this determination. Models not collected will be disposed of by Council.

Trade waste agreement

A Trade Waste Agreement must be obtained from Sydney Water prior to the discharge of trade wastewater to the sewer system. Trade wastewater is defined as 'discharge water containing any substance produced through industrial or commercial activities or operation on the premises'.

Waste collection

Liquid and solid wastes generated on the site must be collected, transported and disposed of in accordance with the requirements of the *Protection of the Environment Operations Act 1997*. Records must be kept of all waste disposal from the site.

Material to be removed from the site must be source separated on site to maximise recycling, and the material disposed of to an appropriate disposal and recycling facility in accordance with the approved Waste Management Plan.

Aboriginal Heritage

If in undertaking excavation or works and any Aboriginal site or object is, or is thought to have been found, all works are to cease immediately and the applicant is to contact the Aboriginal Heritage Officer for Warringah Council, and the Cultural Heritage Division of the Department of Environment and Climate Change (DECC).

On-Site Sewage Management System

This approval does not authorise the installation or operation of a new or modification of an existing on-site wastewater management system. An On-Site Sewage

Management System must not be installed or operated unless an 'Approval to Install an On Site Sewage Management System' is obtained from Warringah Council.

Cost of Works

The applicant shall bear the cost of all works associated with the development that occurs on Council's property.

Relocation of stormwater drainage

Council is not responsible for the cost of relocating Council's stormwater drainage pipes through the subject property.

Tree preservation

Where tree work has not been approved by this Development Consent the developer is notified that a general Tree Preservation Order applies to all trees in the Warringah Local Government Area. This order prohibits the ringbarking, cutting down, topping, lopping, pruning, transplanting, injuring, or wilful destruction of such trees except without the prior written consent of Council.

Storage bins on footpath and roadway

Approval is required from Council prior to the placement of any storage bin on Council's footpath and/or roadway.

Protection of Public Places

- (1) If the work involved in the erection or demolition of a building:
 - (a) is likely to cause pedestrian or vehicular traffic in a public place to be obstructed or rendered inconvenient; or
 - (b) building involves the enclosure of a public place,

a hoarding and site fencing must be erected between the work site and the public place.

- (2) If necessary, an awning is to be erected, sufficient to prevent any substance from, or in connection with, the work falling into the public place.
- (3) The work site must be kept lit between sunset and sunrise if it is likely to be hazardous to persons in the public place.
- (4) Any such hoarding, fence or awning is to be removed when the work has been completed.

- (5) No access across public reserves or parks is permitted.

Note: Prior to the erection of any temporary fence or hoarding over property owned or managed by Council, written approval must be obtained.

Road Opening Permit

The developer/applicant is to obtain a "Road Opening Permit" from Council and pay all appropriate charges prior to commencement of any work on Council property. The developer/applicant shall be responsible for all public utilities and services in the area of the work, and as such shall notify all relevant Authorities, and bear all costs associated with any repairs and/or adjustments as those Authorities may deem necessary.

Special Permits

Unless otherwise specifically approved in writing by Council, all works, processes, storage of materials, loading and unloading associated with the development are to occur entirely on the property. The applicant, owner or builder must apply for specific permits available from Council. A minimum of forty-eight (48) hours notice is required for all permits except work zones, which may require additional assessment time.

- ☐ *Permit for on-street mobile plant*
Restrictions apply to the hours of operation and the area of operation for on street mobile plant equipment (for example cranes, concrete pumps, cherry pickers). Separate permits are required for each occasion and each piece of equipment. It is the responsibility of the applicant, owner and builder to take whatever steps are necessary to ensure that the use of any equipment does not violate adjoining property owner's rights.
- ☐ *Hoarding Permit*
Permits are required to erect Class A, Class B and Class C hoardings. If an 'A' Class hoarding is to alienate a section of Council's property, that section will require a permit for the occupation of Council's property.
- ☐ *Storage of building materials and building waste containers (skips) on*

Council's property

Permits to utilise Council property for the storage of building materials and building waste containers (skips) are required for each location. Failure to obtain the relevant permits will result in the building materials or building waste containers (skips) being impounded by Council with no additional notice being given.

☐ *Kerbside restrictions, work zones*

Existing kerbside restrictions apply. An application must be made to Council for the alteration of existing kerbside restrictions or the provision of a construction zone.

Other permits may include out of construction hours permits.

**Licensing requirements for removal of bonded asbestos**

Anyone who removes, repairs or disturbs bonded asbestos must hold a bonded or a friable asbestos licence, or a demolition licence in accordance with Workcover requirements and the Occupational Health and Safety Act 2000.

Pool Access

Access to pools are required to be restricted by a child resistant barrier in accordance with the regulations prescribed in all relevant Acts, Regulations and Australian Standards including:

- (i) Swimming Pools Act 1992;
- (ii) Swimming Pools Amendment Act 2009;
- (iii) Swimming Pools Regulation 2008
- (iv) Australian Standard AS1926 Swimming Pool Safety
- (v) Australian Standard AS1926.1 Part 1: Safety barriers for swimming pools
- (vi) Australian Standard AS1926.2 Part 2: Location of safety barriers for swimming pools

It is your responsibility as a land owner to ensure any fencing is maintained.

Dewatering

Where dewatering works are required on the development site during construction, the developer/applicant must apply for and obtain a bore license from the NSW Department of Water and Energy. The bore license must be obtained prior to commencement of dewatering works.

Requirement to Notify about New Contamination Evidence

Any new information revealed during works that has the potential to alter previous conclusions about site contamination or hazardous materials shall be immediately notified to Council and the Principal Certifying Authority.

Flood Evacuation Plan

If your site is on flood prone land you may wish to consider the preparation of a flood evacuation plan.

Generally a Flood Evacuation Plan would be prepared by suitably qualified Engineer (e.g. Hydraulic) with a number of years experience in flood management and who is eligible for Membership to the Australian Institute of Engineers.

Some matters that you may wish to consider (but not limited to) include:

- (i) a route of evacuation to higher ground and / or point of shelter
- (ii) depth of water for a Possible Maximum Flood event surrounding the building
- (iii) details of 'last chance' evacuation water levels / times for evacuation prior to floodwaters surrounding the building
- (iv) provide details of flood warning systems and protocols
- (v) details of how this information will be distributed and people educated for users of the site.

You may seek to discuss this with the State Emergency Service of NSW.

Utility Service Requirements

Where development requires the installation of, or the relocation of utility services being (but not limited to) gas, water, electricity and telecommunications, the installation of, or the relocation of utility services shall be conducted in accordance with the requirements of the relevant service provider / authority (unless stipulated by any other condition of the consent or will result in damage to threatened or endangered species defined under the Threatened Species Conservation Act).

Plant & Equipment Kept Within Site

All plant and equipment used in the erection of the building, including concrete pumps, wagons, lifts, mobile cranes, etc, shall be situated within the boundaries of the site and so placed that all concrete slurry, water, debris and the like shall be discharged onto the building site, and is to be contained within the site boundaries. This does not prevent any requirement to comply with the Protection of the Environment Operations Act.

Lighting

Illumination of the site is to be arranged in accordance with the requirements of Australian Standard 4282 - 1997 Control of the obtrusive effects of outdoor lighting so as not to impact upon the amenity of the occupants of adjoining and nearby residential premises.

OTHER MATTERS

Child Care Centres

A license to operate a child care centre must be obtained from the NSW Department of Community Services prior to the commencement of the use of the child care centre.

Disability Access

This decision does not ensure compliance with the Commonwealth Disability Discrimination Act 1992. Applicants are strongly advised to investigate their requirements under that Act

Food Premises

Food premises are required to comply with the requirements of the Food Act 2003, the Food Standards Code and Australian Standards.

The proprietor of a food business must notify the NSW Food Authority of the details of the business. Notification may be done either online at www.foodnotify.nsw.gov.au or by lodging a completed NSW Food Authority notification form to the NSW Food Authority or Council.

Wheel washing facility

All trucks leaving the site, having had access to unpaved or contaminated areas, shall depart via a wheel wash facility in order to prevent mud, dust or debris from being deposited on Council's roads. The wheel wash facility shall be constructed prior to any truck movements occurring. Water from the wheel wash facility must not cause pollution. Any direction of Council with regard to cleaning trucks or the cleanup of road

pavements adjoining the site shall be complied with immediately.

Monitoring State of Roadways

The applicant shall monitor the state of roadways leading to and from the site and shall take all necessary steps to clean up any adversely impacted road pavements as directed by Council.

Storage of Dangerous Goods

Prior to the storage of any “dangerous goods” on the premises, a copy of a license obtained from the Chemical Safety Branch of Work Cover Authority must be submitted to Council.

Storage of Flammable and Combustible Liquids

Flammable and combustible liquids must be stored in accordance with Australian Standard 1940 The Storage and Handling of Flammable and Combustible Liquids.

Noise and Vibration

The premises, including operation of vehicles, shall be conducted so as to avoid offensive noise or vibration and cause no interference to adjoining or nearby occupants. Special precautions must be taken to avoid nuisance in neighbouring residential areas, particularly from machinery, vehicles, warning sirens, public address systems and the like.

Hairdressing/Beauty Treatment/ Skin penetration Requirements

The premises must comply with the following requirements before the commencement of business:
