Subject: MOD2018/0432 DA2016/0550

I write with regard to the above modification of DA2016/0550.

I am concerned with the late submission of a request of 14 air conditioning units to be installed (even though they are already in place) for this development. This development is on top of the hill at Freshwater and I question the need for 14 air conditioning units – Surely with a new development cross through ventilation would have been considered to support our ethos toward a more environmentally friendly area. The noise from these will impact on my property along with others, with the continual drone from these not 1 but 14 units.

I request you re consider allowing these to go ahead –

Thanks

Caryn Harrington
