RE: DA2019/1340 - 100 / 0 Meatworks Avenue OXFORD FALLS NSW 2100

Hi, I am against all the applications due to increase on traffic, less living room for wildlife. Due to the recent fire desisted our native wildlife suffers even more then before and needs all the space and protection it can get. Such a development like this application will bring more traffic, more noise more space taken up by the development and lost for the native wildlife and trees which will need to be removed for this submission. Oxford falls AI's school and family suburb doesn't deserve to be overdeveloped. The fraught with water problem adds another factor for this development not to go forward! I am against it .
