**RE: PEX2025/0001 - 13 Wilga Street INGLESIDE NSW 2101**

We have grave concerns about the accessibility for emergency vehicles if so many homes are built and so there are so few roads in and out of the planned area in the current design. The bush fires in the 1990s proved this concern as "sightseers" blocked access from Powderworks Rd up Wilga St for firefighters and residents. More homes and properties might have been saved with better access. With Powderworks Rd being only 2 lanes, and only 2 access roads in the current plans, how will all the occupants get out in case of an emergency? A disaster waiting to happen.
