**RE: PROPOSED REZONING OF HEYDON ESTATE AND UNITING
CHURCH LAND, INGLESIDE AND ELANORA HEIGHTS
(DA. R0005/03 AND R0006/03)**

Dear Mr Gordon,

I found your statement in relation to global warming, in the Manly Daily (Tues April 29) and it's affect on sea levels at odds with the proposed rezoning of the Heydon Estate. What happens to Mullet Creek and more particularly both ends of Garden St in North Narrabeen when we get the mix of extreme storms, king tides and rising sea levels. The loss of absorption, if the proposed rezoning goes ahead, will be devastating as the run-off floods Mullet Creek and subsequently the wet-lands and then surrounding streets. It doesn't take a lot of sustained rainfall for Mullet Creek to creep across the parkland towards Garden St between Jackson & Powderworks Rds. With the new development around the old drive-in and then the Heydon Estate, it will only get worse.

Regards
