<b>Comments</b>	I would like to support the changes being made to the Draft Warringah Development Control Plan - Private Property Tree Management Amendment. I believe that owners should be allowed to remove potentially dangerous trees that are within 3 metres of their homes without having to seek approval from the council. Most owners are responsible and understand the costs associated with the removal of trees and do not enter into this lightly. I feel that the changes that are being recommended will allow more efficiency within the council and our community.
