RE: DA2015/0597 - 1768 / 0 Sunshine Street MANLY VALE NSW 2093

I am fully in support of the long overdue Manly Vale Public School upgrade. I believe the design is great allowing for the best available use of the departments land and for our children and future children within the schools catchment area. I believe also that the new school will provide our community with facilities not currently available for hire.

I do have concerns over traffic management that will come with a larger school, and traffic management for the school today remains an issue. I hope this will be properly addressed and not continually fobbed off as to "who is responsible". Has anyone at the council looked at purchasing one of the properties in (possibly numbers 2 or 4 or 6) in Mildred Ave and creating a one way road through to join up with Gibbs St? This could then (possibly) create a long fronted school border, create proper bus layoffs, create a secure and safe kiss-and-drop zone. Just a thought. Or, making Sunshine St one way (due west) from Pineview Ave to Arana St - and include a drop-and-kiss zone at the top of Sunshine (south side of the st). And at the VERY LEAST the school should have a zebra crossing.
