RE: DA2019/1340 - 100 / 0 Meatworks Avenue OXFORD FALLS NSW 2100

We live in a truly unique part of Sydney, allowing this destruction to take place to our native bushland will be catastrophic to future generations. This area should be protected and celebrated. There will be run off or water retention issues, traffic problems and destruction of native lands. It looks like this is just stage 1 and then I'm sure it will spread like a cancer into the surrounding areas. It's time we curtail this development and truly embrace the beauty and healthy lifestyle by saving and managing our bush, lakes and beaches to allow all future generations to enjoy what we had.
