RE: PEX2025/0001 - 13 Wilga Street INGLESIDE NSW 2101

I am strongly opposed to this developmental application on a number of levels. The major being that there is insufficient infrastructure to support the number of deswellings in the area. To approve this number of deswellings that will be serviced by a single lane road that is already at capacity is unmanageable. There are also significant concerns for current residence given the locality to Bush Fires and again the limited access for residence to flee and emergency vehicles to respond. Finally the extra population would put unrealistic expectations on the local school which has limited grounds to expand capacity.
