Dear Sir/Madam

I would like to request that when the building is being completed thought be given to widening and repairing the footpath along side it in Jackson's Rd. It is a path that has much foot traffic and it has been narrow and uneven since I have lived here. It is a path used by passengers alighting the B1 bus and accessing the shopping centre. Also because of the proximity of schools has many school children using it. It is also used by many aged people using walkers and buggies. With the surge of the use of e-bikes it has also become more dangerous made more so because of the narrowness of the pathway. I respectfully request that the path be widened and rehabilitated.

Sincerely Margaret Melville
