**RE: DA2019/1340 - 100 / 0 Meatworks Avenue OXFORD FALLS NSW 2100**

I disagree with the development proposal for the Meatwork's location at Oxford Falls. Oxford Falls has a uniqueness which provides natural corridors for native plants and animals to live within a secure corridor. The impact of development on the Meatwork's land will harm and damage the immediate environment, with native wildlife being distributed and loss of their habitat.

The traffic within this area will become more congested especially during school hours. The potential for student safety is at a higher risk.
