RE: Mod2020/0133 - 7 Kanangra Crescent CLONTARF NSW 2093

Could there be a requirement for a traffic management plan to be put in place during the construction of the pool and/or a requirement that all traffic be parked on Heaton Ave rather than Kanangra Cr. During recent works at the site large trucks have been parked in front of the property making the corner a blind corner for cars travelling from Peronne Ave to Ethel Street. This situation did not occur historically as there used to be a No Stopping sign for parking below 9 Kanangra Cr and if any cars are parked there a driver can see oncoming traffic before moving past them (whereas if parked at 7 Kanangra Cr there is no visibility and cars need to move out without any ability to see oncoming traffic, which given the narrow nature of Kanangra Cr is dangerous).
