#### 1.0 INTRODUCTION

This Statement of Environmental Effects has been prepared for Mrs Yvonne and Mr Mark West to accompany a Development Application (DA) to Northern Beaches Council for the demolition of existing structures and the construction of a dwelling house with swimming pool at 5 Cullen Street, Forestville.

More specifically, the proposed development comprises of the demolition of the existing driveway, dwelling and swimming pool, and the construction of a new driveway, two-storey dwelling and swimming pool with spa.

The proposal is permissible with consent and is suitable for the site and the area. The proposal has been designed to relate to its site and to the streetscape in terms of appearance, envelope, setbacks, bulk and scale. The proposal will operate without any significant impact to the amenity of neighbouring properties.

The purpose of this SEE is to:

- Describe the site to which the application applies and its context;
- Describe the proposed development
- Describe the legislative framework against which the application is to be assessed and determined; and
- Provide an assessment of the environmental impacts in accordance with the Section 4.15 of the EP&A Act 1979.

This Statement has been prepared in reference to the following:

Document	Author	Date
Architectural Plans	Dragonfly Architects	August 2021
Survey	Total Surveying Solutions	September 2020

# 2.0 SITE ANALYSIS & CONTEXT

#### 2.1 The Site

The site is located at 5 Cullen Street, Forestville and is legally described Lot 4, Section 44 in Deposited Plan 758421. The site is located at the end of the Cullen Street cul-de-sac.

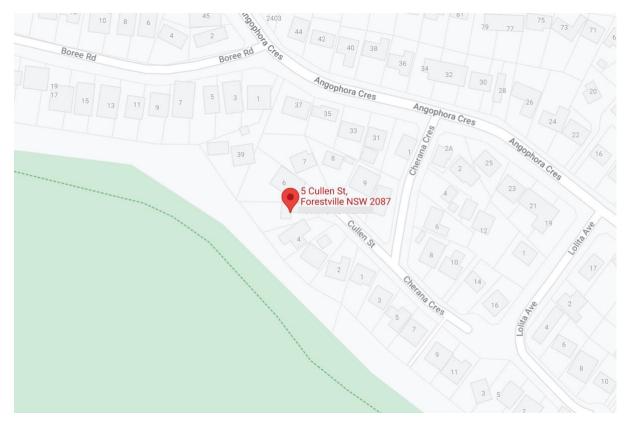

Figure 1 – Site locality map (Google Maps)

Figure 2 – Aerial map (SIX Maps)

The site is generally rectangular with a total area of 848 square metres by survey, with an 11.58 metre street frontage to Cullen Street. The northern side boundary measures 55.065 metres and the

southern side boundary measures 43.08 metres. The rear boundary measures 28.335 metres. The site is relatively flat, with a cross fall of only 2m.

The site currently contains a dwelling house, swimming pool and shed. The front and the rear of the site is landscaped with shrubs and grass. Vehicular access is available from Cullen Street.

The land is zoned R2 Low Density Residential under the provisions of Warringah Local Environmental Plan 2011 (LEP). The site is not identified as a Heritage Item, nor is it located within a Heritage Conservation Area (HCA). It is also not considered to be located within the close vicinity of any Item or HCA, or as a contributory item.

Figure 3 – Subject site as viewed from Cullen Street (Google Maps, 2019)

# 2.2 The Locality

The site is located within the local residential area of Forestville. The locality comprises primarily of one to two-storey residential development. The site adjoins a one storey dwelling on both adjacent sites, No. 4 and No. 6 Cullen Street.

# 2.4 Development History

A search on Council's DA Tracker returned the following results for development applications associated with the site:

- BA5003/4248
- BA5002/2497
- BA5001/0709

#### 3.0 THE PROPOSAL

#### 3.1 Overview

The Development Application proposes the demolition of the existing driveway, dwelling and swimming pool, and the construction of a new driveway, two-storey dwelling and swimming pool with spa.

The proposal has been designed to relate to its site and to the streetscape in relation to appearance, envelope, setbacks, bulk and scale. The contemporary design utilises high quality materials and detailing to present an unobtrusive visual outcome for the locality.

Please refer to plans prepared by Dragonfly Architects.

# 3.2 Development Configuration

The proposed development comprises the following:

Level	Use
Ground Floor	Double garage
	Study
	Guest Bedroom
	Laundry/bathroom
	Open plan kitchen/living/dining
First Floor	Bedroom x 4
	Bathroom x 2 (including ensuite)
	Kids rumpus

#### **Ground Floor**

The ground floor contains the shared recreation and function spaces for the dwelling, with a lounge, dining, kitchen and covered terrace space. This floor can be accessed from the primary house entry, as well as a rear door.

#### **First Floor**

The first floor provides for more private bedroom spaces. This floor is accessible via a set of stairs from the ground floor. Front and rear facing openings from this floor facilitate passive surveillance across the public domain and the private rear garden.

#### 3.3 Numerical Overview

A brief numerical overview of the development parameters for the proposed development is included in the following table

**Table 1: Key development components** 

Component	Proposal
Site area	848m²
Landscaped Area	404.57m²
Private Open Space Area	>60sqm
Height	2 storeys
	<8.5m
Boundary setbacks	
<ul><li>Front</li></ul>	>6.5m
• Side	0.9m
• Side	0.9m
<ul><li>Rear</li></ul>	>10m
Car spaces	2

# 4.0 STATUTORY PLANNING FRAMEWORK AND ENVIRONMENTAL ASSESSMENT

This Chapter provides an environmental assessment in accordance with Section 4.15 of the Environmental Planning and Assessment Act 1979.

#### 4.1 Statutory and Policy Compliance

The relevant matters for consideration under Section 4.15(a) of the EP&A Act, 1979, are identified as:

- State Environmental Planning Policy No. 55 Remediation of Land
- State Environmental Planning Policy (Building Sustainability Index: BASIX) 2004
- Warringah Local Environmental Plan 2011
- Warringah Development Control Plan 2011

The primary statutory document that relates to the subject site and the proposed development is Warringah Local Environmental Plan 2011. The primary non-statutory plan relating to the subject site and the proposed development is Warringah Development Control Plan 2011.

# 4.1.1 State Environmental Planning Policy No. 55 - Remediation of Land

This Policy is to provide for a state-wide planning approach to the remediation of contaminated land. Subject to Clause 7, considerations should be given to the suitability of land in terms of contamination.

The subject site has a long history of being used for the residential purpose. Thus, there is no further consideration required under Clause 7(1)(b) and (c) of SEPP 55.

# 4.1.2 State Environmental Planning Policy (Building Sustainability Index: BASIX) 2004

SEPP (BASIX) 2004 applies to the proposed development. A BASIX Certificate is submitted with the application and confirms that the proposal will comply with the water, thermal comfort and energy efficiency requirements of the policy.

# 4.1.3 Warringah Local Environmental Plan 2011

The development complies with the provisions of Warringah Local Environmental Plan 2011 (LEP 2011).

#### Zoning and permissibility

The site is located in Zone R2 Low Density Residential.

Figure 4 – Land Zoning Map (NSW Planning Portal)

The development is identified to be *a dwelling house*, which is permitted with consent in the R2 Low Density Residential zone.

The objectives of the zone are:

- · To provide for the housing needs of the community within a low density residential environment.
- To enable other land uses that provide facilities or services to meet the day to day needs of residents.
- To ensure that low density residential environments are characterised by landscaped settings that are in harmony with the natural environment of Warringah.

The proposed development meets the relevant land use zone objectives. The development will provide for a functional family home in an area where there is a high demand for spacious and high quality housing. The proposal will not prevent other sites from hosting land uses that provide facilities or services to meet the day to day needs of residents. The landscaped setting of the existing site is retained, with generous landscaping the front and rear setbacks, including the retention and protection of numerous trees.

#### Clause 4.3 Height of buildings

The LEP Height of Building Map stipulates that the maximum building height permitted for the site is 8.5 metres. The proposed height of the development is less than 8.5 metres.

# **Clause 5.10 Heritage Conservation**

The site is not identified as a Heritage Item, nor is it located within a Heritage Conservation Area (HCA). It is also not considered to be located within the close vicinity of any Item or HCA, or as a contributory item.

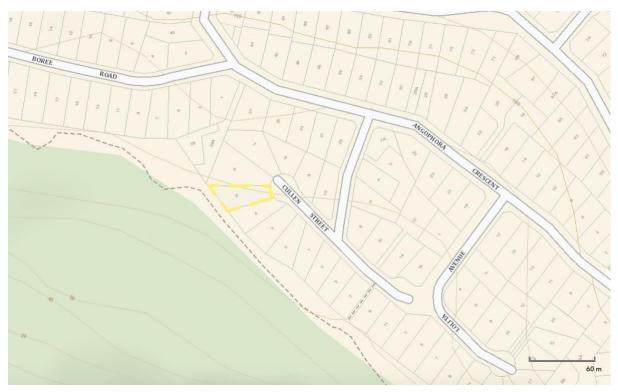

Figure 5 – Heritage Map (NSW Planning Portal)

# Clause 6.4 Development on sloping land

The development site is identified to be located within a landslip risk hazard zone, specifically 'Area B – Flanking Slopes 5 to 25'. In accordance with this clause

"Development consent must not be granted to development on land to which this clause applies unless the consent authority is satisfied that—

- (a) the application for development has been assessed for the risk associated with landslides in relation to both property and life, and
- (b) the development will not cause significant detrimental impacts because of stormwater discharge from the development site, and
- (c) the development will not impact on or affect the existing subsurface flow conditions."

Refer to the Geotechnical Report submitted alongside this Development Application for consideration of this matter.

# 4.1.4 Warringah Development Control Plan 2011

The development achieves a high level of compliance with the provisions of Warringah Development Control Plan 2011.

	with the development application.				

# **4.2 Impacts of the Development**

As noted in the above assessment against the provisions of the relevant Environmental Planning Instruments and Development Control Plan, the development is of a reasonable scale and nature, and does not present unreasonable environmental, social and economic impacts.

# **Impacts on Natural and Built Environment**

The development does not impact upon native vegetation, soil conditions, foreshore environment or air quality. The development involves the removal of a few trees and shrubs of minor landscape value. This is considered to be of acceptable environmental impact as a number of mature and

significant trees and shrubs are being retained and the overall landscaped character is being protected.

The modest two-storey scale retains the access to sunlight, privacy, pleasant outlook and overall residential amenity of the two surrounding neighbours.

#### **Social and Economic Impacts**

The development increases the amenity of the property with the upgraded family home in an area where there is a high demand for this. The development will thus also upgrade the presentation of the site to the street and improve aesthetic quality of the streetscape. The proposal does not engender any negative social or economic outputs.

# 4.3 Suitability of the Site

The subject site is considered suitable in size and shape to accommodate the development. The proposal does not introduce any incompatible uses to the site. The works are permissible under the R2 Low Density Residential zone.

#### 4.3.1 Access to Services

The site is located within an established residential area with excellent access to services and public transport. As the site is within an established urban area, electricity, sewer, telephone, and water services are readily available to the subject site.

#### 4.3.2 Parking and Access

The on-site parking provided complies with the parking requirements as prescribed by Warringah Development Control Plan 2011. It provides a logical and considered approach to the provision of off-street car parking. The design and layout of on-site parking and vehicle access/egress is compliant with AS2890.1.

#### 4.3.3 Hazards

The site is in an area recognised by Council as being subject to landslip and bushfire. The proposed development is not likely to increase the likelihood of such hazards occurring and is considered appropriate in this instance. Both a geotechnical report and a bushfire assessment report have confirmed the proposal's suitability. The proposal is considered satisfactory in this regard.

# **4.4 The Public Interest**

The proposal is considered to be in the public interest as it produces nominal environmental, social and economic impacts. Furthermore, it will provide for a functional family home in an area where there is a high demand for spacious and high quality housing.

The proposed development has been designed to relate to the size, shape and context of the site and has been designed in accordance with the desired future character for development in the area.

The proposal seeks to provide a new residential dwelling development that makes efficient use of space on the site in a prime location that is in high demand for residential accommodation. In addition, the proposal has been designed to minimise as far as practical any adverse effects on existing and future neighbouring properties. The proposal is consistent with the applicable LEP and DCP provisions except where identified and justified in this Statement of Environmental Effects. Accordingly, the proposed development is considered to be in the public interest.

#### 5.0 CONCLUSION

The Statement of Environmental Effects (SEE) has been prepared to consider the environmental, social and economic impacts of the development at 5 Cullen Street, Forestville. The report has addressed the applicable policies and plans, and has provided an environmental assessment in accordance with Section 4.15 of the Environmental Planning and Assessment Act 1979.

The application proposes a permissible development within the subject site locality. The proposal incorporates appropriate design considerations to minimise any adverse impacts on the natural and built environment, and the amenity of the surrounding neighbourhood.

Given the benefits of the development and compliance with the relevant policies and plans, we conclude that the proposed development at 5 Cullen Street, Forestville as described in this application is reasonable and supportable, and worthy of approval by Northern Beaches Council.
