RE: PEX2025/0001 - 13 Wilga Street INGLESIDE NSW 2101

Dear Councillors,

Our church has stood on this site since 1949 - a living part of the Northern Beaches' cultural and spiritual fabric. It is more than bricks and mortar; it is where generations have learned, celebrated, and found community.

The proposed development next door threatens to change that forever.

Our children will lose their privacy. Each week, around 160 young people come to learn language, dance, and faith. They deserve to play and study without being watched from balconies towering over their playgrounds.

Our parents will lose confidence. Families entrust us with their children's safety. Overlooking windows directly into activity areas make that trust impossible to maintain.

Our community will lose its space to grow. We dream of expanding - adding classrooms, facilities for the elderly, and affordable housing for members in need. A three-storey wall on our boundary blocks that future.

Our heritage will lose protection. The church predates every modern building around it. It has served through generations of migration, hardship and celebration - yet now risks being overshadowed by inappropriate, high-density development.

We urge Council to require proper separation, safeguard children's privacy, and protect the rights of a long-standing community institution.

Please help us preserve the safety, dignity and future of a place that has enriched the Northern Beaches for over 75 years.
