SUPPLEMENTARY INSPECTION REPORT

Re: 7 Warekila Road, Beacon Hill
From: Sasha Sollo – Pest Technician

There are 2 suspect trees on this property.

Immature eucalypt is situated 1 metre from sub-structural walls of front porch. As this tree grows, the roots are likely to undermine the structure of the house. In addition, limbs hang over the house and this is likely to be a hazard in the event of weakening by wind or insect attack.

Also, eucalypt on rear boundary has previously been subject to an insect attack. It is not possible to be sure, but this tree has lost a limb as a result of either a) larval form of Longicorn Beetle, or b) infestation of Nasutitermes (species of termite). This tree has been drilled and probed and it appears that there are no termites currently active. This tree could be subject to further limb loss if it should be attacked again.

A qualified tree surgeon should be consulted to support these suggestions.

Please contact this firm if you have any questions.

Yours faithfully
