Waste Management Plan

Proposal: Service Station

Address of Development: 79 Barrenjoey Road, Mona Vale

Construction and Earthworks Stage

The waste will be separated on site by builder's contractors and builder's labourers during the construction stage. The site will be checked on a regular basis to make sure no recyclable materials are mixed with non-recyclable materials, and to set aside on site an area to store the recyclable materials for transportation to local recycling plants.

The site manager will erect a sign on site for waste areas and will inform the builder's staff where material is to be collected for recycling. The site manager and/or builder will impose the execution of the waste separation policy on a regular basis and to have on-going checks.

Materials on Site		Destination		
Type of waste generated	Estimates Volume in m ³ or area m ² or weight in tonne (t)	Reuse and Recycling		Disposal
		On-Site	Off-Site	
Excavation Material	2000m ³	Used on site	Kimbriki Resource Recovery Centre	-
Bricks/blocks	<2m ³	-	Kimbriki Resource Recovery Centre	-
Tiles	<1m ³	-	Kimbriki Resource Recovery Centre	-
Concrete	<2m ³	-	Kimbriki Resource Recovery Centre	-
Metal	<3m ³	-	Kimbriki Resource Recovery Centre	-
Plasterboard (offcuts)	<2m ³	-	Kimbriki Resource Recovery Centre	-
Fixtures and fittings	<1m ²	-	-	Kimbriki Resource Recovery Centre
Packaging (used pallets and pallet wrap)	<5m ³	-	-	Kimbriki Resource Recovery Centre
Other waste e.g. pvc plastics, paint, paper / cardboard	<10m ³	-	-	Kimbriki Resource Recovery Centre

Ongoing Operations

All waste storage will be contained within the waste storage area indicated on site in contractor bins. All waste will be sorted into recycling and waste and will be picked up by contractor when required.
