

Natural Environment Referral Response - Biodiversity

Application Number:	DA2019/0459
Responsible Officer	Adam Croft
Land to be developed (Address):	Lot CP SP 12796 , 7 - 9 Marine Parade MANLY NSW 2095

Reasons for referral

This application seeks consent development on land, or within 40m of land, containing:

- All Development Applications on
- Actual or potential threatened species, populations, ecological communities, or their habitats;
- Wildlife corridors;
- Vegetation query stipulating that a Flora and Fauna Assessment is required;
- Vegetation query - X type located in both A & C Wards;

And as such, Council's Natural Environment Unit officers are required to consider the likely potential environmental impacts.

Officer comments

The proposed development is located within the area identified as bandicoot habitat under Schedule 1 - Map D of the Manly DCP. Accordingly, an Assessment of Significance for impacts to the endangered population of bandicoots is required to be undertaken. However, given that the works will not impact soft open space, this assessment has been undertaken by Council's Natural Environment Officer and has concluded that the proposal will not result in a significant impact to the endangered population. Conditions of consent to prevent impact to individual bandicoots are to be applied.

Referral Body Recommendation

Recommended for approval, subject to conditions

Recommended Natural Environment Conditions:

CONDITIONS TO BE COMPLIED WITH DURING DEMOLITION AND BUILDING WORK

Pre-clearance Survey Required – Bandicoot Habitat

A pre-clearance survey for Long-nosed Bandicoot activity and presence is required prior to the removal of any vegetation, material or debris stockpiles. Clearing may only proceed if the survey concludes that no Long-nosed Bandicoots are present within the area to be cleared. All clearing must initially be carried out with hand tools to identify whether any bandicoots are sheltering within the area to be cleared (e.g. at the base of vegetation or under deep litter). Machinery may only be used once it has been confirmed that no bandicoots are sheltering within the area to be cleared. Clearing must be carried out at dusk and completed within one day so that bandicoots do not reoccupy partially cleared areas overnight. A record of each inspection is to be made in the daily inspection register log-book. The log-book is to be made available to the Principal Certifying Authority.

Reason: To avoid injury or death of Long-nosed Bandicoots which may be utilising stockpiles of

vegetation, materials or debris.

Daily Inspections Required – Bandicoot Habitat

An inspection register log-book must be kept on site recording daily inspections of all holes, machinery and construction material stockpiles, checking for Long-nosed Bandicoots. Inspections are to be undertaken each work day prior to commencement of works and works may only proceed once any bandicoot has safely vacated any holes, machinery or stockpiles. The log-book is to be made available to Principal Certifying Authority.

Reason: To avoid injury or death of Long-nosed Bandicoots which may be utilising stockpiles of vegetation, materials or debris.

Report Dead or Injured Bandicoots – Bandicoot Habitat

Any injured or dead Long-nosed Bandicoots found within the worksite must be reported to the National Parks & Wildlife Service (9457 9577) or Northern Beaches Council (1300 434 434).

Reason: To prevent impacts to Long-nosed Bandicoots in accordance with the Biodiversity Conservation Act 2016.

ON-GOING CONDITIONS THAT MUST BE COMPLIED WITH AT ALL TIMES

Dead or Injured Wildlife – Manly LEP Clause 6.5

If construction activity associated with this development results in injury or death of a native mammal, bird, reptile or amphibian, a registered wildlife rescue and rehabilitation organisation must be contacted for advice.

Reason: To mitigate potential impacts to native wildlife resulting from construction activity.
