RE: PEX2025/0001 - 13 Wilga Street INGLESIDE NSW 2101

I'm not against development when it appears to be well thought through but this disregards any sort of logic when the infrastructure, roads, schools, and the wishes of the people who already live here. Yes we know it's been on the books for some time BUT so was MonaVale road and look what happened there. As the Climate Risk Report has just been released has that been configured into this application? Has there been any consideration to the building of new roads, schools etc to cater for our new arrivals. Extra cars trucks and lorries will only anger the residents without proper infrastructure in place. I know new homes have to be built so why can't the council do so in a reasonable thoughtful way instead of the the way that appears to be at the expense of those that are already here. We need some sort of leadership here.
