CONSENT** DA2018 / 1332

Dear Sue,

SCP Consulting has undertaken the design and documentation for structural, civil and services for Glenaeon Retirement Village Stage 1 - Sewer Pumpstation Upgrade Works: More recently the sewer pumpstation has been moved north by no more than 2 meters.

We confirm that the boreholes that were provided as part of the original geotechnical investigations are still valid. No changes or additional bore holes to confirm and validate the Civil Design or Structural Design will be required.

Yours faithfully
