RE: DA2020/0951 - 37 - 38 East Esplanade MANLY NSW 2095

I fully support this development application. As a resident of the building the addition of usable community space for the building residents can only be beneficial and is hugely welcomed as we currently have no general use / community space except the small roof drying area (which has significant use restrictions).

The current pandemic has highlighted how important having accessible space is for those of us living in (small) apartments and if there is the opportunity to create this within the current 'footprint' of the building, with little to no impact to others, I would hope it would receive a positive response from the council.

Kind Regards
