RE: DA2025/0951 - 725 Pittwater Road DEE WHY NSW 2099

May i please request a impact study regarding the lighting which affects the close by properties at bus stop E6. Particularly 1249 which already is ill affected by the fluorescent lit advertising, which illuminates inside the residence at night. We have concerns that LED lighting will increase the light pollution in the premises, while also facilitating more intense lighting/colors (as is the nature of these bright LED advertising to gain attention). We reject any increase in lighting pollution into the 1249 Pittwater road premises.
