Proposed Construction Specifications

Proposed Concrete Swimming Pool

SITE: 26 Orlando Road
Cromer NSW 2099

The proposed development is for an inground concrete pool. These are constructed with steel formwork in the excavated area and then the concrete shell is pneumatically sprayed in place.

The interior surface will be pebblecrete. (pool specialized mix of pebble and cement)

External walking surfaces (coping) will be the clients choice of a natural stone product such as limestone or travertine.

Backwash requirements will be plumbed into existing gully locations on the property, or the filtration will be by means of a cartridge filter which does not require this capability.

Sewerage, water supply requirements and fire safety and resistance measures are not applicable to this application.
