Thanks Kevin,

Obviously community concerns would be in relation to increase in numbers not an elevated walkway.

Thank you for your response.

Kind regards,

Jenny Harris

Hi Jenny,

I have referred your matters to Administration to follow up including the listing of the Statement of Effects on Council's website. This should happen today, so please check the website on Thursday 12 July 2014.

The modification application will be re-notified to persons/groups who placed a submission in relation to the original application.

The application is for an "elevated walkway" and not an increase in number of students.

Thanking you.

Subject: Northern Beaches Christian School MOD2014/0081

Dear Kevin,

Would you please ensure the Statement of Environmental Effects for this modification available for public viewing on Councils website.

I have been unable to view on Eservices as although marked as the SEE under documents it opens as the written application form.

Given this document has not been available for public viewing I am requesting

an extension of time to comment on the proposal.

Would you please confirm that the modification application is not for any additional increase in school numbers.

Kind regards,

Jenny Harris
