RE: PEX2025/0001 - 13 Wilga Street INGLESIDE NSW 2101

I wish object to this development.

This development is totally out of characteristic for this area.

There has been little thought with the plan.

It's been disappointing that there has been no community consultatio.

This development keeps getting brought up every several years even though it inappropriate as it's in a major bushfire zone and there is no safe passage for the amount of people planned for the area plus current residents.

There is only two single roads that cannot handle that amount of traffic and also could not allow emergency vehicles to past to get to people in need.

I worry about my grandsons having to walk up the hill home from high school and the constant traffic should this development go ahead.

Other major points for the development not to go ahead are lack of hospital, the ability for the schools to cope, sporting facilities are already at capacity .

Lack of roads , the buses are already at capacity by the time they get to Dee Why.

I ha

I hope these valid points are taken in to consideration rejecting this development.

Regards Vicki
