Q

Re Planning Proposal For Property

No 184 Wyndora Avenue

Application No. PEX 2014/0005

With reference to above application I make a submission with respect to the effect the proposal has on my sea view to the ESE. The massing and Height analysis (West Elevation) shows that the height of the proposed buildings is nearly twice as high as current buildings. This will have a dramatic effect on my views over the buildings. I would prefer a lower height to proposal.

Yours faithfully

R. Leigh
