

29 April 2022

The General Manager
Northern Beaches Council
PO Box 82
Manly NSW 1655

Attention: Daniel Milliken – Acting Manager Development Assessments

Dear Daniel,

Development Application No: DA2022/0020 for Alterations and additions to a semi-detached dwelling at 28 Cliff Street MANLY
Clause 4.6 variation request - Height of buildings

1.0 Introduction

This clause 4.6 variation request has been prepared in support of a Height of Buildings variation associated with alterations and additions and the construction of a new passenger lift as depicted on the following plans prepared by Wolski Coppin Architecture

DA00 LOCATION & SITE ANALYSIS
DA01 BASEMENT
DA02 GROUND
DA03 FIRST
DA04 ATTIC
DA05 ROOF & SITE PLAN
DA06 NORTH ELEVATION
DA07 SOUTH ELEVATION

F01 FINISHES SCHEDULE

This clause 4.6 variation has been prepared having regard to the Land and Environment Court judgements in the matters of *Wehbe v Pittwater Council* [2007] NSWLEC 827 (*Wehbe*) at [42] – [48], *Four2Five Pty Ltd v Ashfield Council* [2015]

NSWCA 248, *Initial Action Pty Ltd v Woollahra Municipal Council* [2018] NSWLEC 118, *Baron Corporation Pty Limited v Council of the City of Sydney* [2019] NSWLEC 61, and *RebelMH Neutral Bay Pty Limited v North Sydney Council* [2019] NSWCA 130.

2.0 Manly Local Environmental Plan 2013 (MLEP)

2.1 Clause 4.3 - Height of buildings

Pursuant to clause 4.3 in the LEP the max building height shall not exceed 8.5 metres. The objectives of the control are as follows:

- a) *to provide for building heights and roof forms that are consistent with the topographic landscape, prevailing building height and desired future Streetscape character in the locality,*
- b) *to control the bulk and scale of buildings,*
- c) *to minimise disruption to the following:*
 - i. *views to nearby residential development from public spaces (including the harbour and foreshores),*
 - ii. *views from nearby residential development to public spaces (including the harbour and foreshores),*
 - iii. *views between public spaces (including the harbour and foreshores),*
- d) *to provide solar access to public and private open spaces and maintain adequate sunlight access to private open spaces and to habitable rooms of adjacent dwellings,*
- e) *to ensure the height and bulk of any proposed building or structure in a recreation or environmental protection zone has regard to existing vegetation and topography and any other aspect that might conflict with bushland and surrounding land uses.*

Building height is defined as follows:

building height (or ***height of building***) means the vertical distance between ground level (existing) and the highest point of the building, including plant and lift overruns, but excluding communication devices, antennae, satellite dishes, masts, flagpoles, chimneys, flues and the like

Ground level existing is defined as follows:

ground level (existing) means the existing level of a site at any point.

The existing building is 1500 approx above the height limit

It has been determined that the top of the proposed lift shaft is a maximum of 513 above the 8500 height limit. Ie 6% above 8500

The balance of the proposed modifications are well below the Height Limit
Refer West Elevation below

Figure 1 – West Elevation

2.2 Clause 4.6 – Exceptions to Development Standards

Clause 4.6(1) of MLEP provides:

(1) *The objectives of this clause are:*

- (a) *to provide an appropriate degree of flexibility in applying certain development standards to particular development, and*
- (b) *to achieve better outcomes for and from development by allowing flexibility in particular circumstances.*

The decision of Chief Justice Preston in *Initial Action Pty Ltd v Woollahra Municipal Council* [2018] NSWLEC 118 (“Initial Action”) provides guidance in respect of the operation of clause 4.6 subject to the clarification by the NSW Court of Appeal in *RebelMH Neutral Bay Pty Limited v North Sydney Council* [2019] NSWCA 130 at [1], [4] & [51] where the Court confirmed that properly construed, a consent authority has to be satisfied that an applicant’s written request has in fact demonstrated the matters required to be demonstrated by cl 4.6(3).

Initial Action involved an appeal pursuant to s56A of the Land & Environment Court Act 1979 against the decision of a Commissioner.

At [90] of *Initial Action* the Court held that:

“In any event, cl 4.6 does not give substantive effect to the objectives of the clause in cl 4.6(1)(a) or (b). There is no provision that requires compliance with the objectives of the clause. In particular, neither cl 4.6(3) nor (4) expressly or impliedly requires that development that contravenes a development standard “achieve better outcomes for and from development”. If objective (b) was the source of the Commissioner’s test that non-compliant development should achieve a better environmental planning outcome for the site relative to a compliant development, the Commissioner was mistaken. Clause 4.6 does not impose that test.”

The legal consequence of the decision in *Initial Action* is that clause 4.6(1) is not an operational provision and that the remaining clauses of clause 4.6 constitute the operational provisions.

Clause 4.6(2) of MLEP provides:

- (2) *Development consent may, subject to this clause, be granted for development even though the development would contravene a development standard imposed by this or any other environmental planning instrument. However, this clause does not apply to a development standard that is expressly excluded from the operation of this clause.*

This clause applies to the clause 4.3 Height of Buildings Development Standard. Clause 4.6(3) of MLEP provides:

- (3) *Development consent must not be granted for development that contravenes a development standard unless the consent authority has considered a written request from the applicant that seeks to justify the contravention of the development standard by demonstrating:*
 - (a) *that compliance with the development standard is unreasonable or unnecessary in the circumstances of the case, and*
 - (b) *that there are sufficient environmental planning grounds to justify contravening the development standard.*

The proposed development does not comply with the height of buildings provision at 4.3 of MLEP which specifies a maximum building height however strict compliance is considered to be unreasonable or unnecessary in the circumstances of this case and there are considered to be sufficient environmental planning grounds to justify contravening the development standard.

The relevant arguments are set out later in this written request.

Clause 4.6(4) of MLEP provides:

(4) *Development consent must not be granted for development that contravenes a development standard unless:*

(a) *the consent authority is satisfied that:*

(i) *the applicant's written request has adequately addressed the matters required to be demonstrated by subclause (3), and*

(ii) *the proposed development will be in the public interest because it is consistent with the objectives of the particular standard and the objectives for development within the zone in which the development is proposed to be carried out, and*

(b) *the concurrence of the Director-General has been obtained.*

In *Initial Action* the Court found that clause 4.6(4) required the satisfaction of two preconditions ([14] & [28]). The first precondition is found in clause 4.6(4)(a). That precondition requires the formation of two positive opinions of satisfaction by the consent authority. The first positive opinion of satisfaction (cl 4.6(4)(a)(i)) is that the applicant's written request has adequately addressed the matters required to be demonstrated by clause 4.6(3)(a)(i) (*Initial Action* at [25]).

The second positive opinion of satisfaction (cl 4.6(4)(a)(ii)) is that the proposed development will be in the public interest **because** it is consistent with the objectives of the development standard and the objectives for development of the zone in which the development is proposed to be carried out (*Initial Action* at [27]). The second precondition is found in clause 4.6(4)(b). The second precondition requires the consent authority to be satisfied that the concurrence of the Secretary (of the Department of Planning and the Environment) has been obtained (*Initial Action* at [28]).

Under cl 64 of the *Environmental Planning and Assessment Regulation* 2000, the Secretary has given written notice dated 5th May 2020, attached to the Planning Circular PS 18-003 issued on 5th May 2020, to each consent authority, that it may assume the Secretary's concurrence for exceptions to development standards in respect of applications made under cl 4.6, subject to the conditions in the table in the notice.

Clause 4.6(5) of MLEP provides:

(5) *In deciding whether to grant concurrence, the Director-General must consider:*

(a) *whether contravention of the development standard raises any matter of significance for State or regional environmental planning, and*

(b) *the public benefit of maintaining the development standard, and*

(c) *any other matters required to be taken into consideration by the Director-General before granting concurrence.*

As these proceedings are the subject of an appeal to the Land & Environment Court, the Court has the power under cl 4.6(2) to grant development consent for development that contravenes a development standard, if it is satisfied of the matters in cl 4.6(4)(a), without obtaining or assuming the concurrence of the Secretary under cl 4.6(4)(b), by reason of s 39(6) of the Court Act. Nevertheless, the Court should still consider the matters in cl 4.6(5) when exercising the power to grant development consent for development that contravenes a development standard: *Fast Buck\$ v Byron Shire Council* (1999) 103 LGERA 94 at 100; *Wehbe v Pittwater Council* at [41] (*Initial Action* at [29]).

Clause 4.6(6) relates to subdivision and is not relevant to the development. Clause 4.6(7) is administrative and requires the consent authority to keep a record of its assessment of the clause 4.6 variation. Clause 4.6(8) is only relevant so as to note that it does not exclude clause 4.3 of MLEP from the operation of clause 4.6.

3.0 Relevant Case Law

In *Initial Action* the Court summarised the legal requirements of clause 4.6 and confirmed the continuing relevance of previous case law at [13] to [29]. In particular the Court confirmed that the five common ways of establishing that compliance with a development standard might be unreasonable and unnecessary as identified in *Wehbe v Pittwater Council* (2007) 156 LGERA 446; [2007] NSWLEC 827 continue to apply as follows:

17. *The first and most commonly invoked way is to establish that compliance with the development standard is unreasonable or unnecessary because the objectives of the development standard are achieved notwithstanding non-compliance with the standard: Wehbe v Pittwater Council at [42] and [43].*
18. *A second way is to establish that the underlying objective or purpose is not relevant to the development with the consequence that compliance is unnecessary: Wehbe v Pittwater Council at [45].*
19. *A third way is to establish that the underlying objective or purpose would be defeated or thwarted if compliance was required with the consequence that compliance is unreasonable: Wehbe v Pittwater Council at [46].*
20. *A fourth way is to establish that the development standard has been virtually abandoned or destroyed by the Council's own decisions in granting development consents that depart from the standard and hence compliance with the standard is unnecessary and unreasonable: Wehbe v Pittwater Council at [47].*

21. *A fifth way is to establish that the zoning of the particular land on which the development is proposed to be carried out was unreasonable or inappropriate so that the development standard, which was appropriate for that zoning, was also unreasonable or unnecessary as it applied to that land and that compliance with the standard in the circumstances of the case would also be unreasonable or unnecessary: Wehbe v Pittwater Council at [48]. However, this fifth way of establishing that compliance with the development standard is unreasonable or unnecessary is limited, as explained in Wehbe v Pittwater Council at [49]-[51]. The power under cl 4.6 to dispense with compliance with the development standard is not a general planning power to determine the appropriateness of the development standard for the zoning or to effect general planning changes as an alternative to the strategic planning powers in Part 3 of the EPA Act.*
22. *These five ways are not exhaustive of the ways in which an applicant might demonstrate that compliance with a development standard is unreasonable or unnecessary; they are merely the most commonly invoked ways. An applicant does not need to establish all of the ways. It may be sufficient to establish only one way, although if more ways are applicable, an applicant can demonstrate that compliance is unreasonable or unnecessary in more than one way.*

The relevant steps identified in *Initial Action* (and the case law referred to in *Initial Action*) can be summarised as follows:

1. Is clause 4.3 of MLEP a development standard?
2. Is the consent authority satisfied that this written request adequately addresses the matters required by clause 4.6(3) by demonstrating that:
 - (a) compliance is unreasonable or unnecessary; and
 - (b) there are sufficient environmental planning grounds to justify contravening the development standard
3. Is the consent authority satisfied that the proposed development will be in the public interest because it is consistent with the objectives of clause 4.3 and the objectives for development for in the zone?
4. Has the concurrence of the Secretary of the Department of Planning and Environment been obtained?
5. Where the consent authority is the Court, has the Court considered the matters in clause 4.6(5) when exercising the power to grant development consent for the development that contravenes clause 4.3 of MLEP?

4.0 Request for variation

4.1 Is clause 4.3 of MLEP a development standard?

The definition of “development standard” at clause 1.4 of the EP&A Act includes a provision of an environmental planning instrument or the regulations in relation to the carrying out of development, being provisions by or under which requirements are specified or standards are fixed in respect of any aspect of that development, including, but without limiting the generality of the foregoing, requirements or standards in respect of:

- (c) *the character, location, siting, bulk, scale, shape, size, height, density, design or external appearance of a building or work,*

Clause 4.3 MLEP prescribes a height provision that seeks to control the height of certain development. Accordingly, clause 4.3 MLEP is a development standard.

4.2A Clause 4.6(3)(a) – Whether compliance with the development standard is unreasonable or unnecessary

The common approach for an applicant to demonstrate that compliance with a development standard is unreasonable or unnecessary are set out in *Wehbe v Pittwater Council* [2007] NSWLEC 827.

The first option, which has been adopted in this case, is to establish that compliance with the development standard is unreasonable and unnecessary because the objectives of the development standard are achieved notwithstanding non-compliance with the standard.

Consistency with objectives of the height of buildings standard

An assessment as to the consistency of the proposal when assessed against the objectives of the standard is as follows:

- (a) *to provide for building heights and roof forms that are consistent with the topographic landscape, prevailing building height and desired future streetscape character in the locality,*

Response: This objective relates to streetscape character and in this regard the existing dwelling house will continue to present as a 2 storey semi detached house with a basement and attic from Cliff Street with the proposed passenger lift located where it is hidden by vegetation and not readily discernible in a streetscape context. The height, bulk, scale of the development, as reflected by floor space, are entirely consistent with the built form characteristics established by the enclave of surrounding development in this precinct of Cliff St

The existing building is 1500 above the height control.

The proposed lift is 830 below the existing ridge and is a minor element in the streetscape of this enclave where respectively the three storey building to the west is 2150 above the proposed lift and the three storey flat building to the east 4500 above. The buildings directly across the road are three and four storey at the road alignment. As such the proposed works are insignificant in the context of this precinct.

Consistent with the conclusions reached by Senior Commissioner Roseth in the matter of *Project Venture Developments v Pittwater Council* (2005) NSW LEC 191 I have formed the considered opinion that most observers would not find the proposed development by virtue of its roof form and building height, and in particular the non-compliant building height elements, offensive, jarring or unsympathetic in a streetscape context nor having regard to the built form characteristics of development within the sites visual catchment.

The proposal is consistent with this objective notwithstanding the building height breaching elements proposed.

(b) *to control the bulk and scale of buildings,*

Response: For the reasons outlined in relation to objective (a) above, I have formed the considered opinion that the bulk and scale of the building is contextually appropriate within the precinct of buildings surrounding the proposed minor modifications

The proposal is consistent with this objective notwithstanding the building height breaching elements proposed.

(c) *to minimise disruption to the following:*

(i) *views to nearby residential development from public spaces (including the harbour and foreshores),*

Response: Having inspected the site and its surrounds I am of the opinion that the building form and height of the proposed lift modifications, in particular that associated with the building height breaching elements, has been appropriately located within the site to minimise disruption of views to nearby residential development from surrounding public spaces.

The proposal is consistent with this objective notwithstanding the building height breaching elements proposed.

(ii) *views from nearby residential development to public spaces (including the harbour and foreshores),*

Response: Having regard to the view sharing principles established by the Land and Environment Court of NSW in the matter of *Tenacity Consulting v Warringah* [2004] NSWLEC 140 as they relate to an assessment of view impacts, I am

satisfied that the proposed building height breaching elements will not give rise to any unacceptable public or private view affectation. Whilst the proposal seeks a variation to the building height standard, view impacts have been minimised and a view sharing outcome achieved.

The proposal is consistent with this objective notwithstanding the building height breaching elements proposed.

- (iii) *views between public spaces (including the harbour and foreshores),*

Response: The building form and height has been appropriately distributed across the site such that the proposed elements breaching the building height element will have no impact on views between public spaces.

The proposal is consistent with this objective notwithstanding the proposed building height breaching elements proposed.

- (d) *to provide solar access to public and private open spaces and maintain adequate sunlight access to private open spaces and to habitable rooms of adjacent dwellings,*

Response: The application is accompanied by shadow diagrams SH 01 + 02 which depict the impact of shadowing on the neighbouring properties. The shadow diagrams demonstrate that the proposed development, in particular the non-compliant building height elements, will not cast shadows on to the existing east facing living room windows and private open space areas of the immediately adjoining properties with compliant levels of solar access maintained between 9am and 3pm on 21st June.

The proposal is consistent with this objective notwithstanding the building height breaching elements proposed.

- (e) *to ensure the height and bulk of any proposed building or structure in a recreation or environmental protection zone has regard to existing vegetation and topography and any other aspect that might conflict with bushland and surrounding land uses.*

Response: This objective is not applicable.

Having regard to the above, the non-compliant component of the building will achieve the objectives of the standard to at least an equal degree as would be the case with a development that complied with the building height standard. Given the developments consistency with the objectives of the height of buildings standard strict compliance has been found to be both unreasonable and unnecessary under the circumstances.

Consistency with zone objectives

The subject site is zoned R1 General Residential pursuant to MLEP 2013 with semi-detached dwellings permissible in the zone with consent. The stated objectives of the zone are as follows:

- *To provide for the housing needs of the community.*

Response: The application proposes the installation of passenger lift as an ancillary component of the existing semi detached dwelling house. The FSR non-compliance will maintain the existing residential environment with the dwelling better meeting the housing needs of the community in relation to accessibility. This objective is achieved notwithstanding the Height of Buildings non-compliance proposed

- *To provide for a variety of housing types and densities.*

Response: The proposal maintains the established single dwelling residential use on the site consistent with this objective.

- *To enable other land uses that provide facilities or services to meet the day to day needs of residents.*

Response: N/A

The proposed works are permissible and consistent with the stated objectives of the zone.

The non-compliant component of the development, as it relates to building height, demonstrates consistency with objectives of the R1 General Residential zone and the height of building standard objectives. Adopting the first option in *Wehbe* strict compliance with the height of buildings standard has been demonstrated to be is unreasonable and unnecessary.

4.2B Clause 4.6(4)(b) – Are there sufficient environmental planning grounds to justify contravening the development standard?

In Initial Action the Court found at [23]-[24] that:

23. *As to the second matter required by cl 4.6(3)(b), the grounds relied on by the applicant in the written request under cl 4.6 must be “environmental planning grounds” by their nature: see Four2Five Pty Ltd v Ashfield Council [2015] NSWLEC 90 at [26]. The adjectival phrase “environmental planning” is not defined, but would refer to grounds that relate to the subject matter, scope and purpose of the EPA Act, including the objects in s 1.3 of the EPA Act.*
24. *The environmental planning grounds relied on in the written request under cl 4.6 must be “sufficient”. There are two respects in which the written request needs to be “sufficient”. First, the environmental planning grounds advanced in the written request must be sufficient “to justify contravening the development standard”. The focus of cl 4.6(3)(b) is on the aspect or*

element of the development that contravenes the development standard, not on the development as a whole, and why that contravention is justified on environmental planning grounds.

*The environmental planning grounds advanced in the written request must justify the contravention of the development standard, not simply promote the benefits of carrying out the development as a whole: see *Four2Five Pty Ltd v Ashfield Council* [2015] NSWCA 248 at [15]. Second, the written request must demonstrate that there are sufficient environmental planning grounds to justify contravening the development standard so as to enable the consent authority to be satisfied under cl 4.6(4)(a)(i) that the written request has adequately addressed this matter: see *Four2Five Pty Ltd v Ashfield Council* [2015] NSWLEC 90 at [31].*

Sufficient environmental planning grounds exist to justify the height of buildings variation. I have formed the considered opinion that sufficient environmental planning grounds exist to justify the variation including the compatibility of the height, bulk and scale of the development, as reflected by floor space, with the built form characteristics established by adjoining development and development generally within the site's visual catchment and the fact that the additional non-compliant height of buildings is generally located below

I consider the proposal to be of a skilful design which responds appropriately and effectively to the situation of the existing building on the land by appropriately distributing floor space, building mass and building height in the new works across the site in a manner which provides for appropriate streetscape and residential amenity outcomes.

The proposed development achieves the objects in Section 1.3 of the EPA Act, specifically:

- The proposal promotes the orderly and economic use and development of land (1.3(c)).
- The development represents good design (1.3(g)).

It is noted that in *Initial Action*, the Court clarified what items a Clause 4.6 does and does not need to satisfy. Importantly, there does not need to be a "better" planning outcome:

87. *The second matter was in cl 4.6(3)(b). I find that the Commissioner applied the wrong test in considering this matter by requiring that the development, which contravened the height development standard, result in a "better environmental planning outcome for the site" relative to a development that complies with the height development standard (in [141] and [142] of the judgment). Clause 4.6 does not directly or indirectly establish this test. The*

requirement in cl 4.6(3)(b) is that there are sufficient environmental planning grounds to justify contravening the development standard, not that the development that contravenes the development standard have a better environmental planning outcome than a development that complies with the development standard.

There are sufficient environmental planning grounds to justify contravening the development standard.

4.3 Clause 4.6(a)(iii) – Is the proposed development in the public interest because it is consistent with the objectives of clause 4.3 and the objectives of the R1 General Residential zone

The consent authority needs to be satisfied that the proposed development will be in the public interest if the standard is varied because it is consistent with the objectives of the standard and the objectives of the zone.

Preston CJ in Initial Action (Para 27) described the relevant test for this as follows:

“The matter in cl 4.6(4)(a)(ii), with which the consent authority or the Court on appeal must be satisfied, is not merely that the proposed development will be in the public interest but that it will be in the public interest because it is consistent with the objectives of the development standard and the objectives for development of the zone in which the development is proposed to be carried out. It is the proposed development’s consistency with the objectives of the development standard and the objectives of the zone that make the proposed development in the public interest. If the proposed development is inconsistent with either the objectives of the development standard or the objectives of the zone or both, the consent authority, or the Court on appeal, cannot be satisfied that the development will be in the public interest for the purposes of cl 4.6(4)(a)(ii).”

As demonstrated in this request, the proposed development it is consistent with the objectives of the development standard and the objectives for development of the zone in which the development is proposed to be carried out.

Accordingly, the consent authority can be satisfied that the proposed development will be in the public interest if the standard is varied because it is consistent with the objectives of the standard and the objectives of the zone.

4.4 Secretary’s concurrence

By Planning Circular dated 5th May 2021, the Secretary of the Department of Planning & Environment advised that consent authorities can assume the concurrence to clause 4.6 request except in the circumstances set out below:

- Lot size standards for rural dwellings;
- Variations exceeding 10%; and
- Variations to non-numerical development standards.

The circular also provides that concurrence can be assumed when an LPP is the consent authority where a variation exceeds 10% or is to a non-numerical standard, because of the greater scrutiny that the LPP process and determinations are subject to, compared with decisions made under delegation by Council staff.

Concurrence of the Secretary can therefore be assumed in this case.

5.0 Conclusion

Pursuant to clause 4.6(4)(a), the consent authority is satisfied that the applicant's written request has adequately addressed the matters required to be demonstrated by subclause (3) being:

- (a) *that compliance with the development standard is unreasonable or unnecessary in the circumstances of the case, and*
- (b) *that there are sufficient environmental planning grounds to justify contravening the development standard.*

As such, I have formed the considered opinion that there is no statutory or environmental planning impediment to the granting of a height of buildings variation in this instance.
