RE: DA2024/1297 - 3 - 5 Pittwater Road MANLY NSW 2095

As the owners of Lot 2/48 Raglan street , manly , our concerns for the expansion of the gymnasium are that currently the noise from the 'functional training -area' reverberates directly into our apartment . This includes the music left on constantly after 10pm and sometimes all night .

There needs to be some sound proofing installed along the back wall adjacent to the apartment building No 48 Raglan street , to prevent the transference of the noise of balls being thrown against the wall , weights being dropped etc either late in the evening or early morning . Perhaps moving the functional training area towards to front of the building could be a solution . There also needs to be control of the music level at the rear of the gymnasium to prevent all of the apartments being subjected to listening to it . The expansion of the gymnasium will increase members , which would also increase the noise levels .

Kind Regards
Donna Jackson
