RE: DA2019/1340 - 100 / 0 Meatworks Avenue OXFORD FALLS NSW 2100

I'm surprised with the ever worsening threat of bushfire additional units are being contemplated where there is only one road in or out. The access is poor and the road and area can not afford to have more construction and through traffic added to it. It is already dangerous for horses and pedestrians as it is. As Oxford Falls is not zoned industrial I cannot see how additional business units and parking can even be considered as appropriate. There is also endangered species living in the area so there will be an adverse impact on local flora and fauna And the council should be looking to preserve the bush not decimate it.
