1. Introduction and Background Information

1.1 Introduction

This report has been prepared as supporting documentation for a Development Application for the proposed demolition works and erection of a dual occupancy (attached), swimming pool, associated works and strata subdivision (proposed Lot 101 as approved under DA2021/1469), being 25 Loch Street, Freshwater, currently identified as Lot 10 within Deposited Plan 1257419 (proposed Lot 101 as approved under DA2021/1469 yet to be registered).

This report has been prepared following instructions from the client Darren Holland. In preparing this application consideration has been given to the following:

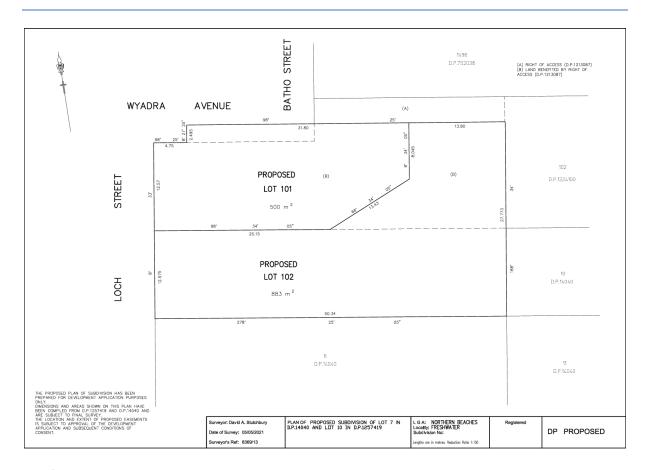

- Environmental Planning and Assessment Act, 1979 (as amended) (EP&A Act);
- Environmental Planning and Assessment Regulation 2021;
- Relevant State Environmental Planning Policies;
- Warringah Local Environmental Plan 2011 (WLEP 2011);
- Warringah Development Control Plan (WDCP);
- Survey Plan prepared by Stutchbury Jaques Pty Ltd;
- Draft Strata Plan prepared by Stutchbury Jaques Pty Ltd;
- Architectural Plans prepared by Action Plans Pty Ltd;
- Geotechnical Report prepared by Australian GeoEnviro Pty Ltd;
- Landscape Plan prepared by ATC A Total Concept Landscape Architects;
- BASIX and NatHERS prepared by Chapman Environmental Services Pty Ltd;
- Stormwater Management Plan prepared by Vanguard Consulting Engineers;
- Estimated Development Cost Report prepared by QS Project Manager Pty Ltd;
- Waste Management Plan.

This Statement of Environmental Effects describes the proposed development having particular regard to the provisions of Section 4.15 of the EP&A Act 1979 and examines any potential environmental impacts with regard to the relevant sections of the Act, State policies and requirements of Northern Beaches Council's WDCP.

The conclusions of the Statement of Environmental Effects are that the proposed development, being demolition works and erection of a dual occupancy (attached), swimming pool, associated works and strata subdivision – relating to proposed Lot 101 at 25 Loch Street, Freshwater, is permissible with development consent and is consistent with the relevant statutory planning instruments including Warringah Local Environmental Plan 2011 and relevant planning policies of Warringah Development Control Plan. Accordingly, the Development Application succeeds on its merits and should be approved by Council, as submitted.

1.2 Background Information

The subject site consists of two (2) allotments which are yet to be registered with the NSW Land Registry Services (Land Titles Office), being Lots 101 and 102 as approved under DA2021/1469. The plan of proposed subdivision of Lot 7 within Deposited Plan 14040, and Lot 10 within Deposited Plan 1257419 (being nos. 23 and 25 Loch Street respectively) as approved under DA2021/1469 is provided below.

The following table outlines all subsequent applications which included works exclusively to Lot 102, being 23 Loch Street.

Application Number	Application Type	Determination Date	Details
DA2021/1469	Development Application	Approved 23/03/2022	Demolition works and subdivision (boundary adjustment) maintaining (2) lots and the construction of a new dwelling house, spa pools and associated landscaping works within Lot 102
Mod2022/0574	S4.55(2) Modification Application	Withdrawn 24/11/2022	S4.55(2) modification to DA2021/1469
Mod2023/0036	S4.55(1a) Modification Application	Approved 22/03/2023	S4.55(1a) modification to DA2021/1469
DA2023/0185	Development Application	Approved 10/08/2023	Demolition work and alterations and additions to a dwelling house including a swimming pool

Mod2024/0267	S4.55(2) Modification Application	Approved 21/08/2024	S4.55(2) modification to DA2021/1469
Mod2024/0268	S4.55(2) Modification Application	Approved 20/09/2024	S4.55(2) modification to DA2023/0185
Mod2024/0409	S4.55(2) Modification Application	Deferred Commencement 15/08/2024	S4.55(1a) modification to DA2023/0185

The subject application is for demolition works and erection of a dual occupancy (attached), swimming pool, associated works and strata subdivision on Lot 101, being 25 Loch Street, Freshwater. The proposal has not been the subject of a pre-lodgement meeting with Northern Beaches Council.

2. Site Profile

2.1 Property Description

The subject allotment is currently identified as 25 Loch Street, Freshwater, being Lot 10 within Deposited Plan 1257419 (proposed Lot 101 as approved under DA2021/1469 yet to be registered). The site is zoned R2 Low Density Residential under Warringah Local Environmental Plan 2011.

The site is not listed as a heritage item, nor is it located within a heritage conservation area. The subject site is in close proximity to heritage item 'I128' relating to "Stewart House" – no. 45 Carrington Parade, being Lot 1496 within Deposited Plan 752038.

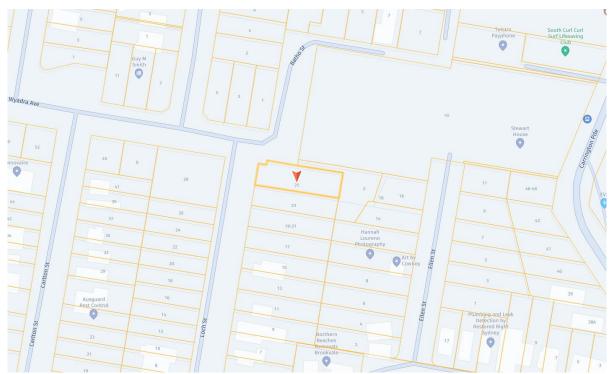

2.2 Site and Locality Description

The subject site is located on the eastern side of Loch Street, near the intersection of Wyadra Avenue and Batho Street. The allotment (as approved under DA2021/1469) is irregular in shape with a fragmented western frontage totalling 15.085m to Loch Street, a fragmented northern side boundary totalling 36.55m, a splayed southern side boundary totalling 38.585, and a rear eastern boundary of 8.045m. The site (proposed Lot 101) has a total area of 500.3sqm. The land has a 3m slope from the front to the rear half of the site. The site is currently occupied by a single storey brick dwelling house with a tiled roof. The site has existing vehicular access to Loch Street at the northern end of the street frontage. The locality comprises a mix of residential land uses ranging in bulk and scale from single (1) to three (3) storeys.

The locality maps below show the location and area of the site:

3. Proposal

The proposed development is for demolition works and erection of a dual occupancy (attached), swimming pool, associated works and strata subdivision at proposed Lot 101 as approved under DA2021/1469, being 25 Loch Street, Freshwater, currently identified as Lot 10 within Deposited Plan 1257419 (proposed Lot 101 as approved under DA2021/1469 yet to be registered). The proposal remains consistent with the locality and with relevant Council controls and ensures privacy and solar access are maintained for surrounding properties and the site.

Demolition Works

Demolition works as depicted on architectural plans prepared by Action Plans Pty Ltd.

New Dual Occupancy (attached)

Proposed Works – Lots A and B

Lower Ground Floor – Drawing DA05

- Open kitchen, living and dining
- WC
- Stairs

Ground Floor – Drawing DA06

- Garage
- Entry
- Stairs
- Laundry
- Bathroom
- Bedroom 1
- Bedroom 2

First Floor – Drawing DA07

- Stairs
- Bedroom 3 with ensuite
- Master bed with WIR and ensuite

External

- New shared central driveway and crossover to Loch Street
- New front boundary fence with pedestrian and vehicle gates
- East-facing lower ground floor terraces with BBQ areas
- East-facing first floor balcony with planter box to Lot 2
- North and east facing wrap-around first floor balcony with planter box to Lot 1
- First floor planter box to front building façade
- Shared levelled rear lawn
- Shared swimming pool
- Associated plantings, landscape treatments and paving

Landscape Works

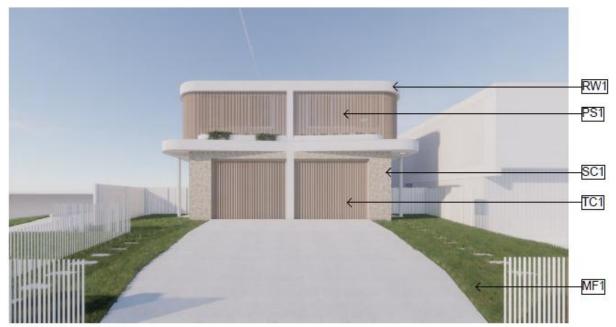

Refer to landscape plans prepared by ATC – A Total Concept Landscape Architects.

^{*}Refer to architectural plans prepared by Action Plans Pty Ltd for a full description of all works.

Strata Subdivision

Refer to Draft Strata Plan prepared by Stutchbury Jaques Pty Ltd.

4. Statutory Planning Controls

The proposal has been assessed in accordance with the following instruments and controls:

- Environmental Planning and Assessment Act 1979, and Environmental Planning and Assessment Regulation 2021;
- State Environmental Planning Policies;
- Warringah Local Environmental Plan 2011; and
- Warringah Development Control Plan.

4.1 Environmental Planning and Assessment Act 1979 (EP&A Act 1979) and Environmental Planning and Assessment Regulation 2021 (EP&A Regulation 2021)

The EP&A Act 1979 governs all environmental planning instruments within New South Wales. The proposal has been reviewed pursuant to the matters for consideration within Section 4.15 of the EP&A Act 1979.

The proposal is not Designated Development under Section 4.10 of the EP& A Act 1979 or Schedule 3 of the EPA Assessment Regulation 2021, therefore Northern Beaches Council is the Consent Authority. In addition, the proposal does not constitute an Integrated Development under the EP&A Act 1979, Section 4.46 with no further approvals from other Government agencies required.

4.2 State Environmental Planning Policies (SEPPs)

SEPP (Transport and Infrastructure) 2021

It is submitted that the proposal complies with the relevant provisions of SEPP (Transport and Infrastructure) 2021 and therefore no further assessment is required.

SEPP (Sustainable Buildings) 2022

The proposal has been assessed in accordance with the relevant provisions of the BASIX and Energy Efficiency. A BASIX and NatHERS Certificate and assessment has been prepared by Chapman Environmental Services and outlines the proposal's compliance with the provisions of BASIX and Energy Efficiency.

SEPP (Resilience and Hazards) 2021

Chapter 4 of the SEPP (Resilience and Hazards) 2021 requires the consent authority to consider whether land is contaminated prior to granting of consent to the carrying out of any development on that land.

- 4.6 Contamination and remediation to be considered in determining development application
- (1) A consent authority must not consent to the carrying out of any development on land unless—
 - (a) it has considered whether the land is contaminated, and
 - (b) if the land is contaminated, it is satisfied that the land is suitable in its contaminated state (or will be suitable, after remediation) for the purpose for which the development is proposed to be carried out, and

- (c) if the land requires remediation to be made suitable for the purpose for which the development is proposed to be carried out, it is satisfied that the land will be remediated before the land is used for that purpose.
- (2) Before determining an application for consent to carry out development that would involve a change of use on any of the land specified in subsection (4), the consent authority must consider a report specifying the findings of a preliminary investigation of the land concerned carried out in accordance with the contaminated land planning guidelines.
- (3) The applicant for development consent must carry out the investigation required by subsection (2) and must provide a report on it to the consent authority. The consent authority may require the applicant to carry out, and provide a report on, a detailed investigation (as referred to in the contaminated land planning guidelines) if it considers that the findings of the preliminary investigation warrant such an investigation.
- (4) The land concerned is—
 - (a) land that is within an investigation area,
 - (b) land on which development for a purpose referred to in Table 1 to the contaminated land planning guidelines is being, or is known to have been, carried out,
 - (c) to the extent to which it is proposed to carry out development on it for residential, educational, recreational or child care purposes, or for the purposes of a hospital—land—
 - (i) in relation to which there is no knowledge (or incomplete knowledge) as to whether development for a purpose referred to in Table 1 to the contaminated land planning guidelines has been carried out, and
 - (ii) on which it would have been lawful to carry out such development during any period in respect of which there is no knowledge (or incomplete knowledge).

It is submitted that the site has been used as residential accommodation for decades. The builder/contractors should take all measures to ensure if contamination is found during construction that relevant procedures are followed to report and remove contaminated materials. A site inspection was undertaken with no evidence of landfill on the site. It is our professional opinion that no further studies are required with this application.

SEPP (Biodiversity and Conservation) 2021

State Environmental Planning Policy (Biodiversity and Conservation) 2021 relates to various rescinded SEPPS that related to the preservation of trees and vegetation, koala habitat and bushland in urban areas.

The aims of this Policy are to protect the biodiversity values of trees and other vegetation, and to preserve the amenity of non-rural areas of the State through the preservation of trees and other vegetation.

The proposal includes the removal of two (2) trees which do not require a permit as they are either on the exempt species list in the Northern Beaches LGA, are located within 2m of the existing building or are under 5m in height. The proposal includes the planting of two new natives in the front yard. The proposal has been designed with regards to mitigate, minimise and avoid. The proposal meets the relevant provisions of the SEPP.

SEPP (Housing) 2021

Chapter 6 Low and mid rise housing 164 Land to which chapter applies

(1) This chapter applies to the whole of the State, other than the following—
(a) bush fire prone land,

- (b) land identified as a coastal vulnerability area or a coastal wetlands and littoral rainforests area within the meaning of <u>State Environmental Planning Policy (Resilience and Hazards)</u> 2021, Chapter 2,
- (c) land to which Chapter 5 applies,
- (d) land that is a heritage item or on which a heritage item is located,
- (e) the following local government areas—
 - (i) Bathurst Regional,
 - (ii) City of Blue Mountains,
 - (iii) City of Hawkesbury,
 - (iv) Wollondilly,
- (f) flood prone land in the Georges River Catchment and Hawkesbury-Nepean Catchment under <u>State Environmental Planning Policy (Biodiversity and Conservation)</u> 2021, Chapter 6,
- (g) land in a flood planning area in the following local government areas—
 - (i) Armidale Regional,
 - (ii) Ballina,
 - (iii) Bellingen,
 - (iv) Byron,
 - (v) City of Cessnock,
 - (vi) Clarence Valley,
 - (vii) City of Coffs Harbour,
 - (viii) Dungog,
 - (ix) Goulburn Mulwaree,
 - (x) Kempsey,
 - (xi) Kyogle,
 - (xii) City of Lismore,
 - (xiii) City of Maitland,
 - (xiv) Nambucca Valley,
 - (xv) City of Newcastle,
 - (xvi) Port Stephens,
 - (xvii) Queanbeyan-Palerang Regional,
 - (xviii) Richmond Valley,
 - (xix) City of Shoalhaven,
 - (xx) Singleton,
 - (xxi) Tweed,
 - (xxii) Upper Hunter Shire,
 - (xxiii) Walcha,
- (h) land in an ANEF contour or ANEC contour of 20 or greater,
- (i) land within 200m of a relevant pipeline within the meaning of <u>State Environmental</u> <u>Planning Policy (Transport and Infrastructure) 2021</u>, section 2.77,
- (j) land identified as "Deferred Transport Oriented Development Areas" on the <u>Deferred</u> Transport Oriented Development Areas Map,
- (k) land within 800m of a public entrance to a railway, metro or light rail station listed in Schedule 12.
- (2) This chapter does not apply to land identified as an "Accelerated TOD Precinct" on the <u>Accelerated Transport Oriented Development Precincts Rezoning Areas Map</u>.
- (3) In this section—

ANEC contour has the same meaning as in <u>State Environmental Planning Policy (Precincts—Western Parkland City) 2021</u>, section 4.17.

ANEF contour has the same meaning as in <u>State Environmental Planning Policy (Exempt and Complying Development Codes) 2008.</u>

flood planning area has the same meaning as in the Flood Risk Management Manual.

Cl164 confirms that the chapter applies to "the whole of the State" unless specified under cl164. The site does not fall under any of the sub-clauses of cl164 and therefore a dual occupancy is permissible on the site.

Part 2 Dual occupancies and semi-detached dwellings Division 1 Preliminary

166 Development permitted with development consent

Development for the purposes of dual occupancies or semi-detached dwellings is permitted with development consent on land to which this chapter applies in Zone R2 Low Density Residential.

The site is located within the R2 Low Density Residential under WLEP2011. The site is not listed or impacted as land under Clause 164. On the basis of the above, the Housing SEPP overrides WLEP2011 and permits development consent of the land for a dual occupancy (attached).

4.3 Warringah Local Environmental Plan 2011 (WLEP2011)

The relevant matters to be considered under WLEP2011 are outlined below in the LEP summary compliance table.

Part 1: Preliminary				
Standard	Control	Comments		
1.2 Aims of Plan	(d) in relation to residential development, to— (i) protect and enhance the residential use and amenity of existing residential environments, and (ii) promote development that is compatible with neighbouring development in terms of bulk, scale and appearance, and (iii) increase the availability and variety of dwellings to enable population growth without having adverse effects on the character and amenity of Warringah, (f) in relation to environmental quality, to— (i) achieve development outcomes of quality urban design, and (ii) encourage development that demonstrates efficient and sustainable use of energy and resources, and (iii) achieve land use relationships that promote the efficient use of infrastructure, and (iv) ensure that development does not have an adverse effect on streetscapes and vistas, public places, areas visible from navigable waters or the natural environment, and (v) protect, conserve and manage biodiversity and the natural environment, and (vi) manage environmental constraints to development including acid sulfate soils, land slip risk, flood and tidal inundation, coastal erosion and biodiversity,	Complies – the proposal relates to demolition works and erection of a dual occupancy (attached), swimming pool, associated works and strata subdivision. The development is compatible with the residential development in the immediate area and is consistent with the bulk and scale of development in the locality. The proposal is consistent with the character of the area and will enhance the environmental qualities of the site. The proposal meets the aims of WLEP2011.		

Part 4: Principal Development Standards			
Standard	Permitted	Proposed	Comments
4.1 Minimum subdivision lot size	450sqm	N/A	N/A – no change to existing lot size.
4.1AA Minimum subdivision lot size for community title schemes	N/A	N/A	N/A

4.2 Rural subdivision	N/A	N/A	N/A
4.2A Minimum	N/A	N/A	N/A

Schedule 4 – Classification and reclassification	N/A	
of public land		
Schedule 5 – Environmental heritage	N/A	
Schedule 6 – Pond-based and tank-based	N/A	
aquaculture		

2.6 Subdivision—consent requirements

(1) Land to which this Plan applies may be subdivided, but only with development consent. **Notes—1**

If a subdivision is specified as **exempt development** in an applicable environmental planning instrument, such as this Plan or <u>State Environmental Planning Policy (Exempt and Complying Development Codes) 2008</u>, the Act enables it to be carried out without development consent. **2** Part 6 of <u>State Environmental Planning Policy (Exempt and Complying Development Codes) 2008</u> provides that the strata subdivision of a building in certain circumstances is **complying development**.

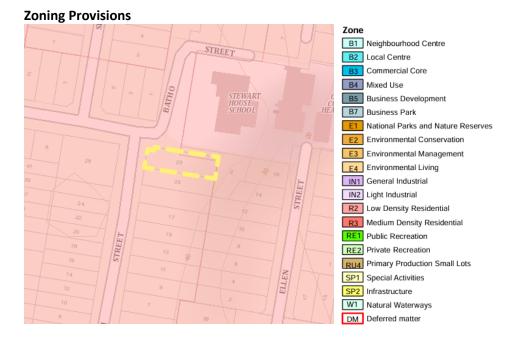

(2) Development consent must not be granted for the subdivision of land on which a secondary dwelling is situated if the subdivision would result in the principal dwelling and the secondary dwelling being situated on separate lots, unless the resulting lots are not less than the minimum size shown on the <u>Lot Size Map</u> in relation to that land.

Note-

The definition of **secondary dwelling** in the Dictionary requires the dwelling to be on the same lot of land as the principal dwelling.

Comment:

The proposal includes the strata subdivision of the proposed dual occupancy (attached). Refer to Draft Strata Plan prepared by Stutchbury Jaques Pty Ltd.

Zone R2 Low Density Residential

1 Objectives of zone

- To provide for the housing needs of the community within a low density residential environment.
- To enable other land uses that provide facilities or services to meet the day to day needs of residents.
- To ensure that low density residential environments are characterised by landscaped settings that are in harmony with the natural environment of Warringah.

2 Permitted without consent

Home-based child care; Home occupations

3 Permitted with consent

Bed and breakfast accommodation; Boarding houses; Boat sheds; Building identification signs; Business identification signs; Centre-based child care facilities; Community facilities; Dwelling houses; Educational establishments; Emergency services facilities; Environmental protection works; Exhibition homes; Group homes; Health consulting rooms; Home businesses; Hospitals; Oyster aquaculture; Places of public worship; Pond-based aquaculture; Recreation areas; Respite day care centres; Roads; Secondary dwellings; Tank-based aquaculture; Veterinary hospitals

4 Prohibited

Any development not specified in item 2 or 3

Comment:

The site is zoned R2 Low Density Residential. Under the WLEP2011 R2 Low Density Residential zone, a dual occupancy (attached) is a prohibited land use. The State Environmental Planning Policy (Housing) 2021, overrides Councils LEP, therefore permitting a dual occupancy (attached) as a permissible land use with Council's consent. The proposal meets the objectives of the R2 zone as outlined below:

• To provide for the housing needs of the community within a low density residential environment.

The proposal provides a new dual occupancy (attached) that meets the needs of the community within the low-density environment of Freshwater. The streetscape assessment proves that the site will fit within the streetscape of Loch Street noting the bulk and scale at present ranging from single (1) to three (3) storeys in height. A dual occupancy is a low density form of residential development, with this application complying with landscape controls to ensure the amenity and landscape setting of the area is maintained. This objective is met.

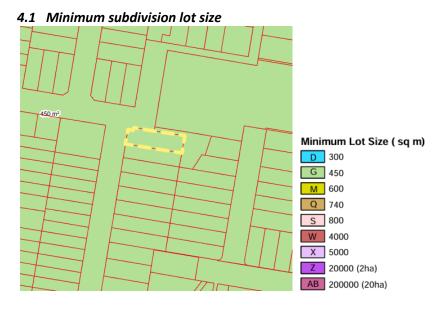

• To enable other land uses that provide facilities or services to meet the day to day needs of residents.

Not applicable – the proposal is for a new dual occupancy (attached).

• To ensure that low density residential environments are characterised by landscaped settings that are in harmony with the natural environment of Warringah.

The proposal is supported by a landscape plan prepared by ATC Landscape Architects that reinvigorates the site with new plantings to ensure the dwellings are characterized by a high quality landscaped setting. The proposal complies with the minimum landscape area requirements and therefore meets this objective.

Part 4 Principal development standards

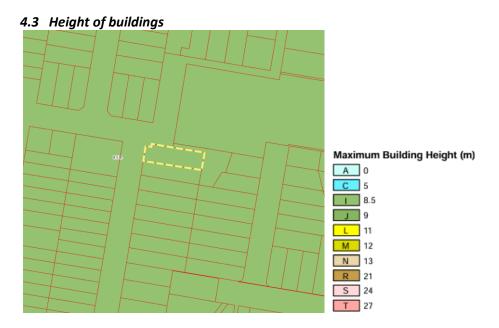

(1) The objectives of this clause are as follows—

- (a) to protect residential character by providing for the subdivision of land that results in lots that are consistent with the pattern, size and configuration of existing lots in the locality,
- (b) to promote a subdivision pattern that results in lots that are suitable for commercial and industrial development,
- (c) to protect the integrity of land holding patterns in rural localities against fragmentation,
- (d) to achieve low intensity of land use in localities of environmental significance,
- (e) to provide for appropriate bush fire protection measures on land that has an interface to bushland,
- (f) to protect and enhance existing remnant bushland,
- (g) to retain and protect existing significant natural landscape features,
- (h) to manage biodiversity,

- (i) to provide for appropriate stormwater management and sewer infrastructure.
- (2) This clause applies to a subdivision of any land shown on the <u>Lot Size Map</u> that requires development consent and that is carried out after the commencement of this Plan.
- (3) The size of any lot resulting from a subdivision of land to which this clause applies is not to be less than the minimum size shown on the Lot Size Map in relation to that land.
- (3A) For the purposes of subclause (3), in calculating the size of a lot the area of any access corridor (including any right of carriageway, access way or other area that provides for vehicle access) is to be excluded, whether the access corridor is to be created or is in existence at the time of the application for development consent for the subdivision.
- (4) This clause does not apply in relation to the subdivision of any land—
 - (a) by the registration of a strata plan or strata plan of subdivision under the <u>Strata Schemes</u> <u>Development Act 2015</u>, or
 - (b) by any kind of subdivision under the Community Land Development Act 1989.

Comment:

Not applicable – the site has a minimum lot size of 450sqm. The proposal does not include Torrens title subdivision works; therefore Clause 4.1 is not applicable.

- (1) The objectives of this clause are as follows—
 - (a) to ensure that buildings are compatible with the height and scale of surrounding and nearby development,
 - (b) to minimise visual impact, disruption of views, loss of privacy and loss of solar access,
 - (c) to minimise any adverse impact of development on the scenic quality of Warringah's coastal and bush environments,
 - (d) to manage the visual impact of development when viewed from public places such as parks and reserves, roads and community facilities.
- (2) The height of a building on any land is not to exceed the maximum height shown for the land on the <u>Height of Buildings Map</u>.
- (2A) If the <u>Height of Buildings Map</u> specifies, in relation to any land shown on that map, a Reduced Level for any building on that land, any such building is not to exceed the specified Reduced Level.

Comment:

Complies – the site has a maximum building height provision of 8.5m. The proposal provides a maximum building height of 8.45m, which is under the maximum building height allowance for the site. The proposal has been designed below the maximum building height to preserve amenity to neighbouring developments. As the proposal complies with the maximum building height control, it is our professional opinion that the objectives are met with the proposal consistent with the streetscape and built form of Loch Street.

4.4 Floor space ratio

Comment:

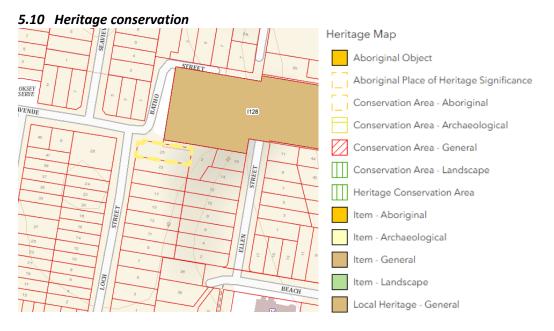

Not applicable.

4.6 Exceptions to development standards

Comment

Not applicable – the proposal does not contravene any development standard and therefore the proponent does not provide a written request to vary a development standard imposed by this or any other environmental planning instrument. Clause 4.6 is not applicable to this Development Application.

Part 5 Miscellaneous provisions

Comment:

Not applicable – the site is not identified as a heritage item nor is it located within a conservation area. The subject site is in close proximity to heritage item 'I128' relating to "Stewart House" – no. 45 Carrington Parade, being Lot 1496 within Deposited Plan 752038. It is submitted that the proposal will not impact or detract from the heritage values of the nearby item. This is consistent with the recent approvals granted at 23 Loch Street and also 2 Wyadra Avenue. No further assessment is required.

5.21 Flood planning

Comment:

Not applicable – the subject site is not identified within Council's Flood Hazard Map.

Part 6 Additional local provisions

6.1 Acid sulfate soils

Comment:

Not applicable – the site is not identified within the acid sulfate soils map.

6.2 Earthworks

- (1) The objectives of this clause are as follows—
 - (a) to ensure that earthworks for which development consent is required will not have a detrimental impact on environmental functions and processes, neighbouring uses, cultural or heritage items or features of the surrounding land,
 - (b) to allow earthworks of a minor nature without requiring separate development consent.
- (2) Development consent is required for earthworks unless—
 - (a) the work is exempt development under this Plan or another applicable environmental planning instrument, or
 - (b) the work is ancillary to other development for which development consent has been given.
- (3) Before granting development consent for earthworks, the consent authority must consider the following matters—
 - (a) the likely disruption of, or any detrimental effect on, existing drainage patterns and soil stability in the locality,
 - (b) the effect of the proposed development on the likely future use or redevelopment of the land,
 - (c) the quality of the fill or the soil to be excavated, or both,
 - (d) the effect of the proposed development on the existing and likely amenity of adjoining properties,
 - (e) the source of any fill material and the destination of any excavated material,
 - (f) the likelihood of disturbing relics,
 - (g) the proximity to and potential for adverse impacts on any watercourse, drinking water catchment or environmentally sensitive area.

Note. The <u>National Parks and Wildlife Act 1974</u>, particularly section 86, deals with disturbing or excavating land and Aboriginal objects.

Comment:

Complies – the proposal requires minor to moderate excavation works of the site. The development application is supported by a geotechnical assessment prepared by Australian GeoEnviro Pty Ltd. The proposed earthworks comply with the objectives of Clause 6.2 and they are consistent with other approvals granted in the Freshwater area.

- (1) The objectives of this clause are as follows—
 - (a) to avoid significant adverse impacts on development and on properties in the vicinity of development sites resulting from landslides originating either on or near sloping land,
 - (b) to ensure the impacts of storm water runoff from development on or near sloping land are minimised so as to not adversely affect the stability of the subject and surrounding land,
 - (c) to ensure subsurface flows are not adversely affected by development so as to not impact on the stability of existing or adjoining land.
- (2) This clause applies to land shown as Area A, Area B, Area C, Area D and Area E on the <u>Landslip</u> Risk Map.
- (3) Development consent must not be granted to development on land to which this clause applies unless the consent authority is satisfied that—
 - (a) the application for development has been assessed for the risk associated with landslides in relation to both property and life, and
 - (b) the development will not cause significant detrimental impacts because of stormwater discharge from the development site, and
 - (c) the development will not impact on or affect the existing subsurface flow conditions.

Comment:

The site is located within Area B of the Landslip Risk map. The development application is supported by a geotechnical assessment. Refer to the Geotechnical Assessment report prepared by Australian GeoEnviro Pty Ltd for full assessment of the proposed development.

General

The site is not identified on the following maps within WLEP2011:

- Bushfire Map
- Land Reservation Acquisition Map
- Heritage Map
- Coastline Hazard Map
- Key Sites Map
- Additional Permitted Uses Map
- Land Reclassification (Part Lots) Map
- Floor Space Ratio Map
- Centres Map
- Acid Sulfate Soils Map

4.4 Warringah Development Control Plan (WDCP)

In designing the proposed changes to the built form, due consideration has been given to the respective sections and objectives of WDCP, in particular:

- Part B Built Form Controls
- Part C Siting Factors
- Part D Design
- Part E Natural Environment

Key components of the DCP have been detailed below. The proposal is compliant with relevant provisions of the WDCP.

Warringah Development Control Plan		
	Requirement	Proposed
Wall Height	7.2m	Complies on merit.
Side	5m then 45 degrees from a height above	Complies.
Boundary	ground level (existing) at the side boundaries	
Envelope	C. F	Complian on monit
Front Setback	6.5m	Complies on merit.
SetBuck		
Side	1m on one side and 2.5m on the other, or	Complies.
Setbacks	averaged across each boundary, provided the	
	minimum setback width is 1m and the total combined width of both setbacks is at least	
	3.5m.	
Rear	6m	Complies.
Setback		
Landscaping	200.12sqm (40%)	Complies – 200.75sqm (40.12%)
Private	A dwelling house with 3 or more bedrooms	Complies.
Open Space	will require 60sqm of private open space area	
Access to	At least 50% of the required area of private	Complies.
Sunlight	open space of each dwelling and at least 50%	
	of the required area of private open space of	
	adjoining dwellings are to receive a minimum of 3 hours of sunlight between 9am and 3pm	
	on June 21	

Part A - Introduction

A.5 Objectives

The overriding objective of the DCP is to create and maintain a high level of environmental quality throughout Warringah. Development should result in an increased level of local amenity and environmental sustainability. The other objectives of this plan are:

Objectives

- To ensure development responds to the characteristics of the site and the qualities of the surrounding neighbourhood
- To ensure new development is a good neighbour, creates a unified landscape, contributes to the street, reinforces the importance of pedestrian areas and creates an attractive design outcome

- To inspire design innovation for residential, commercial and industrial development
- To provide a high level of access to and within development.
- To protect environmentally sensitive areas from overdevelopment or visually intrusive development so that scenic qualities, as well as the biological and ecological values of those areas, are maintained
- To achieve environmentally, economically and socially sustainable development for the community of Warringah

Comments:

Complies – the proposal is for the demolition of the existing dwelling, erection of a new dual occupancy (attached), swimming pool, and associated works. The proposed development is compatible with existing residential development along Loch Street noting the existing bulk and scale. The development has been strategically designed to not result in any adverse amenity impacts on neighbouring properties. The proposal meets the objectives of Warringah DCP.

<u>Part B – Built Form Controls</u>

B1 Wall Heights

Objectives

- To minimise the visual impact of development when viewed from adjoining properties, streets, waterways and land zoned for public recreation purposes.
- To ensure development is generally beneath the existing <u>tree</u> canopy level.
- To provide a reasonable sharing of views to and from public and private properties.
- To minimise the impact of development on adjoining or nearby properties.
- To ensure that development responds to site topography and to discourage excavation of the natural landform.
- To provide sufficient scope for innovative roof pitch and variation in roof design.

Requirements

1. Walls are not to exceed 7.2 metres from ground level (existing) to the underside of the ceiling on the uppermost floor of the building (excluding habitable areas wholly located within a roof space).

Exceptions

This control may be varied on sites with slopes greater than 20% within the building footprint (measured at the base of the external walls), provided the building:

- does not exceed the 8.5 metre height development standard;
- is designed and located to minimise bulk and scale; and
- has a minimal visual impact when viewed from the downslope sides of the land.

Comments:

Merit assessment – the site is subject to a maximum wall height of 7.2m; the proposal has been designed with the following wall heights:

North elevation: 6.25m to 8.42m South elevation: 6.25m to 8.37m

It is noted that the proposed minor non-compliance is influenced by the topography of the site and the existing man-made level changes. The site slopes to the east approximately 3m from the front of

the site to rear. Noting that the proposal has been designed with a contemporary roof system, it is our professional opinion that the proposal is not of an offensive bulk and scale that would look out of character in the immediate locality. The proposal has been suitably stepped down the site to allow for reasonable view sharing opportunities and to maintain adequate solar access to surrounding properties.

The proposal is consistent with approvals granted along the eastern side of Loch Street recently approved with wall height variations, these include:

- 23 Loch Street Mod2024/0267 8.1m wall height
- 13 Loch Street DA2020/0370 8.4m wall height
- 11 Loch Street DA2024/1827 7.8m wall height
- 9 Loch Street DA2021/0350 7.7 wall height
- 5 Loch Street DA2020/1323 8.1m wall height

*It is noted that the above are the most recent development applications granted along the eastern side of Loch Street under WLEP2011. It is important to acknowledge that all of these applications were approved with a variation to the wall height control.

Noting that the proposal will not adversely impact adjoining properties, the variation can be supported, in this instance. In this regard, it is important to note the EPA Act Cl4.15(3A)(b) which states that flexibility should be applied where reasonable alternative solutions that achieve the objects of those standards. The proposal is consistent with the streetscape of Loch Street, and therefore warrants approval, as submitted.

B3 Side Boundary Envelope

Objectives

- To ensure that development does not become visually dominant by virtue of its height and bulk.
- To ensure adequate light, solar access and privacy by providing spatial separation between buildings.
- To ensure that development responds to the topography of the site.

Requirements

- 1. Buildings on land shown coloured on the DCP Map Side Boundary Envelopes must be sited within a building envelope determined by projecting planes at 45 degrees from a height above ground level (existing) at the side boundaries of:
- 4 metres, or
- 5 metres

as identified on the map.

2. On land within the R3 Medium Density Residential zone, above and below ground structures and private open space, carparking, vehicle access ramps, balconies, terraces, and the like shall not encroach the side boundary envelope.

Exceptions

Land Zoned R2 or E4 or Zoned RU4 with frontage to The Greenway

For all land zoned R2 or E4, or land zoned RU4 with frontage to "The Greenway", Duffy's Forest:

- Fascias, gutters, downpipes, eaves (up to 0.675 metres from the boundary), masonry chimneys, flues, pipes or other services infrastructure may encroach beyond the side boundary envelope.
- Consent may be granted for the addition of a second storey to an existing dwelling house that to a minor extent does not comply with the requirement of this control.

Comments:

Complies – the proposal is compliant with the prescribed side boundary envelope control for the site. The development is not visually dominant, provides separation and retains adequate access to light and privacy for adjoining properties.

B5 Side Boundary Setbacks

Objectives

- To provide opportunities for deep soil landscape areas.
- To ensure that development does not become visually dominant.
- To ensure that the scale and bulk of buildings is minimised.
- To provide adequate separation between buildings to ensure a reasonable level of privacy, amenity and solar access is maintained.
- To provide reasonable sharing of views to and from public and private properties.

Requirements

- 1. Development on land shown coloured on the DCP Map Side Boundary Setbacks is to maintain a minimum setback from side boundaries as shown on the map.
- 2. Side boundary setback areas are to be landscaped and free of any above or below ground structures, car parking or site facilities other than driveways and fences.
- 3. On land within the R3 Medium Density Residential zone, above and below ground structures and private open space, basement car parking, vehicle access ramps, balconies, terraces, and the like shall not encroach the side setback except as provided for under Exceptions below.

Exceptions

Land Zoned R2

All development:

Screens or sunblinds, light fittings, electricity or gas meters, or other services infrastructure
and structures not more than 1 metre above ground level (existing) such as unroofed
terraces, balconies, landings, steps or ramps may encroach beyond the minimum side
setback

Ancillary to a dwelling house:

• Consent may be granted to allow a single storey outbuilding, carport, pergola or the like that to a minor extent does not comply with the requirements of this clause

Comments:

Not applicable – the site is located within land zoned R2 Low Density Residential under WLEP2011. As afforded under Clause 166 of the Housing SEPP, development for the purposes of dual occupancies is permissible with development consent on the site. Development for the purpose of a dual-occupancy (attached) through the provisions of the Housing SEPP is subject to special area controls as prescribed in section G10 of the WDCP. Refer to applicable setback controls assessed under part G10.1 Dual Occupancies and Semi-Detached Dwellings.

B7 Front Boundary Setbacks

Objectives

- To create a sense of openness.
- To maintain the visual continuity and pattern of buildings and landscape elements.
- To protect and enhance the visual quality of streetscapes and public spaces.
- To achieve reasonable view sharing.

Requirements

- 1. Development is to maintain a minimum setback to road frontages.
- 2. The <u>front boundary setback</u> area is to be landscaped and generally free of any structures, basements, carparking or site facilities other than driveways, letter boxes, <u>garbage</u> storage areas and fences.
- 3. Where primary and secondary setbacks are specified, buildings and structures (such as carparks) are not to occupy more than 50% of the area between the primary and secondary setbacks. The area between the primary setback and the road boundary is only to be used for landscaping and driveways.
- 4. For land zoned E3 and not having frontage to Kamber Road or Kimbriki Road the minimum front building setback area is to be densely landscaped using locally occurring species of canopy trees and shrubs and free of any structures, carparking or site facilities other than driveways, letterboxes and fences.

Comments:

Complies on merit – the site is subject to a front setback control of 6.5m. The front building façade has been designed to achieve full compliance with the 6.5m control. The encroaching components relate to ancillary structures, specifically the architectural elements associated with the proposed planter boxes to the front building façade which have been designed with a minimum setback of 6.1m to the front boundary. The proposal complies with the objectives of control B7 as follows:

• To create a sense of openness.

The project designer has sensitivity designed the front building façade to achieve full compliance with the 6.5m setback control. The encroaching elements relate to ancillary structures only, which include the planter boxes the protrude from the front façade. These ancillary elements are considered to have a negligible impact on the built form of the Loch Street streetscape as they contribute to visual interest with articulating open features and planters to soften the bulk and scale of the building as it presents to the street.

• To maintain the visual continuity and pattern of buildings and landscape elements.

The proposal has been sensitivity designed to appropriately respond to the prevailing building alignment on the eastern side of Loch Street. The project designer has appropriately designed the building footprint with a minimum setback of 6.1m to maintain visual continuity and the prevailing pattern of buildings on the eastern side of Loch Street.

• To protect and enhance the visual quality of streetscapes and public spaces.

The proposed dual occupancy (attached) has been sensitively designed by the project designer to achieve an appropriate front setback consistent with the prevailing building line on the eastern side of Loch Street. The encroaching elements relate to ancillary building structures only, specifically being the planter boxes to the front building façade, which have been designed with a minimum setback of 6.1m to the front boundary. It is our professional opinion that these ancillary elements contribute to visual interest with articulating open features and planters to soften the bulk and scale of the building as it presents to the street. Noting that these elements would enhance the visual quality of the dual occupancy (attached) as the dwellings present to the streetscape, it is our professional opinion that the proposed variation to the front setback control can be supported on merit. The proposal would have no adverse impacts on the visual quality of the streetscape or to any nearby public spaces.

• To achieve reasonable view sharing.

The proposed dual occupancy (attached) has been carefully designed to achieve reasonable view sharing and to retain and protect existing view corridors across the site to the east. The project designer has sensitively designed the building with a compliant building height, side boundary setbacks, and side boundary envelope to ensure the development will have no unreasonable impacts to the view corridor to Curl Curl.

The proposal complies with the objectives of control B7; therefore, it is our professional opinion that the minor variation to the front setback control can be supported by Council on merit.

B9 Rear Boundary Setbacks

Objectives

- To ensure opportunities for deep soil landscape areas are maintained.
- To create a sense of openness in rear yards.
- To preserve the amenity of adjacent land, particularly relating to privacy between buildings.
- To maintain the existing visual continuity and pattern of buildings, rear gardens and landscape elements.
- To provide opportunities to maintain privacy between dwellings.

Requirements

- 1. Development is to maintain a minimum setback to rear boundaries.
- 2. The rear setback area is to be landscaped and free of any above or below ground structures.
- 3. On land zoned R3 Medium Density where there is a 6m rear boundary setback, above and below ground structures and private open space, including basement carparking, vehicle access ramps, balconies, terraces, and the like shall not encroach the rear building setback.
- 4. The rear building setback for land zoned IN2 Light Industrial at Tepko Road that adjoins land zoned R2 Low Density Residential is not to be used for industrial purposes or vehicle access.
- 5. The rear building setback for land zoned IN2 Light Industrial in the vicinity of Campbell Parade, Manly Vale is not to be used for industrial purposes or vehicle access

Exceptions

Land Zoned R2 and Land Zoned RU4 with frontage to The Greenway

On land zoned R2 Low Density Residential, and land zoned RU4 Rural Small Holdings that has frontage to "The Greenway", Duffy's Forest, where the minimum rear building setback is 6 metres, exempt development, swimming pools and outbuildings that, in total, do not exceed 50% of the rear setback area, provided that the objectives of this provision are met.

Comments:

Complies – the proposal complies with the 6m rear setback control.

Part C – Siting Factors

C1 Subdivision

Objectives

- To regulate the density of development.
- To limit the impact of new development and to protect the natural landscape and topography.
- To ensure that any new lot created has sufficient area for landscaping, private open space,

drainage, utility services and vehicular access to and from the site.

- To maximise and protect solar access for each dwelling
- To maximise the use of existing infrastructure.
- To protect the amenity of adjoining properties.
- To minimise the risk from potential hazards including bushfires, land slip and flooding.

Comments:

Not applicable – whilst the proposal includes strata subdivision, control C1 relates to Torrens Title requirements and battle-axe developments, therefore not applying to this application.

C2 Traffic, Access and Safety

Objectives

To minimise:

- a) traffic hazards;
- b) vehicles queuing on public roads
- c) the number of vehicle crossings in a street;
- d) traffic, pedestrian and cyclist conflict;
- e) interference with public transport facilities; and
- f) the loss of "on street" kerbside parking.

Requirements

Vehicular Access

- 1. Applicants shall demonstrate that the location of vehicular and pedestrian access meets the objectives.
- 2. Vehicle access is to be obtained from minor streets and lanes where available and practical.
- 3. There will be no direct vehicle access to properties in the B7 zone from Mona Vale Road or Forest Way.
- 4. Vehicle crossing approvals on public roads are to be in accordance with Council's Vehicle Crossing Policy (Special Crossings) LAP-PL413 and Vehicle Access to Roadside Development LAP-PL 315.
- 5. Vehicle crossing construction and design is to be in accordance with Council's Minor works specification.

On-site loading and unloading

6. Facilities for the loading and unloading of service, delivery and emergency vehicles are to be: appropriate to the size and nature of the development;

screened from public view; and

designed so that vehicles may enter and leave in a forward direction.

Exceptions

Reference should be made to Part G for additional, site specific requirements

Comments:

Complies – the proposal includes provisions for a new shared driveway and crossover to Loch Street to service both dwellings. The proposed relocation of the new driveway and crossover will have a negligible impact and will not contribute to any increase in the demand for on-street parking. The driveway and crossover have been designed to minimise the visual impact of the driveway in the streetscape and thoughtfully located to ensure vehicular access to the site is efficient, safe and convenient.

C3 Parking Facilities

Objectives

- To provide adequate off street carparking.
- To site and design parking facilities (including garages) to have minimal visual impact on the street frontage or other public place.
- To ensure that parking facilities (including garages) are designed so as not to dominate the street frontage or other public spaces.

Requirements

- 1. The following design principles shall be met:
- Garage doors and carports are to be integrated into the house design and to not dominate the façade. Parking is to be located within buildings or on site.;
- Laneways are to be used to provide rear access to carparking areas where possible;
- Carparking is to be provided partly or fully underground for apartment buildings and other large scale developments;
- Parking is to be located so that views of the street from front windows are not obscured; and
- Where garages and carports face the street, ensure that the garage or carport opening does not exceed 6 metres or 50% of the building width, whichever is the lesser.
- 2. Off street parking is to be provided within the property demonstrating that the following matters have been taken into account:
- the land use;
- the hours of operation;
- the availability of public transport;
- the availability of alternative car parking; and
- the need for parking facilities for courier vehicles, delivery / service vehicles and bicycles.
- 3. Carparking, other than for individual dwellings, shall:
- Avoid the use of mechanical car stacking spaces;
- Not be readily apparent from public spaces;
- Provide safe and convenient pedestrian and traffic movement;
- Include adequate provision for manoeuvring and convenient access to individual spaces;
- Enable vehicles to enter and leave the site in a forward direction;
- Incorporate unobstructed access to visitor parking spaces;
- Be landscaped to shade parked vehicles, screen them from public view, assist in micro-climate management and create attractive and pleasant places;
- Provide on site detention of stormwater, where appropriate; and
- Minimum car parking dimensions are to be in accordance with AS/NZS 2890.1.
- 4. Carparking is to be provided in accordance with Appendix 1 which details the rate of car parking for various land uses. Where the carparking rate is not specified in Appendix 1 or the WLEP, carparking must be adequate for the development having regard to the objectives and requirements of this clause. The rates specified in the Roads and Traffic Authority's Guide to Traffic Generating Development should be used as a guide where relevant.
- 5. Adequate provision for staff, customer and courier parking, and parking and turning of vehicles with trailers must be provided if appropriate to the land use.
- 6. For bulky goods premises adequate on-site parking spaces for service/delivery vehicles at a convenient location, separated from customer parking must be provided.
- 7. Where appropriate, car parking which meets the needs of people with physical disabilities must be provided in accordance with the relevant Australian Standard.
- 8. For Forest Way Village car parking at ground level is to be provided for individual units.

Exceptions

Reference should be made to Part G for additional, site specific requirements.

Community title subdivisions are to include provision for one visitor parking space per five dwellings or part thereof. These spaces are to be located within the neighbourhood property lot. Cross reference is in appendix 1.

Comments:

Not applicable – the site is located within land zoned R2 Low Density Residential under WLEP2011. As afforded under Clause 166 of the Housing SEPP, development for the purposes of dual occupancies is permissible with development consent on the site. Development for the purpose of a dual-occupancy (attached) through the provisions of the Housing SEPP is subject to special area controls as prescribed in section G10 of the WDCP. Refer to applicable parking controls assessed under part G10.1 Dual Occupancies and Semi-Detached Dwellings.

C4 Stormwater

Objectives

- To protect and improve the ecological condition of Warringah's beaches, lagoons, waterways, wetlands and surrounding bushland;
- To minimise the <u>risk</u> to public health and safety;
- To reduce the risk to life and property from flooding;
- Integrate Water Sensitive Urban Design measures into the landscape and built form to maximise amenity.
- To manage and minimise stormwater overland flow, nuisance flooding and groundwater related damage to properties.
- To protect Council's stormwater drainage assets during development works and to ensure Council's drainage rights are not compromised.
- To minimise the quantity of stormwater runoff from new development on Council's drainage system.

Requirements

- 1. Stormwater runoff must not cause downstream flooding and must have minimal environmental impact on any receiving stormwater infrastructure, watercourse, stream, lagoon, lake and waterway or the like.
- 2. The stormwater drainage systems for all developments are to be designed, installed and maintained in accordance with Council's Water Management Policy.

Exceptions

• Refer to Council's Water Management Policy for exceptions.

Comments:

Complies – a stormwater management plan has been prepared in accordance with Northern Beaches Councils requirements prepared by Vanguard Consulting Engineers.

C5 Erosion and Sedimentation

Objectives

- To reduce the potential for soil erosion and adverse sedimentation impacts upon the environment.
- To prevent the migration of sediment off the site onto any waterway, drainage systems, public

reserves, road reserve, bushland or adjoining private lands.

• To prevent any reduction in water quality downstream of the development site.

Requirements

- 1. All developments which involve the disturbance of land must install and maintain erosion and sediment controls until the site is fully stabilised.
- 2. Any erosion and sedimentation is to be managed at the source.
- 3. Erosion, sediment and pollution controls including water discharge from the site must comply with Council's Water Management Policy.
- 4. An Erosion and Sediment Control Plan must be prepared in accordance with Landcom's Managing Urban Stormwater: Soil and Construction Manual (2004) for all development which involves the disturbance of up to 2500m2 of land.
- 5. Soil and Water Management Plan must be prepared in accordance with Landcom's Managing Urban Stormwater: Soil and Construction Manual (2004) for all development which involves the disturbance of more than 2500m2 of land.

Exceptions

Reference should be made to Part G for additional, site specific requirements.

Comments:

Complies – an Erosion and Sediment Plan has been prepared in accordance with Northern Beaches Councils requirements.

C7 Excavation and Landfill

Objectives

- To ensure any land excavation or fill work will not have an adverse effect upon the visual and natural environment or adjoining and adjacent properties.
- To require that excavation and landfill does not create airborne pollution.
- To preserve the integrity of the physical environment.
- To maintain and enhance visual and scenic quality.

Requirements

- 1. All landfill must be clean and not contain any materials that are contaminated and must comply with the relevant legislation.
- 2. Excavation and landfill works must not result in any adverse impact on adjoining land.
- 3. Excavated and landfill areas shall be constructed to ensure the geological stability of the work.
- 4. Excavation and landfill shall not create siltation or pollution of waterways and drainage lines, or degrade or destroy the natural environment.
- 5. Rehabilitation and revegetation techniques shall be applied to the fill.
- 6. Where landfill is necessary, it is to be minimal and shall have no adverse effect on the visual and natural environment or adjoining and surrounding properties.

Comments:

Complies – the proposal includes minor to moderate excavation works for the construction of the building. The subject application is supported by a geotechnical assessment prepared by Australian GeoEnviro Pty Ltd.

C8 Demolition and Construction

Objectives

- To manage demolition and construction sites so that there is no unreasonable impact on the surrounding amenity, pedestrian or road safety, or the natural environment.
- To promote improved project management by minimising demolition and construction <u>waste</u> and encouraging source separation, reuse and recycling of materials.
- To assist industry, commercial operators and site managers in planning their necessary <u>waste</u> management procedures through the preparation and lodgement of a <u>Waste</u> Management Plan
- To discourage illegal dumping.

Requirements

1. All development that is, or includes, demolition and/or construction, must comply with the appropriate sections of the <u>Waste</u> Management Guidelines and all relevant Development Applications must be accompanied by a <u>Waste Management Plan</u>.

Comments:

Complies – the proposal will be constructed in accordance with relevant Australian Standards and Conditions of Consent as per Councils Waste Management Guidelines and Plan. A Waste Management Plan is submitted with the development application.

C9 Waste Management

Objectives

- To facilitate sustainable <u>waste</u> management in a manner consistent with the principles of Ecologically Sustainable Development (ESD).
- To achieve <u>waste</u> avoidance, source separation and recycling of household and industrial/commercial <u>waste</u>.
- To design and locate <u>waste</u> storage and collection facilities which are convenient and easily accessible; safe; hygienic; of an adequate size, and with minimal <u>adverse impacts</u> on residents, surrounding neighbours, and pedestrian and vehicle movements.
- To ensure <u>waste</u> storage and collection facilities complement <u>waste</u> collection and management services, offered by Council and the private service providers and support on-going control for such standards and services.
- To minimise risks to health and safety associated with handling and disposal of <u>waste</u> and recycled material, and ensure optimum hygiene.
- To minimise any adverse environmental impacts associated with the storage and collection of <u>waste</u>.

Requirements

1. All development that is, or includes, demolition and/or construction, must comply with the appropriate sections of the <u>Waste</u> Management Guidelines and all relevant Development Applications must be accompanied by a <u>Waste Management Plan</u>.

Comments:

Complies – the proposal will adequately demolish and construct the proposed works as per Councils Waste Management Guidelines and Plan. A Waste Management Plan is submitted with the development application.

Part D - Design

D1 Landscaped Open Space and Bushland Setting

Objectives

- To enable planting to maintain and enhance the streetscape.
- To conserve and enhance indigenous vegetation, topographical features and habitat for wildlife.
- To provide for landscaped open space with dimensions that are sufficient to enable the establishment of low lying shrubs, medium high shrubs and canopy trees of a size and density to mitigate the height, bulk and scale of the building.
- To enhance privacy between buildings.
- To accommodate appropriate outdoor recreational opportunities that meet the needs of the occupants.
- To provide space for service functions, including clothes drying.
- To facilitate water management, including on-site detention and infiltration of stormwater.

Requirements

- 1. The required minimum area of landscaped open space is shown on DCP Map Landscaped Open Space and <u>Bushland</u> Setting. To measure the area of landscaped open space:
- a) Driveways, paved areas, roofed areas, tennis courts, car parking and stormwater structures, decks, etc, and any open space areas with a dimension of less than 2 metres are excluded from the calculation;
- b) The water surface of swimming pools and impervious surfaces which occur naturally such as rock outcrops are included in the calculation;
 - c) Landscaped open space must be at ground level (finished); and
 - d) The minimum soil depth of land that can be included as landscaped open space is 1 metre.
- 2. Where land is shown on DCP Map Landscaped Open Space and <u>Bushland</u> Setting as "<u>Bushland</u> Setting", a minimum of 50% of the site area must remain undisturbed by development and is to be kept as natural <u>bushland</u> or landscaped with locally indigenous species.
- 3. In Cottage Point the relationship of the locality with the surrounding National Park and Cowan <u>Creek</u> waterway will be given top priority by enhancing the spread of indigenous <u>tree</u> canopy and protecting the natural landscape including rock outcrops and remnant <u>bushland</u>.

Exceptions

Any conflicting requirements in Part G override this control

Comments:

Complies – the proposal complies with the 40% landscaping requirement (200.12sqm) providing 40.12% landscaping on-site (200.75sqm). Refer also to assessment under WDCP G10.1.

D2 Private Open Space

Objectives

- To ensure that all residential development is provided with functional, well located areas of private open space.
- To ensure that private open space is integrated with, and directly accessible from, the living area of dwellings.
- To minimise any adverse impact of private open space on adjoining buildings and their associated

private open spaces.

• To ensure that private open space receives sufficient solar access and privacy.

Requirements

- 1. Residential development is to include private open space for each dwelling.
- 2. The minimum area and dimensions of private open space are as follows:

DWELLING Type	Area and Minimum Dimensions per dwelling
Dwelling houses (including dual occupancy) and attached dwellings with 1	A total of 35m2 with minimum dimensions of 3 metres
or 2 bedrooms	
Dwelling houses (including dual occupancy) and attached dwellings with 3	A total of 60m2 with minimum dimensions of 5 metres
or more bedrooms	
Multi dwelling housing (not located at ground level); residential flat	A total of 10m2 with minimum dimensions of 2.5 metres
buildings and shop top housing	

- 3. Private open space is to be directly accessible from a living area of a dwelling and be capable of serving as an extension of the dwelling for relaxation, dining, entertainment, recreation and children's play.
- 4. Private open space is to be located and designed to ensure privacy of the occupants of adjacent buildings and occupants of the proposed development.
- 5. Private open space shall not be located in the primary front building setback.
- 6. Private open space is to be located to maximise solar access.

Comments:

Complies – the proposal complies with the objectives of control D2 satisfying the minimum private open space area requirements of 60sqm per dwelling, providing 123.63sqm of shared private open space between both dwellings.

D3 Noise

Objectives

- To encourage innovative design solutions to improve the urban environment.
- To ensure that noise emission does not unreasonably diminish the amenity of the area or result in noise intrusion which would be unreasonable for occupants, users or visitors.

Requirements

1. Noise from combined operation of all mechanical plant and equipment must not generate noise levels that exceed the ambient background noise by more than 5dB(A) when measured in accordance with the <u>NSW Industrial Noise Policy</u> at the receiving boundary of residential and other noise sensitive land uses.

See also NSW Industrial Noise Policy Appendices

- 2. Development near existing noise generating activities, such as industry and roads, is to be designed to mitigate the effect of that noise.
- 3. <u>Waste</u> collection and delivery vehicles are not to operate in the vicinity of residential uses between 10pm and 6am.
- 4. Where possible, locate noise sensitive rooms such as bedrooms and private open space away from noise sources. For example, locate kitchens or service areas closer to busy road frontages and bedrooms away from road frontages.
- 5. Where possible, locate noise sources away from the bedroom areas of adjoining dwellings/properties to minimise impact.

Complies – the proposed development is for demolition works, the erection of a new dual occupancy (attached), swimming pool, associated works and strata subdivision. The use will remain as existing for a residential land use and will not produce a large amount of noise from the use of the premises.

D4 Electromagnetic Radiation

Objectives

- To ensure the safety of the community from electromagnetic radiation.
- To ensure that mobile phone base station and associated infrastructure and equipment does not result in an adverse visual impact on the natural or built environment.

Requirements

Radiation levels from mobile phone base stations, antennas and transmitters which emit electromagnetic radiation are to comply with the following requirements:

Telecommunications Act 1997

Comments:

Not applicable.

D6 Access to Sunlight

Objectives

- To ensure that reasonable access to sunlight is maintained.
- To encourage innovative design solutions to improve the urban environment and public open space.
- To promote passive solar design and the use of solar energy.

Requirements

- 1. Development should avoid unreasonable overshadowing any public open space.
- 2. At least 50% of the required area of private open space of each dwelling and at least 50% of the required area of private open space of adjoining dwellings are to receive a minimum of 3 hours of sunlight between 9am and 3pm on June 21.

Exceptions

Council may consider a variation to this control in the particular circumstances of a proposal, where an applicant can demonstrate, to the satisfaction of Council that:

i) the slope or topography of the site or adjoining property makes compliance impractical; and ii) other design options have been investigated which would comply but would unreasonably constrain the development of an otherwise compliant building.

Comments:

Complies – the proposed development has been designed to ensure adequate and reasonable access to sunlight is provided for both the site and adjoining neighbours. The proposal also includes separate private open space areas and living areas to ensure access to sunlight can be maintained throughout the entire day. The proposal utilises a practical roof design which ensures passive solar access with the topography of the land. Refer to drawings DA14 to DA16 for assessment. It is our professional opinion that the proposal complies with the objectives and controls of D6 Access to Sunlight with over 50% of private open space retained with sunlight for a minimum 3 hour period during 9am to 3pm.

D7 Views

Objectives

- To allow for the reasonable sharing of views.
- To encourage innovative design solutions to improve the urban environment.
- To ensure existing canopy trees have priority over views.

Requirements

1. Development shall provide for the reasonable sharing of views.

Comments:

Complies – the proposed dual occupancy (attached) has been carefully designed to achieve reasonable view sharing and where practical retain and protect existing view corridors across the site to the east to Curl Curl where possible. The proposal complies with the maximum building height control and has been designed to achieve full compliance with relevant side boundary setback and side boundary envelope controls as prescribed in the WDCP; therefore, providing a bulk and scale which determines reasonable view sharing corridors. On the basis of the above, it is our professional opinion that the development will have no unreasonable impacts on the view corridor to the Curl Curl and an assessment of the principles of tenacity will not be required as part of this assessment.

D8 Privacy

Objectives

- To ensure the siting and design of buildings provides a high level of visual and acoustic privacy for occupants and neighbours.
- To encourage innovative design solutions to improve the urban environment.
- To provide personal and property security for occupants and visitors.

Requirements

- 1. Building layout should be designed to optimise privacy for occupants of the development and occupants of adjoining properties.
- 2. Orientate living areas, habitable rooms and windows to private open space areas or to the street to limit overlooking.
- 3. The effective location of doors, windows and balconies to avoid overlooking is preferred to the use of screening devices, high sills or obscured glass.
- 4. The windows of one dwelling are to be located so they do not provide direct or close views (ie from less than 9 metres away) into the windows of other dwellings.
- 5. Planter boxes, louvre screens, pergolas, balcony design and the like are to be used to screen a minimum of 50% of the principal private open space of a lower apartment from overlooking from an upper apartment.

Comments:

Complies – the proposed development has been strategically designed to ensure that there will be no adverse overlooking impacts from the proposed dual occupancy (attached) to any adjoining properties. The development provides compliant side boundary setbacks to adequately separate the building from adjoining properties to ensure a reasonable level of privacy is maintained. All proposed ground and first-floor windows with aspects north and south either correspond with low-use rooms, are screened or high-sill at adequate heights to prevent overlooking. The first-floor balcony to Lot 2 has been designed with suitable privacy screening to the southern side boundary.

The first-floor wrap-around balcony to Lot 1 has been designed without provisions for privacy screening noting there will be no privacy impacts as the access handle servicing no. 2 Wyadra Avenue runs parallel along the northern side boundary. Both first-floor balconies have been designed with compliant side and rear setbacks to prevent direct overlooking opportunities. The proposal in my opinion will have minimal to no adverse impact on adjoining properties and can be supported by Council, as submitted.

D9 Building Bulk

Objectives

- To encourage good design and innovative architecture to improve the urban environment.
- To minimise the visual impact of development when viewed from adjoining properties, streets, waterways and land zoned for public recreation purposes.

Requirements

- 1. Side and rear setbacks are to be progressively increased as wall height increases.
- 2. Large areas of continuous wall planes are to be avoided by varying building setbacks and using appropriate techniques to provide visual relief.
- 3. On sloping land, the height and bulk of development (particularly on the downhill side) is to be minimised, and the need for cut and fill reduced by designs which minimise the building footprint and allow the building mass to step down the slope. In particular:

The amount of fill is not to exceed one metre in depth.

Fill is not to spread beyond the footprint of the building.

Excavation of the landform is to be minimised.

- 4. Building height and scale needs to relate to topography and site conditions.
- 5. Orientate development to address the street.
- 6. Use colour, materials and surface treatment to reduce building bulk.
- 7. Landscape plantings are to be provided to reduce the visual bulk of new building and works.
- 8. Articulate walls to reduce building mass.

Comments:

Complies – the proposed development does not result in unacceptable bulk and scale impacts. The proposed dual occupancy (attached) has been sufficiently modulated and articulated, with the building designed to be compatible with the streetscape character establishing; appropriate setbacks in accordance with relevant built form controls and achieving full compliance with the prescribed maximum building height for the site. The proposal has been designed to create an improved visual relationship to the existing streetscape of Loch Street noting the existing front setbacks, building heights and built form of surrounding streets. As per the requirements, the proposal complies as follows:

- The front building façade has been designed to generally comply with the 6.5m setback control
- The side and rear setbacks have been designed to achieve full compliance with DCP requirements.
- The proposal does not have large continuous blank wall planes.
- The building height and scale is compatible with the existing streetscape and with the adjoining buildings.
- The project designer has utilised colours and materials which assist to reduce the bulk and scale and create a sense of openness.
- The proposed landscape plan will enhance the site and the area with new plantings which will reduce the visual bulk of the new building works.

The building has been designed and articulated to reduce the building mass.

It is therefore our professional opinion that the objectives of D9 Building Bulk have been met through a great architectural design with innovative architecture which improves the urban environment of Freshwater.

D10 Building Colours and Materials

Objectives

• To ensure the colours and materials of new or altered buildings and structures are sympathetic to the surrounding natural and built environment.

Requirements

- 1. In highly visible areas, the visual impact of new development (including any structures required to retain land) is to be minimized through the use of appropriate colours and materials and landscaping.
- 2. The colours and materials of development on sites adjoining, or in close proximity to, <u>bushland</u> areas, waterways or the beach must blend in to the natural landscape.
- 3. The colours and materials used for <u>alterations and additions</u> to an existing structure shall complement the existing external building façade.
- 4. The holiday/fisherman shack character of the waterfront of Cottage Point is to be enhanced by the use of building materials which are sympathetic to the small timber and fibro cottages currently in existence on the waterfront. All buildings visible from the water are to utilise materials such as weatherboard, fibre cement, corrugated steel and timber. The use of masonry is discouraged.

Comments:

Complies – the development application provides a material and details schedule drawing DA12. The proposal has been designed with modern building materials and colours which are sympathetic to the surrounding natural and built environment. The proposal complies with the objectives of D10 Building Colours and Materials.

D11 Roofs

Objectives

- To encourage innovative design solutions to improve the urban environment.
- Roofs are to be designed to complement the local skyline.
- Roofs are to be designed to conceal plant and equipment.

Requirements

- 1. Lift overruns, plant and other mechanical equipment are not to detract from the appearance of roofs.
- 2. Roofs should complement the roof pitch and forms of the existing buildings in the streetscape.
- 3. Articulate the roof with elements such as dormers, gables, balconies, verandahs and pergolas.
- 4. Roofs shall incorporate eaves for shading.
- 5. Roofing materials should not cause excessive glare and reflection.
- 6. Service equipment, lift overruns, plant and other mechanical equipment on the roof shall be minimised by integrating as many services, etc as possible into the building.

Complies – the proposed roof has been designed as a new modern contemporary roof as per other approvals granted in the immediate area. The proposed roof is compatible with the above objectives and requirements.

D12 Glare and Reflection

Objectives

- To ensure that development will not result in overspill or glare from artificial illumination or sun reflection.
- To maintain and improve the amenity of public and private land.
- To encourage innovative design solutions to improve the urban environment.

Requirements

- 1. The overspill from artificial illumination or sun reflection is to be minimised by utilising one or more of the following: Selecting an appropriate lighting height that is practical and responds to the building and its neighbours;
 - Minimising the lit area of signage;
 - Locating the light source away from adjoining properties or boundaries; and
 - Directing light spill within the site.
- 2. Any glare from artificial illumination is to be minimised by utilising one or more of the following:
 - Indirect lighting;
 - Controlling the level of illumination; and
 - Directing the light source away from view lines.
- 3. Sunlight reflectivity that may impact on surrounding properties is to be minimised by utilising one or more of the following:
- Selecting materials for roofing, wall claddings and glazing that have less reflection eg medium to dark roof tones;
 - Orienting reflective materials away from properties that may be impacted;
 - Recessing glass into the façade;
 - Utilising shading devices;
- Limiting the use of glazing on walls and glazed balustrades and avoiding the use of highly reflective glass; and
- Selecting windows and openings that have a vertical emphasis and are significantly less in proportion to solid massing in walls.

Comments:

Complies – the development does not propose materials that will result in an unacceptable amount of glare. The proposal meets the relevant objectives of D12 Glare and Reflection.

D13 Front Fences and Front Walls

Objectives

- To ensure that fencing, terracing and retaining walls are compatible with the existing streetscape character while creating visual interest in the public domain.
- To encourage innovative design solutions to improve the urban environment.
- To avoid a 'walled in' streetscape.

Requirements

- 1. Fences, including side fences, located within the street setback area are to be compatible with the existing streetscape character.
- 2. Where a solid fence is required it is to be articulated to provide visual interest and set back to allow for landscaping to soften and screen the appearance of the fence.
- 3. Fences located within the front building setback area are to complement the existing streetscape character.
- 4. Fences are to be constructed to allow casual surveillance, except where there is excessive noise.
- 5. Gates are not to encroach over the property boundary when opening or closing.
- 6. Fences should complement the architectural period of the building.

Exceptions

No solid front fences or front walls will be permitted on <u>flood prone land</u>. Reference should be made to Part G Belrose Corridor for site specific requirements.

Comments:

Complies – the proposal includes provisions for a new front boundary fence. The fence has been designed to be compliant with Councils' requirements incorporating an open design and reduced scale to maintain casual surveillance opportunities to the street. The front fence design is sympathetic to the streetscape character and complementary with the proposed building.

D14 Site Facilities

Objectives

- To provide for the logical placement of facilities on site that will result in minimal impacts for all users, particularly residents, and surrounding neighbours.
- To encourage innovative design solutions to improve the urban environment.
- To make servicing the site as efficient and easy as possible.
- To allow for discreet and easily serviceable placement of site facilities in new development.

Requirements

- 1. Site facilities including <u>garbage</u> and recycling enclosures, mail boxes and clothes drying facilities are to be adequate and convenient for users and services and are to have minimal visual impact from public places. In particular:
- <u>Waste</u> and recycling bin enclosures are to be durable, integrated with the building design and site landscaping, suitably screened from public places or streets and located for convenient access for collection;
- All dwellings which are required to have landscaped open space are to be provided with adequate open air clothes drying facilities which are suitably screened from public places or streets;
- <u>Garbage</u> areas are to be designed to avoid common problems such as smell, noise from collection vehicles and the visibility of containers;
- Landscaping is to be provided to reduce the impact of all <u>garbage</u> and recycling enclosures. They are to be located away from habitable rooms, bedrooms or living areas that may detract form the amenity of occupants; and
- Mail boxes are to be incorporated into the front fence or landscaping design. They are to be easily accessible and clearly identifiable.

Comments:

Complies – the site has been designed with relevant facilities including a waste enclosure, space for clothesline in the rear yard and a mailbox as required.

D15 Side and Rear Fences

Objectives

• To encourage innovative design solutions to improve the urban environment.

Requirements

- 1. Generally, side and rear boundary fences are to be no higher than 1.8 metres on level sites, or 1.8 metres measured from the low side where there is a difference in either side of the boundary.
- 2. For sloping sites, the height of fences may be averaged and fences and walls may be regularly stepped.
- 3. All fencing materials are to complement the existing neighbourhood. The use of corrugated metal, barbed wire or broken glass is not permitted.

Comments:

Complies – the proposal in majority will retain the existing side and rear fences. New fencing may be installed under the exempt development allowances.

D16 Swimming Pools and Spa Pools

Objectives

- To ensure swimming pools and spas are located to preserve the natural environment, streetscape and residential amenity.
- To encourage innovative design solutions to improve the urban environment.

Requirements

- 1. Pools are not to be located in the front building setback.
- 2. Where there are 2 frontages, swimming pools and spas are not to be situated in the primary street frontage.
- 3. Swimming pools and spas are to be setback from any trees. Australian Standard AS4970-2009 Protection of trees on development sites is to be used to determine an appropriate setback.

Comments:

Complies – the proposed swimming pool is consistent with the objectives and requirements of control D16. The pool is located in the rear setback and will have no adverse impacts on the natural environment, streetscape or on residential amenity. The pools will be appropriately setback from any existing trees on the site as per Australian Standard AS4970-2009.

D17 Tennis Courts

Objectives

• To encourage innovative design solutions to improve the urban environment.

Requirements

- 1. Tennis courts are to be located behind the front building setback.
- 2. Where there are 2 frontages, the location of the tennis court is not to be in the primary street frontage.
- 3. Tennis courts are to be setback from any trees. Australian Standard AS4970-2009 Protection of trees on development sites is to be used to determine an appropriate setback.
- 4. The height and location of court fencing is to enable:
 - a) Sharing of views from surrounding residences; and

- b) Provision of sunlight to surrounding properties.
- 5. Fencing material is to be a dark colour.
- 6. Fences are to be setback a minimum of 1.5 metres from front, side and rear boundaries.

Not applicable – the proposal does not include a tennis court.

D18 Accessibility and Adaptability

Objectives

- To ensure vehicular access points for parking, servicing or deliveries, and pedestrian access are designed to provide vehicular and pedestrian safety.
- To ensure convenient, comfortable and safe access for all people including older people, people with prams and strollers and people with a disability.
- To provide a reasonable proportion of residential units that should be designed to be adaptable and easily modified to promote 'ageing in place' and for people with disabilities.

Comments:

Not applicable

D19 Site Consolidation in the R3 and IN1 Zone

Objectives

- To encourage lot consolidation to allow efficient use of land.
- To encourage innovative design solutions to improve the urban environment.
- To avoid lot sterilization.

Comments:

Not applicable.

D20 Safety and Security

Objectives

• To ensure that development maintains and enhances the security and safety of the community.

Requirements

- 1. Buildings are to overlook streets as well as public and communal places to allow casual surveillance.
- 2. Service areas and access ways are to be either secured or designed to allow casual surveillance.
- 3. There is to be adequate lighting of entrances and pedestrian areas.
- 4. After hours land use activities are to be given priority along primary pedestrian routes to increase safety.
- 5. Entrances to buildings are to be from public streets wherever possible.
- 6. For larger developments, a site management plan and formal <u>risk</u> assessment, including the consideration of the 'Crime Prevention through Environmental Design' principles may be required. This is relevant where, in Council's opinion, the proposed development would present a crime, safety or security <u>risk</u>. See <u>Crime Prevention and Assessment of Development Applications Guidelines under Section 79C of the Environmental Planning and Assessment Act 1979 prepared by the Department of Urban Affairs and Planning (now Department of Planning).</u>

7. Buildings are to be designed to allow casual surveillance of the street, for example by:

- a) Maximising the glazed shop front on the ground level so that views in and out of the shop can be achieved;
- b) Providing openings of an adequate size in the upper levels to maximise opportunities for surveillance;
 - c) Locating high use rooms to maximise casual surveillance;
 - d) Clearly displaying the street number on the front of the building in pedestrian view; and
 - e) Ensuring shop fronts are not obscured by planting, signage, awnings and roller shutters.
- 8. Casual surveillance of loading areas is to be improved by:
- a) Providing side and rear openings from adjacent buildings that overlook service areas and clear sight lines; and
 - b) Providing adequate day and night lighting which will reduce the <u>risk</u> of undesirable activity.
- 9. Design entrances to buildings from public streets so that:
 - a) Building entrances are clearly identifiable, defined, lit and visible;
- b) The residential component of a shop top housing development has a separate secure pedestrian entrance from the commercial component of the development;
 - c) Main entrances are clearly identifiable;
 - d) Pavement surfaces and signage direct pedestrian movements; and
 - e) Potential conflict between pedestrians and vehicles is avoided.

Exceptions

Reference should be made to Part G4 Warringah Mall for site specific requirements.

Comments:

Complies – the proposed dual occupancy (attached) includes adequate casual surveillance opportunities facing Loch Street to allow for passive surveillance of the street. The proposal meets the relevant objectives of D20 Safety and Security.

D21 Provision and Location of Utility Services

Objectives

- To encourage innovative design solutions to improve the urban environment.
- To ensure that adequate <u>utility services</u> are provided to land being developed.

Requirements

- 1. If a proposed development will involve a need for them, <u>utility services</u> must be provided, including provision of the supply of water, gas, telecommunications and electricity and the satisfactory management of sewage and drainage.
- 2. Service structures, plant and equipment are to be located below ground or be designed to be an integral part of the development and suitably screened from public places or streets.
- 3. Where possible, underground <u>utility services</u> such as water, gas, telecommunications, electricity and gas are to be provided in a common trench. The main advantages for this are:
 - a) A reduction in the number of trenches required;
 - b) An accurate location of services for maintenance;
 - c) Minimising the conflict between services;
 - d) Minimising land required and cost;
- 4. The location of <u>utility services</u> should take account of and minimise any impact on natural features such as bushland and natural watercourses.
- 5. Where natural features are disturbed the soil profile should be restored and landscaping and <u>tree</u> planting should be sited and selected to minimise impact on services, including existing overhead cables.

- 6. Where utilities are located above ground, screening devices should include materials that complement the streetscape, for example fencing and landscaping. The location of service structures such as electricity substations should be within the site area.
- 7. Habitable buildings must be connected to Sydney Water's sewerage system where the density is one dwelling per 1050 square metres or greater.
- 8. On land where the density is less than one dwelling per 1050 square metres, and where connection to Sydney Water is not possible, Council may consider the on-site disposal of effluent where the applicant can demonstrate that the proposed sewerage systems or works are able to operate over the long term without causing unreasonable adverse effects.

Complies – the site is adequately serviced by the essential utilities (i.e. water, electricity, sewer).

D22 Conservation of Energy and Water

Objectives

- To encourage innovative design solutions to improve the urban environment.
- To ensure energy and water use is minimised.

Requirements

- 1. The orientation, layout and landscaping of sites is to make the best use of natural ventilation, daylight and solar energy.
- 2. Site layout and structures are to allow for reasonable solar access for the purposes of water heating and electricity generation and maintain reasonable solar access to adjoining properties.
- 3. Buildings are to be designed to minimize energy and water consumption.
- 4. Landscape design is to assist in the conservation of energy and water.
- 5. Reuse of stormwater for on-site irrigation and domestic use is to be encouraged, subject to consideration of public health risks.
- 6. All development must comply with Council's Water Management Policy.

Comments:

Complies – the proposal is supported by a BASIX and NatHERS assessment and certificate. In line with passive design principles, the orientation, roof forms, glazing and spatial planning have been carefully designed to minimise energy consumption over the life of the dwelling. The proposal meets the relevant objectives of D22 Conservation of Energy and Water.

D23 Signs

Objectives

- To encourage well designed and suitably located signs that allow for the identification of a land use, business or activity to which the sign relates.
- To achieve well designed and coordinated signage that uses high quality materials.
- To ensure that signs do not result in an adverse visual impact on the streetscape or the surrounding locality.
- To ensure the provision of signs does not adversely impact on the amenity of residential properties.
- To protect open space areas and heritage items or conservation areas from the <u>adverse impacts</u> of inappropriate signage.

Not applicable.

Part E – The Natural Environment

E1 Preservation of Trees or Bushland Vegetation

Objectives

- To protect and enhance the urban forest of the Northern Beaches.
- To effectively manage the risks that come with an established urban forest through professional management of trees.
- To minimise soil erosion and to improve air quality, water quality, carbon sequestration, storm water retention, energy conservation and noise reduction.
- To protect, enhance <u>bushland</u> that provides habitat for locally native plant and animal species, threatened species populations and endangered ecological communities.
- To promote the retention and planting of trees which will help enable plant and animal communities to survive in the long-term.
- To protect and enhance the scenic value and character that trees and/or <u>bushland</u> vegetation provide.

Comments:

Not applicable – the proposal does not remove any trees that are not exempt from permits and provides a new landscape approach for the site.

E2 Prescribed Vegetation

Objectives

- To preserve and enhance the area's amenity, whilst protecting human life and property.
- To improve air quality, prevent soil erosion, assist in improving water quality, carbon sequestration, storm water retention, energy conservation and noise reduction.
- To provide habitat for local wildlife, generate shade for residents and provide psychological & social benefits.
- To protect and promote the recovery of threatened species, populations and endangered ecological communities.
- To protect and enhance the habitat of plants, animals and vegetation communities with high conservation significance.
- To retain and enhance native vegetation communities and the ecological functions of wildlife corridors.
- To reconstruct habitat in non vegetated areas of wildlife corridors that will sustain the ecological functions of a <u>wildlife corridor</u> and that, as far as possible, represents the combination of plant species and vegetation structure of the original 1750 community.
- Promote the retention of native vegetation in parcels of a size, condition and configuration which will as far as possible enable plant and animal communities to survive in the long-term.

Requirements

- 1. The following is prescribed for the purposes of clause 5.9(2) of Part 2 of the Vegetation SEPP: All native vegetation identified on:
- a) DCP Map Threatened and <u>High Conservation Habitat</u>
- b) DCP Map Wildlife Corridors
- c) DCP Map Native Vegetation

- d) known or potential habitat for threatened species, populations or ecological communities as listed under the NSW <u>Threatened Species Conservation Act 1995</u> and/or the Commonwealth <u>Environment</u> Protection and Biodiversity Conservation Act 1999.
- 2. Development is to be situated and designed to minimise the impact on prescribed vegetation, including remnant canopy trees, understorey vegetation, and ground cover species.

Not applicable – the site is not located on the DCP maps indicated above.

E3 Threatened species, populations, ecological communities listed under State or Commonwealth legislation, or High Conservation Habitat

Objectives

- To protect and promote the recovery of threatened species, populations and endangered ecological communities.
- To protect and enhance the habitat of plants, animals and vegetation communities with high conservation significance.
- To preserve and enhance the area's amenity, whilst protecting human life and property.
- To improve air quality, prevent soil erosion, assist in improving water quality, carbon sequestration, storm water retention, energy conservation and noise reduction.
- To provide natural habitat for local wildlife, maintain natural shade profiles and provide psychological & social benefits.

Comments:

Not applicable.

E4 Wildlife Corridors

Objectives

- To preserve and enhance the area's amenity, whilst protecting human life and property.
- To improve air quality, prevent soil erosion, assist in improving water quality, carbon sequestration, storm water retention, energy conservation and noise reduction.
- To provide natural habitat for local wildlife, maintain natural shade profiles and provide psychological & social benefits.
- To retain and enhance native vegetation and the ecological functions of wildlife corridors.
- To reconstruct habitat in non vegetated areas of wildlife corridors that will sustain the ecological function of a <u>wildlife corridor</u> and that, as far as possible, represents the combination of plant species and vegetation structure of the original 1750 community. <u>See Warringah Natural Area Survey</u>, August 2005.

Requirements

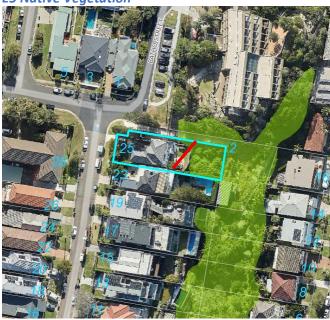

- 1. For modification of native vegetation where the area of land supporting the vegetation to be modified is greater than 50m2 or the land supporting the vegetation to be modified forms part of an allotment where vegetation has been modified in the last five years:
- i. The applicant must demonstrate that the objectives have been achieved through a <u>Flora and Fauna Assessment</u> prepared in accordance with Council guidelines; and
- ii. The applicant must demonstrate that the objectives have been achieved through a <u>Biodiversity</u> <u>Management Plan</u> prepared in accordance with Council guidelines that will protect, manage and enhance wildlife corridors, and where appropriate reconstruct <u>wildlife corridor</u> areas on the subject property.

2. For modification of native vegetation in all other cases, the applicant must demonstrate that the objectives have been achieved.

Comments:

Not applicable – the site is not located within a wildlife corridor.

E5 Native Vegetation

Warringah DCP 2011 Native Vegetation

Objectives

- To preserve and enhance the area's amenity, whilst protecting human life and property.
- To improve air quality, prevent soil erosion, assist in improving water quality, carbon sequestration, storm water retention, energy conservation and noise reduction.
- To provide natural habitat for local wildlife, maintain natural shade profiles and provide psychological & social benefits.
- Promote the retention of native vegetation in parcels of a size, condition and configuration which will as far as possible enable local plant and animal communities to survive in the long term.
- To maintain the amount, local occurrence and diversity of native vegetation in the area

Comments

A portion of the existing allotment is identified within the WDCP native vegetation map. It is submitted that only a minor portion of the area identified may fall within the proposed Lot 101 as approved under DA2021/1469. Nonetheless, the proposal does not remove any significant or native vegetation within these areas identified, and Council can be satisfied that the proposal will maintain the amount, local occurrence and diversity of native vegetation in the area.

E6 Retaining unique environmental features

Objectives

• To conserve those parts of land which distinguish it from its surroundings.

Requirements

- 1. Development is to be designed to address any distinctive environmental features of the site and on adjoining nearby land.
- 2. Development should respond to these features through location of structures, outlook, design and materials.

Comments:

Complies – the site has no known environmental features such as rock outcrops or escarpments that will be adversely impacted through the proposed application.

E7 Development on land adjoining public open space

Objectives

- To protect and preserve <u>bushland</u> adjoining parks, <u>bushland</u> reserves and other public open spaces.
- To ensure that development responds to its adjacent surroundings to preserve and enhance the natural qualities of the environment.
- Development on land adjoining open space is to complement the landscape character and public use and enjoyment of the adjoining parks, <u>bushland</u> reserves and other public open spaces.

Comments:

Not applicable.

E8 Waterways and Riparian Lands

Objectives

- Protect, maintain and enhance the ecology and biodiversity of waterways and riparian land.
- Encourage development to be located outside waterways and <u>riparian land</u>.
- Avoid impacts that will result in an adverse change in watercourse or <u>riparian land</u> condition.
- <u>Minimise risk</u> to life and property from stream bank erosion and flooding by incorporating appropriate controls and mitigation measures.
- Maintain and improve access, amenity and scenic quality of waterways and <u>riparian</u> lands.
- Development on waterways and <u>riparian</u> lands shall aim to return Group B and Group C creeks to a Group A standard (as described in Warringah <u>Creek</u> Management Study, 2004) through appropriate siting and development of development.

Comments:

Not applicable.

E9 Coastline Hazard

Objectives

- To minimise the <u>risk</u> of damage from coastal processes and coastline hazards for proposed buildings and works along Collaroy Beach, Narrabeen Beach and Fisherman's Beach.
- To ensure that development does not have an adverse impact on the scenic quality of Collaroy, Narrabeen and Fisherman's Beaches.
- To ensure that development does not adversely impact on the coastal processes affecting adjacent land.

Comments:

Not applicable.

E10 Landslip Risk

Objectives

- To ensure development is geotechnically stable.
- To ensure good engineering practice.
- To ensure there is no adverse impact on existing subsurface flow conditions.
- To ensure there is no adverse impact resulting from stormwater discharge.

Requirements

- 1. The applicant must demonstrate that:
 - The proposed development is justified in terms of geotechnical stability; and
 - The proposed development will be carried out in accordance with good engineering practice.
- 2. Development must not cause detrimental impacts because of stormwater discharge from the land.
- 3. Development must not cause detrimental impact on the existing subsurface flow conditions including those of other properties.
- 4. To address Requirements 1 to 3:
- i) For land identified as being in Area A:

Council may decide that a preliminary assessment of site conditions is required. If Council so decides, a preliminary assessment of site conditions must be prepared, in accordance with the Checklist for Council's assessment of site conditions (see Notes) by a suitably qualified geotechnical engineer/engineering geologist. The preliminary assessment must be submitted to Council before the granting of any development consent.

If the preliminary assessment determines that a geotechnical report is required, the same provisions apply in Area A as those that apply in Area B and Area D.

Comments:

Complies – the proposal is located within Area B of the Landslip Risk Area map. A geotechnical assessment has been prepared by Australian GeoEnviro Pty Ltd and concludes that the proposed excavation is acceptable for the site and the proposed development will not have an adverse landslip risk.

E11 Flood Prone Land

Objectives

- Protection of people.
- Protection of the natural environment.
- Protection of private and public infrastructure and assets.

Comments:

Not applicable.

Part G - Special Area Controls

G10 Low and Mid-Rise Housing Areas
G10.1 Dual Occupancies and Semi-Detached Dwellings

Objectives

O1. To control the bulk and scale of new development consistent with the desired future character of the locality through building articulation, modulation, stepping of the built form and limitations on the number of storeys.

- O2. To ensure sufficient tree planting and deep soil areas are provided to maintain and improve landscape setting, biodiversity, and canopy cover, and reduce the visual impact of buildings.
- O3. To ensure development provides a clear sense of address to the street and is compatible with the existing streetscape.
- O4. To minimise the amenity impacts of development on adjoining and neighbouring properties.
- *O5.* To ensure that car parking is not visually dominant on the site or in the streetscape.

Requirements

Site Layout

- R1. The siting of dual occupancies and semi-detached dwellings should be as follows:
 - a. Semi-detached dwellings and Dual occupancy (attached) Both dwellings are to be oriented towards the street frontage. This layout reinforces the prevailing residential pattern of single street frontage properties, allowing for landscaped front gardens and larger rear yards.
 - b. Dual occupancy (detached) Detached configurations are generally not supported due to potential impacts on tree retention, landscaped areas, privacy, and solar access.

However, a detached arrangement may be considered where:

- i. the site has a street frontage greater than 18 metres, or
- ii. the site has multiple street frontages, or
- iii. it can be demonstrated that the configuration will result in reduced impacts when compared to an attached form, including the retention of significant trees, environmental features or heritage items.
- R2. Dwellings with a street frontage to have a front door directly visible from the street.
- R3. Where the side of a dwelling is facing a secondary street, this façade should be articulated with windows and/or doors to address the street.

Comments:

Complies – the proposed development is for a dual-occupancy (attached) on a single street frontage property. Both dwellings have been orientated towards the street frontage to reinforce the prevailing residential pattern on the eastern side of Loch Street allowing for landscaped front gardens and larger rear yards. The dwellings have been designed to ensure the front doors are directly visible from the street.

Setbacks and Height

- R4. The minimum setback for all buildings and structures to side boundaries is 1m on one side and 2.5m on the other. This may be averaged across each boundary, provided the minimum setback width is 1m and the total combined width of both setbacks is at least 3.5m.
- R5. Despite R4, a nil setback to the side boundary is permitted to the extent that it adjoins the common wall of a dual occupancy (attached) or semi-detached dwellings.

Comments:

Complies – control R4 requires a side setback of control of 1m on one side and 2.5m on the other, or otherwise averaged across each boundary, provided the minimum setback width is 1m and the total combined width of both setbacks is at least 3.5m.

The site has been strategically designed to achieve compliance with the requirements of control R4, providing adequate northern and southern side boundary setbacks to substantially comply with the requirements for a total combined width of least 3.5m averaged across both setbacks, with minimum setback widths in excess of 1m.

R6. Where a dual occupancy or a semi-detached dwelling is proposed, the maximum number of storeys is 2.

Comment:

Complies on merit – the proposed dual-occupancy (attached) has been designed as a part two (2) / part three (3) storey development. When view from the street, the dwellings present as a two storey building with the proposal stepped at the rear to present as two storey's and the upper floor setback further. On this basis, the dwellings present as two storeys to the front and rear with the additional storey not readily visible from the publics perspective. The proposal is consistent with the two storey bulk and scale to Loch Street with many other dwellings on the eastern side of Loch Street stepping down the site and three storeys in bulk and scale.

Building and Landscape Design

- R7. In addition to D6 Access to Sunlight of this DCP, windows to the principal living area of the proposal and windows to the principal living area of adjoining dwellings, are to receive a minimum of 3 hours of sunlight between 9am and 3pm on June 21 (that is, to at least 50% of the glazed area of those windows).
- R8. Each dwelling is to have a storage area of at least 8 cubic metres.
- R9. Minimum tree planting rates are to be in accordance with Table 1 below, and is to include the following:
 - a. At least one tree is to be provided within the front yard of each dwelling;
 - b. At least one tree is to be provided within the rear yard of each dwelling;
 - c. Each tree shall be a locally native species; and
 - d. Existing prescribed trees may be counted towards the total number of required trees.

Table 1: Minimum tree planting rate (applies to the whole development)

Site area	Minimum tree planting rate
Less than 300 m ²	Plant at least 1 small or medium tree in a deep soil area per dwelling.
300-600 m ²	For every 200 m ² of site area or part thereof, plant at least 1 medium tree in the deep soil area
Greater than 600 m ²	For every 225 m² of site area or part thereof, plant at least 1 medium or large tree in the deep soil area.

R10. In addition to the D1 Landscape Open Space and <u>Bushland</u> Setting requirement of this DCP, the deep soil percentage as identified in Table 2 are to be demonstrated. This requirement is to support healthy <u>tree</u> root development and to enable canopy trees to reach maturity.

Table 2: Minimum Deep Soil (applies to the whole development)

Site area	Minimum Deep soil (min % of site area with a min. dimension of 3m)
Less than 300 m ²	15%
300-600 m ²	20%
Greater than 600 m ²	25%

Complies – the proposal is supported by a landscape plan prepared by ATC Landscape Architects that reinvigorates the site with new plantings to ensure the dwellings are characterized by a high quality landscaped setting. The proposal complies with the 20% minimum deep soil requirement and satisfies the minimum requirements for tree plantings as identified in table 1.

- R11. The development is to respond to the natural landform of the site to minimise visual impact, avoid excessive excavation, and ensure accessibility. To achieve this:
 - a. Dwellings are to be designed to step with the topography.
 - b. The ground floor should not be more than 1.3 metres above ground level (existing) and no more than 1 metre below ground level (existing), except where a higher finished floor level is required to meet the applicable Flood Planning Level.
 - c. Basements, including for car parking, should be avoided unless no other practical alternative exists, and are not to be provided within required building setbacks.

Comments:

Complies on merit – the proposal includes provisions for a habitable lower ground floor which is a partial basement to the rear of the property as the topography slopes to the east. The proposal has been sensitively designed to appropriately step with the topography of the site and does not involve an excessive or unreasonable amount of excavation. The proposal is consistent with recent approvals granted in the area and is compatible with the nature of nearby development on the eastern side of Loch Street with excavated lower ground floors/partial storeys accommodated into the Freshwater hillside. It is submitted that the proposal is acceptable on merit and can be supported by Council as submitted.

Parking Design and Vehicle Access

- R12. The following specific design requirements apply to a dual occupancy and semi-detached dwelling:
 - a. The total width of all garages, carports or hardstand areas, for both dwellings combined, facing a street frontage is not to exceed 50% of the lot frontage or 7 metres, whichever is the lesser.
 - b. Unless an alternative layout or design clearly satisfies the objectives and/or principles of Council's current policies and guidelines relating to driveways and vehicle crossovers, driveway crossovers should be shared by each dwelling to minimise hard surfaces in the front setback, maximise on-street parking, minimise impacts on street trees, and reduce interactions between pedestrians and road users, by:
 - i. limiting the shared driveway to a maximum width of 6 metres;
 - ii. ensuring the layback (vehicle crossing) is no wider than 3 metres at the kerb; and
 - iii. positioning the proposed driveway to maximise the retention of on-street car parking spaces.
 - c. One uncovered parking space (not within a garage, carport or other structure) in a tandem arrangement, between the primary street frontage and the front building line, may be supported, provided:
 - i. Tree planting, landscaped area and deep soil requirements are met;
 - ii. There are clear sight lines between the parking space and the road kerb for pedestrian safety.

Comments:

Complies – the proposed dual occupancy (attached) provides a garage for the two dwellings. Both garages have been designed to accommodate on-site parking facilities for one (1) parked vehicle.

The proposal has been designed in accordance with the provisions of control R12(C) to accommodate an additional uncovered parking space per dwelling forward of the proposed garages in a tandem arrangement between the primary street frontage and the front building line to satisfy the prescribed car parking rates under Appendix 1 of the WDCP for 2 spaces per dwelling (4 total). The proposed garage will be compliant with all relevant Australian Standards and clear sight lines have been provided between the parking spaces and the road kerb for pedestrian safety. The proposed relocation of the new driveway and crossover will have a negligible impact and will not contribute to any increase in the demand for on-street parking.

The garage design has been integrated into the front façade of the building to not visually dominate the proposed dwelling. It is our professional opinion that the proposed garages will not adversely impact the streetscape or neighbouring properties and will maintain the desired character of the locality. The garages have been designed and sited in a manner that fits in with the streetscape. The proposed works are compatible with the streetscape noting that prominent carparking structures address the street frontage throughout Loch Street. The proposed on-site parking facilities are acceptable and can be supported by Council as submitted.

Part H - Appendices

Appendix 1 Car Parking Requirements

Comments:

Complies – the proposal provides parking for 2 spaces per dwelling (4 total) as required for the use as a dual occupancy.

5. Matters for Consideration Pursuant to Section 4.15 of the Environmental Planning & Assessment Act 1979

The following matters are to be taken into consideration when assessing an application pursuant to Section 4.15 of the *Environmental Planning and Assessment Act 1979* (as amended). Guidelines (in *italic*) to help identify the issues to be considered have been prepared by the Department of Planning and Environment. The relevant issues are:

(a) The provisions of:

(i) The provision of any Environmental Planning Instrument

Comment: The proposal for demolition works and erection of a dual occupancy (attached), swimming pool, associated works and strata subdivision is permissible with consent and is consistent with the intent of Warringah Local Environmental Plan 2011 and Warringah Development Control Plan 2011 as they are reasonably applied to the proposed works.

(ii) Any proposed instrument that is or has been the subject of public consultation under this Act and that has been notified to the consent authority (unless the Secretary has notified the consent authority that the making of the proposed instrument has been deferred indefinitely or has not been approved), and

Comment: Not applicable.

(iii) Any development control plan

Comment: The proposal has been reviewed and assessed under Warringah Development Control Plan 2011.

- (iiia) Any Planning Agreement that has been entered into under section 7.4 or any draft planning agreement that a developer has offered to enter into under Section 7.4, and **Comment:** Not applicable.
- (iv) The Regulations (to the extent that they prescribe matters for the purposes of this

Comment: Not applicable.

paragraph), and

(v) (repealed)

(b) The likely impacts of that development, including environmental impacts on both the natural and built environments and social and economic impacts in the locality,

Context and Setting:

i. What is the relationship to the region and local context in terms of:

- The scenic qualities and features of the landscape
- The character and amenity of the locality and streetscape
- The scale, bulk, height, mass, form, character, density and design of development in the locality
- The previous and existing land uses and activities in the locality

Comment: The proposal for demolition works and erection of a dual occupancy (attached), swimming pool, associated works and strata subdivision is compatible with adjoining residential

development and will not result in any unreasonable amenity impacts in terms of views, privacy or overshadowing.

ii. What are the potential impacts on adjacent properties in terms of:

- Relationship and compatibility of adjacent land uses?
- sunlight access (overshadowing)
- visual and acoustic privacy
- views and vistas
- edge conditions such as boundary treatments and fencing

Comment: These matters have been discussed in detail earlier in this report. The works have been designed such that potential impacts are minimal and within the scope of the built form controls.

Access, transport and traffic:

Would the development provide accessibility and transport management measures for vehicles, pedestrians, bicycles and the disabled within the development and locality, and what impacts would occur on:

- Travel Demand
- dependency on motor vehicles
- traffic generation and the capacity of the local and arterial road network
- public transport availability and use (including freight rail where relevant)
- conflicts within and between transport modes
- Traffic management schemes
- Vehicular parking spaces

Comment: The development proposes a new shared driveway and crossover servicing two proposed garages which have been integrated into the design of the building and will not dominate the front façade of the premises.

Public Domain

Comment: The proposed development will have no adverse impact on the public domain.

Utilities

Comment: Existing utility services will connect to service the dwelling.

Flora and Fauna

Comment: The proposal does not have an adverse impact to flora or fauna.

Waste Collection

Comment: Normal domestic waste collection applies to the existing dwelling house.

Natural hazards

Comment: The site is located within Landslip Risk Area B. There are no visible natural hazards to the site. The site is not identified on the flooding or bushfire maps.

Economic Impact in the locality

Comment: The proposed development will not have any significant impact on economic factors within the area notwithstanding that it will generate additional employment opportunities through the construction period with respect to the proposed works.

Site Design and Internal Design

i) Is the development design sensitive to environmental considerations and site attributes including:

- size, shape and design of allotments
- The proportion of site covered by buildings
- the position of buildings
- the size (bulk, height, mass), form, appearance and design of buildings
- the amount, location, design, use and management of private and communal open space
- Landscaping

Comment: These matters were discussed in detail earlier in this report. The potential impacts are considered to be minimal and within the scope of the general principles, desired future character and built form controls.

ii) How would the development affect the health and safety of the occupants in terms of:

- lighting, ventilation and insulation
- building fire risk prevention and suppression
- building materials and finishes
- a common wall structure and design
- access and facilities for the disabled
- likely compliance with the Building Code of Australia

Comment: The proposed development can comply with the provisions of the Building Code of Australia. The proposal complies with the relevant standards pertaining to health and safety and will not have any detrimental effect on the occupants.

Construction

i) What would be the impacts of construction activities in terms of:

- The environmental planning issues listed above
- Site safety

Comment: The proposal will employ normal site safety measures and procedures will ensure that no safety or environmental impacts will arise during construction.

(c) The suitability of the site for the development

- Does the proposal fit in the locality
- Are the constraints posed by adjacent development prohibitive
- Would development lead to unmanageable transport demands and are there adequate transport facilities in the area
- Are utilities and services available to the site adequate for the development
- Are the site attributes conducive to development

Comment: The site is located in an established residential area. The adjacent development does not impose any unusual or impossible development constraints. The proposed development will not cause unmanageable levels of transport demand with the existing use as residential accommodation to remain.

(d) Any submissions received in accordance with this act or regulations

Comment: No submissions are available at this time.

(e) The public interest

Comment: The proposed works are permissible and consistent with the intent of WLEP2011 and WDCP controls as they are reasonably applied to the proposed demolition works and erection of a dual occupancy (attached), swimming pool, associated works and strata subdivision. The development would not be contrary to the public interest.

In our opinion, the development satisfies the planning regime applicable to development on this particular site having regards to the considerations arising from its context.

The proposal is also in the publics interest as it achieves the State Governments policy for metro councils achieving their housing targets:

The first stage of the reforms permits dual occupancies and semi-detached homes in the R2 low-density zone across all of NSW. These changes will support metro councils to achieve their housing targets and regional councils to reach their overarching regional NSW housing target.

The proposal is acceptable when assessed against the heads of consideration pursuant to Section 4.15 of the *Environmental Planning and Assessment Act, 1979* (as amended), and is appropriate for the granting of consent and accordingly, is in the public's interest.

6. Summary and Conclusion

The proposal for demolition works and erection of a dual occupancy (attached), swimming pool associated works and strata subdivision is permissible with consent and consistent with the intent of the built form controls as they are reasonably applied to the proposed works. It is considered that the proposal is appropriate on merit and is worthy of the granting of development consent for the following reasons:

- The merits of the application have been assessed in accordance with the provisions of the relevant requirements of WLEP 2011 and the provisions of Section 4.15 of the Environmental Planning and Assessment Act 1979 (as amended). There is no evidence that the impacts of the development would warrant amendment to the subject proposal or justify refusal. Where a variation is proposed, adequate documentation has been provided to support the application.
- The nature of the development is appropriate having regard to the area of the site, its geographical location, topography, constraints and adjoining land uses.

Accordingly, the proposal for demolition works and erection of a dual occupancy (attached), swimming pool, associated works and strata subdivision (proposed Lot 101 as approved under DA2021/1469), being 25 Loch Street, Freshwater, currently identified as Lot 10 within Deposited Plan 1257419 (proposed Lot 101 as approved under DA2021/1469 yet to be registered), is acceptable from environmental, social, and planning perspectives and approval should therefore be granted by Council.
