

DEVELOPMENT APPLICATION ASSESSMENT REPORT

Application Number:	DA2025/0401
Responsible Officer:	Simon Ferguson Tuor
Land to be developed (Address):	Lot 11 DP 227863, 25 Aranda Drive DAVIDSON NSW 2085
Proposed Development:	Alterations and additions to a dwelling house including a swimming pool
Zoning:	Warringah LEP2011 - Land zoned R2 Low Density Residential
Development Permissible:	Yes
Existing Use Rights:	No
Consent Authority:	Northern Beaches Council
Land and Environment Court Action:	Yes
Applicant:	Gemma Leigh Williams
Application Lodged:	17/04/2025
Integrated Development:	No
Designated Development:	No
State Reporting Category:	Residential - Alterations and additions
Notified:	28/04/2025 to 12/05/2025
Advertised:	Not Advertised
Submissions Received:	2
Clause 4.6 Variation:	Nil
Recommendation:	Approval
Estimated Cost of Works:	\$ 995,500.00

PROPOSED DEVELOPMENT IN DETAIL

The proposal seeks consent for alterations and additions to the existing dwelling as follows:

Ground floor

- Redesign and extensions
- Internal modifications

First Floor

- First-floor extension that will add four bedrooms, one with an ensuite, a walk-in robe, and a balcony, as well as an additional rumpus room

External

- New swimming pool and spa
- Extension of existing deck
- front garden upgrades including levelling of lawn and driveway widening.

Amended Plans

Following the preliminary assessment of the application, Council requested additional information in relation to landscaping/tree removal, privacy, stormwater runoff and solar access. Amended plans were subsequently submitted which:

- Retained a tree in the front yard and deleted the lawn levelling works from the proposal
- Retained a 500mm landscape strip between the northwest side boundary and the driveway upgrades
- Reduced areas of proposed decking on both north west and south east side elevations at ground level
- Increased the proposed first floor balcony side setback

- Incorporated privacy attenuation measures
- Redesigned the first floor roof design at the rear

The amended plans constitute a reduced environmental impact and therefore, the application was not required to be re-notified, in accordance with the Northern Beaches Community Participation Plan (CPP).

ASSESSMENT INTRODUCTION

The application has been assessed in accordance with the requirements of the Environmental Planning and Assessment Act 1979 and the associated Regulations. In this regard:

- An assessment report and recommendation has been prepared (the subject of this report) taking into account all relevant provisions of the Environmental Planning and Assessment Act 1979, and the associated regulations;
- A site inspection was conducted and consideration has been given to the impacts of the development upon the subject site and adjoining, surrounding and nearby properties;
- Notification to adjoining and surrounding properties, advertisement (where required) and referral to relevant internal and external bodies in accordance with the Act, Regulations and relevant Development Control Plan;
- A review and consideration of all submissions made by the public and community interest groups in relation to the application;
- A review and consideration of all documentation provided with the application (up to the time of determination);
- A review and consideration of all referral comments provided by the relevant Council Officers, State Government Authorities/Agencies and Federal Government Authorities/Agencies on the proposal.

SUMMARY OF ASSESSMENT ISSUES

Warringah Development Control Plan - D6 Access to Sunlight
Warringah Development Control Plan - D8 Privacy

SITE DESCRIPTION

Property Description:	Lot 11 DP 227863 , 25 Aranda Drive DAVIDSON NSW 2085
Detailed Site Description:	<p>The subject site consists of one allotment located on the south-western side of Aranda Drive.</p> <p>The site is irregular in shape with an arced frontage of 16.5m along Aranda Drive. The south-eastern side boundary measures 51.885m, while the north-western side is 52.675m long. The rear boundary, facing south-west, is 33.53m. The site has a surveyed area of 1248m².</p> <p>The site is located within the R2 Low Density Residential zone and accommodates a single storey dwelling house.</p> <p>The land gently slopes from the north-eastern front boundary down to the rear southwestern boundary, with an approximate height difference of 5.5 meters.</p> <p>The site contains grassed areas, shrubs, hedges and some trees. There are some large trees towards the front of the site within Council's road reserve.</p> <p>Detailed Description of Adjoining/Surrounding Development</p> <p>Adjoining and surrounding development is characterised by one and two storey dwellings of varying architectural styles.</p>

Map:

SITE HISTORY

A search of Council's records has revealed that there are no recent or relevant applications for this site.

The land has been used for residential purposes for an extended period of time.

ENVIRONMENTAL PLANNING AND ASSESSMENT ACT, 1979 (EPAA)

The relevant matters for consideration under the Environmental Planning and Assessment Act, 1979, are:

Section 4.15 Matters for Consideration	Comments
Section 4.15 (1) (a)(i) – Provisions of any environmental planning instrument	See discussion on “Environmental Planning Instruments” in this report.
Section 4.15 (1) (a)(ii) – Provisions of any draft environmental planning instrument	There are no current draft environmental planning instruments.
Section 4.15 (1) (a)(iii) – Provisions of any development control plan	Warringah Development Control Plan applies to this proposal.
Section 4.15 (1) (a)(iiia) – Provisions of any planning agreement	None applicable.
Section 4.15 (1) (a)(iv) – Provisions of the Environmental Planning and Assessment Regulation 2021 (EP&A Regulation 2021)	<p><u>Part 4, Division 2</u> of the EP&A Regulation 2021 requires the consent authority to consider “Prescribed conditions” of development consent. These matters have been addressed via a condition of consent.</p> <p><u>Clauses 36 and 94</u> of the EP&A Regulation 2021 allow Council to request additional information. No additional information was requested in this case.</p> <p><u>Clause 61</u> of the EP&A Regulation 2021 requires the consent authority to consider AS 2601 - 1991: The Demolition of Structures. This matter has been addressed via a condition of consent.</p> <p><u>Clauses 62 and/or 64</u> of the EP&A Regulation 2021 requires the consent authority to consider the upgrading of a building (including fire safety upgrade of development). This clause is not relevant to this application.</p> <p><u>Clause 69</u> of the EP&A Regulation 2021 requires the consent authority to consider insurance requirements under the Home Building Act 1989. This matter has been addressed via a condition of consent.</p>

Section 4.15 Matters for Consideration	Comments
	Clause 69 of the EP&A Regulation 2021 requires the consent authority to consider the provisions of the Building Code of Australia (BCA). This matter has been addressed via a condition of consent.
Section 4.15 (1) (b) – the likely impacts of the development, including environmental impacts on the natural and built environment and social and economic impacts in the locality	<p>(i) Environmental Impact The environmental impacts of the proposed development on the natural and built environment are addressed under the Warringah Development Control Plan section in this report.</p> <p>(ii) Social Impact The proposed development will not have a detrimental social impact in the locality considering the character of the proposal.</p> <p>(iii) Economic Impact The proposed development will not have a detrimental economic impact on the locality considering the nature of the existing and proposed land use.</p>
Section 4.15 (1) (c) – the suitability of the site for the development	The site is considered suitable for the proposed development.
Section 4.15 (1) (d) – any submissions made in accordance with the EPA Act or EPA Regs	See discussion on “Notification & Submissions Received” in this report.
Section 4.15 (1) (e) – the public interest	No matters have arisen in this assessment that would justify the refusal of the application in the public interest.

EXISTING USE RIGHTS

Existing Use Rights are not applicable to this application.

BUSHFIRE PRONE LAND

The site is not classified as bush fire prone land.

NOTIFICATION & SUBMISSIONS RECEIVED

The subject application has been publicly exhibited from 28/04/2025 to 12/05/2025 in accordance with the Environmental Planning and Assessment Act 1979, Environmental Planning and Assessment Regulation 2021 and the Community Participation Plan.

As a result of the public exhibition process council is in receipt of 2 submission/s from:

Name:	Address:
Mrs Catherine Clare Flynn	27 Aranda Drive DAVIDSON NSW 2085
Boston Blyth Fleming Pty Ltd	16 / 7 Narabang Way BELROSE NSW 2085

The following issues were raised in the submissions:

The above issues are addressed as follows:

- Glare**

The submissions raised concerns that glare from the new roof materials would cause reflection into the adjoining property at No. 27 Aranda Drive

Comment:

The external finish of the roof will be controlled through a condition of consent requiring that it have a Solar Absorptance (SA) greater than 0.43, in accordance with the BASIX Certificate. This is to ensure the finish is non-reflective and will minimise potential glare to neighbouring properties.

- Stormwater runoff**

The submissions raised concerns that stormwater runoff from the widened driveway would enter the adjoining property, particularly along the shared boundary with No. 27.

Comment:

The application was referred to Council's Development Engineer. Amended plans now incorporate a 500mm landscaping strip along the northwest boundary to assist with runoff control. Suitable conditions have been recommended to ensure the proposed stormwater disposal is compliant with Council's Water Management for Development Policy.

- **Damage to tree**

The submissions raised concerns that Tree No. 3, located close to the boundary with No. 27 Aranda, may be damaged due to the driveway extension.

Comment:

The revised plans show the driveway set back 500mm from the side boundary. Council's Landscaping Officer has included a condition that requires a Project Arborist to be in attendance and supervise all works as nominated in the Arboricultural Impact Assessment, and in particular works in the tree protection zone of trees 3.

- **Height and bulk of proposed ground floor deck roof**

The submissions raised concerns about the height and visual bulk of the proposed deck roof located at ground floor facing the north western boundary.

Comment:

The roof form of the proposed ground floor deck is compliant with height of building development standard, building envelope and side setback controls. The proposed deck was reduced in size and an amended landscape plan has been provided showing 13 x Lilly Pilly trees along the north western boundary. These plantings will aid in screening the new deck.

- **Privacy concerns**

The submissions raised concerns that the proposed ground floor deck and first-floor balcony would result in overlooking into private open space and habitable rooms of adjoining properties.

Comment:

Privacy concerns from the ground floor deck and first-floor balcony have been addressed through plan amendments and conditions of consent. The ground floor deck and stairs were shifted an additional 1.5m from the south western boundary. The proposed ground floor deck is now setback 4.5m from the boundary and a tree proposed for removal is now retained. Similarly, the proposed first floor balcony was shifted an additional 1.5m away from the boundary and is setback 4.5m from the south eastern side boundary. The proposed deck includes a privacy screen along the south eastern elevation. A condition has been further imposed requiring a fixed vertical louvered privacy screen, measuring 1.5m in length and 1.8m in height, to be installed from the southern corner of the balcony extending northwest. This will restrict oblique sightlines while maintaining light and outlook from the subject site.

- **Bulk and Scale**

The submissions raised concerns about the bulk and scale of the proposal being excessive in the context of neighbouring dwellings

Comment:

The proposed additions are consistent with the height, bulk, and scale controls in the Warringah LEP and DCP. The overall building height complies with the 8.5m maximum and the design is articulated with a combination of setbacks, roof forms and materials to reduce visual mass. The revised plans also reduce decking areas and increase setbacks to mitigate perceived bulk.

- **Solar Access**

The submissions raised concerns about overshadowing of the adjoining dwelling, particularly to the south-east, due to the new first floor addition.

Comment:

The proposed rear roof design has been amended from a gable to a hipped form, reducing the extent and duration of

overshadowing. Overshadowing to the adjoining property to the south-east has been assessed and is considered acceptable. This issue is discussed in further detail at D6 Access to Sunlight.

REFERRALS

Internal Referral Body	Comments
Landscape Officer	<p>The proposal is supported with regard to landscape issues.</p> <p><u>Additional Information Comment 16/05/25:</u> The amended plans are noted.</p> <p>It is noted the proposed works in the front setback have been removed from the proposal with the exception of widening the existing driveway.</p> <p>No concerns are raised with the removal of exempt trees (trees 4, 6, 8, 12, 13, 14, 15, 16, and 17) and prescribed trees (trees 5 and 7) subject to tree replacement planting. Exempt trees may be managed or removed at the discretion of the applicant without consent. A Project Arborist shall be engaged to supervise the works in the tree protection zone of the neighbouring tree (tree 3) and the driveway shall be designed in a tree sensitive manner under advice from the Arborist following tree root investigations.</p> <p>The landscape proposal is generally supported and all proposed planting shall be installed in accordance with the requirements outlined in the conditions of consent.</p> <p><u>Original Comment:</u> <i>The Arboricultural Impact Assessment identified major tree protection zone encroachment to the street trees (trees 1 and 2), and to the neighbouring tree (tree 3). Trees 1, 2, and 3 are outside the property boundaries and must be retained and protected during works. The site analysis should identify these trees as a constraint and any proposal shall be designed in a way to enable the viable retention of these trees (as a general principle, the site planning layout shall be determined following arboricultural investigations and recommendations). Collaboration is required with the Arborist to allow a design solution which enables the retention of tree 2, and any advice from the Arborist shall be incorporated into an amended design. Furthermore, concern is raised with the proposed tree protection zone encroachment for trees 1 and 3, and should the Arborist accept major encroachments well above the 10% standard, non-destructive tree root investigations will need to be completed to ensure that the viable retention of these trees is possible.</i></p> <p><i>No concerns are raised with the removal of exempt trees (trees 4, 6, 8, 12, 13, 14, 15, 16, and 17) and prescribed trees (trees 5 and 7) subject to tree replacement planting.</i></p>
NECC (Development Engineering)	<p>The proposed development is in Region 2. The site is a Low Level Property, but benefits from a drainage easement. It is proposed to convey concentrated stormwater run-off from the site through this easement, which is supported. Vehicle crossing construction is not proposed. A geotechnical report has been provided. Development engineering raises no objections to the proposed development, subject to conditions.</p>
External Referral Body	Comments
Ausgrid - SEPP (Transport and Infrastructure) 2021, s2.48	<p>The proposal was referred to Ausgrid who provided a response stating that the proposal is acceptable subject to compliance with the relevant Ausgrid Network Standards and SafeWork NSW Codes of Practice.</p>

ENVIRONMENTAL PLANNING INSTRUMENTS (EPIS)*

All, Environmental Planning Instruments (SEPPs and LEPS), Development Controls Plans and Council Policies have been considered in the merit assessment of this application.

In this regard, whilst all provisions of each Environmental Planning Instruments (SEPPs and LEPS), Development Controls Plans and Council Policies have been considered in the assessment, many provisions contained within the document are not relevant or are enacting, definitions and operational provisions which the proposal is considered to be acceptable against.

As such, an assessment is provided against the controls relevant to the merit consideration of the application hereunder.

State Environmental Planning Policies (SEPPs) and State Regional Environmental Plans (SREPs)

SEPP (Sustainable Buildings) 2022

A BASIX certificate has been submitted with the application.

A condition has been included in the recommendation of this report requiring compliance with the commitments indicated in the BASIX Certificate.

SEPP (Transport and Infrastructure) 2021

Ausgrid

Section 2.48 of Chapter 2 requires the Consent Authority to consider any development application (or an application for modification of consent) for any development carried out:

- within or immediately adjacent to an easement for electricity purposes (whether or not the electricity infrastructure exists).
- immediately adjacent to an electricity substation.
- within 5.0m of an overhead power line.
- includes installation of a swimming pool any part of which is: within 30m of a structure supporting an overhead electricity transmission line and/or within 5.0m of an overhead electricity power line.

Comment:

The proposal was referred to Ausgrid who raised no objections.

SEPP (Resilience and Hazards) 2021

Chapter 4 – Remediation of Land

Sub-section 4.6 (1)(a) of Chapter 4 requires the Consent Authority to consider whether land is contaminated. Council records indicate that the subject site has been used for residential purposes for a significant period of time with no prior land uses. In this regard it is considered that the site poses no risk of contamination and therefore, no further consideration is required under sub-section 4.6 (1)(b) and (c) of this Chapter and the land is considered to be suitable for the residential land use.

Warringah Local Environmental Plan 2011

Is the development permissible?	Yes
After consideration of the merits of the proposal, is the development consistent with:	
aims of the LEP?	Yes
zone objectives of the LEP?	Yes

Detailed Assessment

D6 Access to Sunlight

Clause D6 of the WDCP 2011 stipulates that at least 50% of the required area of private open space (POS) for the subject site and adjoining properties are to receive a minimum three (3) hours of sunlight between 9am and 3pm on June 21.

As detailed on the accompanying Shadow Diagrams the proposal will not provide at least 50% of the required area of private open space for the subject site, or adjoining sites to the east and west for a minimum of 3 hours of sunlight between 9am and 3pm on June 21.

Council may consider a variation to this control in the particular circumstances of a proposal, where:

- i) the slope or topography of the site or adjoining property makes compliance impractical; and*
- ii) other design options have been investigated which would comply but would unreasonably constrain the development of an otherwise compliant building.*

In this case, the adjoining site to the south is constrained by the south facing orientation, the existing over-height boundary fence and the location of the principal private open space along the side boundary

These constraints significantly limit the opportunity to maintain full compliance with the solar access controls. Any design that might strictly meet the control would require a substantial reduction in the first floor form, likely resulting in an outcome that is contrary to the zone objectives or unreasonable for a dwelling in a low-density residential setting.

Merit consideration

With regard to the consideration for a variation, the development is considered against the underlying Objectives of the Control as follows:

- *To ensure that reasonable access to sunlight is maintained.*

Comment:

The proposed first-floor addition is set back 3 metres from the side boundary. In addition, the proposed roof form has been changed from a gable to a hipped roof to allow for improved solar access. The level of overshadowing is not considered excessive and reflects a reasonable level of impact for a fully compliant two-storey dwelling on a south-facing lot.

- *To encourage innovative design solutions to improve the urban environment.*

Comment:

The revised design integrates the addition in a way that is sympathetic to neighbouring properties and responds to constraints through design adjustments (e.g. the hipped roof). These changes represent an improvement over the original scheme and demonstrate responsive architectural design within the constraints of the site.

- *To promote passive solar design and the use of solar energy.*

Comment:

The proposed development is considered to adequately promote passive solar design and the use of solar energy, noting existing site constraints.

Having regard to the above assessment, it is concluded that the proposed development is consistent with the relevant objectives of WDCP and the objectives specified in s1.3 of the Environmental Planning and Assessment Act, 1979. Accordingly, this assessment finds that the proposal is supported, in this particular circumstance.

D8 Privacy

Merit consideration

The development is considered against the underlying Objectives of the Control as follows:

- *To ensure the siting and design of buildings provides a high level of visual and acoustic privacy for occupants and neighbours.*

Comment:

The control requires development to optimise privacy through good design. The neighbour to the south east has expressed concern regarding visual privacy impacts resulting from the proposed ground floor deck and first floor balcony. The proposal has undergone several design amendments to address potential privacy impacts. The first-floor balcony has been reduced in size and setback 4.5 metres from the south eastern boundary to limit direct lines of sight. The ground floor deck has also been shifted an additional 1.5m north of what was originally proposed (south eastern elevation). The ground floor deck along the north western elevation was also redesigned to provide more spatial separation and landscaping opportunities between the site and neighbour to the north west. A condition of consent has been included requiring the installation of a fixed vertical louvered privacy screen to the southern corner of the balcony, measuring 1.5m in length and 1.8m in height. This will prevent overlooking into the private open space. The overall building also complies with height, wall height, and side boundary setback controls, ensuring a suitable separation between dwellings. Additionally, the increased setbacks to the ground level deck have meant that a tree originally proposed to be removed is now retained. This will further assist with overlooking and privacy attenuation.

- *To encourage innovative design solutions to improve the urban environment.*

Comment:

As above, the proposal's design as conditioned demonstrates an innovation solution to improve the urban environment.

- *To provide personal and property security for occupants and visitors.*

Comment:

The proposal will not impact upon the site's ability to provide personal and property security for occupants and visitors.

Having regard to the above assessment, it is concluded that the proposed development is consistent with the relevant objectives of WDCP and the objectives specified in s1.3 of the Environmental Planning and Assessment Act, 1979. Accordingly, this assessment finds that the proposal is supported, in this particular circumstance.

THREATENED SPECIES, POPULATIONS OR ECOLOGICAL COMMUNITIES

The proposal will not significantly affect threatened species, populations or ecological communities, or their habitats.

CRIME PREVENTION THROUGH ENVIRONMENTAL DESIGN

The proposal is consistent with the principles of Crime Prevention Through Environmental Design.

POLICY CONTROLS

Northern Beaches Section 7.12 Contributions Plan 2024

The proposal is subject to the application of Northern Beaches Section 7.12 Contributions Plan 2024.

A monetary contribution of \$9,955 is required for the provision of new and augmented public infrastructure. The contribution is calculated as 1% of the total development cost of \$995,500.

CONCLUSION

The site has been inspected and the application assessed having regard to all documentation submitted by the applicant and the provisions of:

- Environmental Planning and Assessment Act 1979;
- Environmental Planning and Assessment Regulation 2021;
- All relevant and draft Environmental Planning Instruments;
- Warringah Local Environment Plan;
- Warringah Development Control Plan; and
- Codes and Policies of Council.

This assessment has taken into consideration the submitted plans, Statement of Environmental Effects, all other documentation supporting the application and public submissions, and does not result in any unreasonable impacts on surrounding, adjoining, adjacent and nearby properties subject to the conditions contained within the recommendation.

In consideration of the proposal and the merit consideration of the development, the proposal is considered to be:

- Consistent with the objectives of the DCP
- Consistent with the zone objectives of the LEP
- Consistent with the aims of the LEP
- Consistent with the objectives of the relevant EPIs
- Consistent with the objects of the Environmental Planning and Assessment Act 1979

It is considered that the proposed development satisfies the appropriate controls and that all processes and assessments have been satisfactorily addressed.

RECOMMENDATION

THAT Council as the consent authority grant Development Consent to DA2025/0401 for Alterations and additions to a dwelling house including a swimming pool on land at Lot 11 DP 227863, 25 Aranda Drive, DAVIDSON, subject to the conditions printed below:

Terms and Reasons for Conditions

Under section 88(1)(c) of the EP&A Regulation, the consent authority must provide the terms of all conditions and reasons for imposing the conditions other than the conditions prescribed under section 4.17(11) of the EP&A Act. The terms of the conditions and reasons are set out below.

GENERAL CONDITIONS

1. Approved Plans and Supporting Documentation

Development must be carried out in accordance with the following approved plans (stamped by Council) and supporting documentation, except where the conditions of this consent expressly require otherwise.

Approved Plans				
Plan Number	Revision Number	Plan Title	Drawn By	Date of Plan
DA01	B	SITE PLAN	JAH DESIGN SERVICES	26/05/2025
DA03	B	PROPOSED GROUND FLOOR PLAN	JAH DESIGN SERVICES	26/05/2025

DA05	B	PROPOSED ROOF PLAN	JAH DESIGN SERVICES	26/05/2025
DA06	B	N.E & S.W ELEVATIONS	JAH DESIGN SERVICES	26/05/2025
DA07	B	N.W & S.E ELEVATIONS	JAH DESIGN SERVICES	26/05/2025
DA08	B	SECTIONS	JAH DESIGN SERVICES	26/05/2025

Approved Reports and Documentation			
Document Title	Version Number	Prepared By	Date of Document
LANDSCAPE PLAN	DA10 REVB	JAH DESIGN SERVICES	26/05/2025
Arboricultural Impact Assessment Report	1	Heartwood Tree Consulting	02/04/2025
Waste Management Plan	-	Applicant	14.04.2025
Basix Certificate	A1790200	JULIE HAERLAND	03/04/2025
Geotechnical Assessment (AG 25056)	1	AscentGeo	19.02.2025

In the event of any inconsistency between the approved plans, reports and documentation, the approved plans prevail.

In the event of any inconsistency between the approved plans and a condition of this consent, the condition prevails.

Reason: To ensure all parties are aware of the approved plans and supporting documentation that applies to the

development.

2. Prescribed Conditions

- (a) All building works must be carried out in accordance with the requirements of the Building Code of Australia (BCA).
- (b) BASIX affected development must comply with the schedule of BASIX commitments specified within the submitted BASIX Certificate (demonstrated compliance upon plans/specifications is required prior to the issue of the Construction Certificate);
- (c) A sign must be erected in a prominent position on any site on which building work, subdivision work or demolition work is being carried out:
 - (i) showing the name, address and telephone number of the Principal Certifier for the work, and
 - (ii) showing the name of the principal contractor (if any) for any building work and a telephone number on which that person may be contacted outside working hours, and
 - (iii) stating that unauthorised entry to the work site is prohibited.

Any such sign is to be maintained while the building work, subdivision work or demolition work is being carried out, but must be removed when the work has been completed.

- (d) Residential building work within the meaning of the Home Building Act 1989 must not be carried out unless the Principal Certifier for the development to which the work relates (not being the Council) has given the Council written notice of the following information:
 - (i) in the case of work for which a principal contractor is required to be appointed:
 - A. the name and licence number of the principal contractor, and
 - B. the name of the insurer by which the work is insured under Part 6 of that Act,
 - (ii) in the case of work to be done by an owner-builder:
 - A. the name of the owner-builder, and
 - B. if the owner-builder is required to hold an owner-builder permit under that Act, the number of the owner-builder permit.

If arrangements for doing the residential building work are changed while the work is in progress so that the information notified under becomes out of date, further work must not be carried out unless the Principal Certifier for the development to which the work relates (not being the Council) has given the Council written notice of the updated information.

- (e) Development that involves an excavation that extends below the level of the base of the footings of a building on adjoining land, the person having the benefit of the development consent must, at the person's own expense:
 - (i) protect and support the adjoining premises from possible damage from the excavation, and
 - (ii) where necessary, underpin the adjoining premises to prevent any such damage.
 - (iii) must, at least 7 days before excavating below the level of the base of the footings of a building on an adjoining allotment of land, give notice of intention to do so to the owner of the adjoining allotment of land and furnish particulars of the excavation to the owner of the building being erected or demolished.
 - (iv) the owner of the adjoining allotment of land is not liable for any part of the cost of work carried out for the purposes of this clause, whether carried out on the allotment of land being excavated or on the adjoining allotment of land.

In this clause, allotment of land includes a public road and any other public place.

Reason: Legislative requirement.

3. General Requirements

- (a) Unless authorised by Council:
 - Building construction and delivery of material hours are restricted to:
 - 7.00 am to 5.00 pm inclusive Monday to Friday,
 - 8.00 am to 1.00 pm inclusive on Saturday,
 - No work on Sundays and Public Holidays.

Demolition and excavation works are restricted to:

- 8.00 am to 5.00 pm Monday to Friday only.

(Excavation work includes the use of any excavation machinery and the use of jackhammers, rock breakers, excavators, loaders and the like, regardless of whether the activities disturb or alter the natural state of the existing ground stratum or are breaking up/removing materials from the site).

- (b) Construction certificate plans are to be in accordance with all finished levels identified on approved plans. Notes attached to plans indicating tolerances to levels are not approved.
- (c) Should any asbestos be uncovered on site, its demolition and removal must be carried out in accordance with WorkCover requirements and the relevant Australian Standards.

- (d) At all times after the submission of the Notice of Commencement to Council, a copy of the Development Consent and Construction Certificate is to remain onsite at all times until the issue of an Occupation Certificate. The consent shall be available for perusal of any Authorised Officer.
- (e) Where demolition works have been completed and new construction works have not commenced within 4 weeks of the completion of the demolition works that area affected by the demolition works shall be fully stabilised and the site must be maintained in a safe and clean state until such time as new construction works commence.
- (f) Onsite toilet facilities (being either connected to the sewer or an accredited sewer management facility) for workers are to be provided for construction sites at a rate of 1 per 20 persons.
- (g) Prior to the release of the Construction Certificate, payment of the following is required:
 - i) Long Service Levy - Payment should be made to Service NSW (online or in person) or alternatively to Northern Beaches Council in person at a Customer Service Centre. Payment is not required where the value of the works is less than \$250,000. The Long Service Levy is calculated on 0.25% of the building and construction work. The levy rate and level in which it applies is subject to legislative change. The applicable fee at the time of payment of the Long Service Levy will apply.
 - ii) Section 7.11 or Section 7.12 Contributions Plan – Payment must be made to Northern Beaches Council. Where the subject land to which the development is proposed is subject to either a Section 7.11 or 7.12 Contributions Plan, any contribution to which the development is liable under the respective plan that applies is to be paid to Council. The outstanding contribution will be indexed at time of payment in accordance with the relevant Contributions Plan.
 - iii) Housing and Productivity Contribution - Payment must be made on the NSW Planning Portal for development to which this contribution applies. The amount payable is subject to indexation at the time of payment.
- (h) The applicant shall bear the cost of all works associated with the development that occurs on Council's property.
- (i) No skip bins, building materials, demolition or excavation waste of any nature, and no hoist, plant or machinery (crane, concrete pump or lift) shall be placed on Council's footpaths, roadways, parks or grass verges without Council Approval.
- (j) Demolition materials and builders' wastes are to be removed to approved waste/recycling centres.
- (k) No trees or native shrubs or understorey vegetation on public property (footpaths, roads, reserves, etc.), on the land to be developed, or within adjoining properties, shall be removed or damaged during excavation or construction unless specifically approved in this consent including for the erection of any fences, hoardings or other temporary works.
- (l) Prior to the commencement of any development onsite for:
 - i) Building/s that are to be erected
 - ii) Building/s that are situated in the immediate vicinity of a public place and is dangerous to persons or property on or in the public place
 - iii) Building/s that are to be demolished
 - iv) For any work/s that is to be carried out
 - v) For any work/s that is to be demolished

The person responsible for the development site is to erect or install on or around the development area such temporary structures or appliances (wholly within the development site) as are necessary to protect persons or property and to prevent unauthorised access to the site in order for the land or premises to be maintained in a safe or healthy condition. Upon completion of the development, such temporary structures or appliances are to be removed within 7 days.
- (m) A "Road Opening Permit" must be obtained from Council, and all appropriate charges paid, prior to commencement of any work on Council property. The owner/applicant shall be responsible for all public utilities and services in the area of the work, shall notify all relevant Authorities, and bear all costs associated with any repairs and/or adjustments as those Authorities may deem necessary.
- (n) The works must comply with the relevant Ausgrid Network Standards and SafeWork NSW Codes of Practice.
- (o) Should any construction cranes be utilised on site, they are to be fitted with bird deterrents along the counterweight to discourage raptor (bird) nesting activity. Deterrents are to remain in place until cranes are dismantled. Selection of deterrent methods is to be undertaken in accordance with the recommendations of a suitably qualified ecologist.
- (p) Requirements for new swimming pools/spas or existing swimming pools/spas affected by building works.
 - (1) Child resistant fencing is to be provided to any swimming pool or lockable cover to any spa containing water and is to be consistent with the following;

Relevant legislative requirements and relevant Australian Standards (including but not limited) to:

- (i) Swimming Pools Act 1992
- (ii) Swimming Pools Amendment Act 2009
- (iii) Swimming Pools Regulation 2018
- (iv) Australian Standard AS1926 Swimming Pool Safety
- (v) Australian Standard AS1926.1 Part 1: Safety barriers for swimming pools

- (vi) Australian Standard AS1926.2 Part 2: Location of safety barriers for swimming pools.
- (2) A 'KEEP WATCH' pool safety and aquatic based emergency sign, issued by Royal Life Saving is to be displayed in a prominent position within the pool/spa area.
- (3) Filter backwash waters shall be conveyed to the Sydney Water sewerage system in sewered areas or managed on-site in unsewered areas in a manner that does not cause pollution, erosion or run off, is separate from the irrigation area for any wastewater system and is separate from any onsite stormwater management system.
- (4) Swimming pools and spas must be registered with the Division of Local Government.

Reason: To ensure that works do not interfere with reasonable amenity expectations of residents and the community.

FEES / CHARGES / CONTRIBUTIONS

4. Policy Controls

Northern Beaches Section 7.12 Contributions Plan 2024

A monetary contribution of \$9,955.00 is payable to Northern Beaches Council for the provision of local infrastructure and services pursuant to section 7.12 of the Environmental Planning & Assessment Act 1979 and the Northern Beaches Section 7.12 Contributions Plan (as amended).

The monetary contribution is based on a development cost of \$995,500.00.

The total amount payable will be adjusted at the time the payment is made, in accordance with the provisions of the Northern Beaches Section 7.12 Contributions Plan (as amended).

Details demonstrating compliance, by way of written receipts issued by Council, are to be submitted to the Certifier prior to issue of any Construction Certificate or, if relevant, the Subdivision Certificate (whichever occurs first).

A copy of the Contributions Plan is available for inspection at 725 Pittwater Road, Dee Why or on Council's website at Northern Beaches Council - Development Contributions.

Reason: To provide for contributions in accordance with the Contribution Plan to fund the provision of new or augmented local infrastructure and services.

5. Security Bond

A bond (determined from cost of works) of \$2,000 and an inspection fee in accordance with Council's Fees and Charges paid as security are required to ensure the rectification of any damage that may occur to the Council infrastructure contained within the road reserve adjoining the site as a result of construction or the transportation of materials and equipment to and from the development site.

An inspection fee in accordance with Council adopted fees and charges (at the time of payment) is payable for each kerb inspection as determined by Council (minimum (1) one inspection).

All bonds and fees shall be deposited with Council prior to Construction Certificate or demolition work commencing, and details demonstrating payment are to be submitted to the Certifier prior to the issue of the Construction Certificate.

To process the inspection fee and bond payment a Bond Lodgement Form must be completed with the payments (a copy of the form is attached to this consent and alternatively a copy is located on Council's website at www.northernbeaches.nsw.gov.au).

Reason: To ensure adequate protection of Council's infrastructure.

BUILDING WORK – BEFORE ISSUE OF A CONSTRUCTION CERTIFICATE

6. Driveway Design Near Trees to be Retained

a) Structural layout plans for the works including the driveway widening shall be developed in co-ordination with an Arborist with AQF minimum Level 5 qualifications in arboriculture, and a qualified Structural Engineer, following a non-destructive tree root investigation (if deemed necessary by the Arborist), complying with clause 3.3.4 of AS 4970-2009 Protection of trees on development sites, near existing tree(s) 2 and 3, to locate critical tree roots and recommend footing design and locations for the construction works.

b) The Arborist shall review, comment, recommend design revision as required and approve the driveway layout, to ensure the location of the driveway will be manageable in terms of tree protection measures.

c) The Arborist shall submit certification to the Certifier that the proposed driveway design is accepted.

d) The agreed driveway structural layout plans shall be submitted to the Certifier for approval prior to the issue of a Construction Certificate.

Reason: Tree protection.

7. **Stormwater Disposal from Low Level Property**

The applicant is to demonstrate how stormwater from the new development within this consent shall be disposed of to an existing approved system or in accordance with Northern Beaches Council's Water Management for Development Policy in particular Section 5.5 Stormwater Drainage from Low Level Properties. Details demonstrating that the existing approved system can accommodate the additional flows or compliance with Northern Beaches Council's policy by an appropriately qualified Civil Engineer are to be submitted to the Certifier for approval prior to the issue of the Construction Certificate.

Reason: To ensure appropriate provision for disposal and stormwater management arising from the development.

8. **Geotechnical Report Recommendations have been Incorporated into Designs and Structural Plans**

The recommendations identified in the Geotechnical Report referenced in Condition 1 of this consent are to be incorporated into the construction plans. Details demonstrating compliance are to be submitted to the Certifier prior to the issue of the construction certificate.

Reason: To ensure geotechnical risk is mitigated appropriately.

9. **Amendments to the approved plans**

The following amendments are to be made to the approved plans:

- A fixed privacy screen is to be installed in the southern corner of the first floor rear terrace. It is to be a minimum 1.8 metres above the finished floor level (FFL) of the terrace; extend a minimum 1.5 metres in length from the southern corner towards the north west and consist of fixed vertical louvres or similar screening elements that restrict overlooking to adjoining properties, while still allowing sunlight and outlook from the subject site.

Details demonstrating compliance are to be submitted to the Certifier prior to the issue of the Construction Certificate.

Reason: To require amendments to the plans endorsed by the consent authority following assessment of the development.

10. **Compliance with Standards**

The development is required to be carried out in accordance with all relevant Australian Standards.

Details demonstrating compliance with the relevant Australian Standard are to be submitted to the Certifier prior to the issue of the Construction Certificate.

Reason: To ensure the development is constructed in accordance with appropriate standards.

11. **External Finishes to Roof**

The external finish to the roof shall have a Solar Absorptance (SA) greater than 0.43 in accordance with the requirements of the BASIX Certificate to minimise solar reflections to neighbouring properties. Any roof with a reflective finish is not permitted.

Green roofs and areas where solar panels (PV) are installed are excluded from conforming to the SA range.

Details demonstrating compliance are to be submitted to the Certifier prior to the issue of the construction certificate.

Reason: To ensure that excessive glare or reflectivity nuisance does not occur as a result of the development.

12. **Sydney Water "Tap In"**

The approved plans must be submitted to the Sydney Water Tap in service, prior to works commencing, to determine whether the development will affect any Sydney Water assets and/or easements. The appropriately stamped plans must then be submitted to the Certifier demonstrating the works are in compliance with Sydney Water requirements.

Please refer to the website www.sydneywater.com.au for:

- "Tap in" details - see <http://www.sydneywater.com.au/tapin>
- Guidelines for Building Over/Adjacent to Sydney Water Assets.

Or telephone 13 000 TAP IN (1300 082 746).

Reason: To ensure compliance with the statutory requirements of Sydney Water.

CONDITIONS THAT MUST BE ADDRESSED PRIOR TO ANY COMMENCEMENT

13. Project Arborist

- a) A Project Arborist with minimum AQF Level 5 in arboriculture shall be engaged prior to any commencement of works on site to provide tree protection measures in accordance with AS 4970-2009 Protection of trees on development sites, and any recommendations of an approved Arboricultural Impact Assessment.
- b) The Project Arborist shall be in attendance and supervise all works as nominated in the Arboricultural Impact Assessment, and in particular:
- works in the tree protection zone of trees 2 and 3.
- c) All tree protection measures specified must:
- be in place before work commences on the site, and
 - be maintained in good condition during the construction period, and
 - remain in place for the duration of the construction works.
- d) The Project Arborist shall provide certification to the Certifier that all tree protection measures under AS 4970-2009 have been satisfied, and the recommendations listed for the protection of the existing tree(s) have been carried out satisfactorily to ensure no impact to the health of the tree(s). Photographic documentation of the condition of all trees to be retained shall be recorded, including at commencement, during the works and at completion.

Note: any potential impact to trees as assessed by the Project Arborist will require redesign of any approved component to ensure existing trees upon the subject site and adjoining properties are preserved and shall be the subject of a modification application where applicable.

Reason: Tree protection.

14. Tree Removal Within the Property

- a) This consent approves the removal of existing prescribed trees on the subject site as listed below:
- tree 5 - *Camellia sasanqua*, and tree 7 - *Ceratopetalum gummiferum*.
- b) A qualified AQF level 5 Arborist shall identify these trees on site and tag or mark prior to removal.

Reason: To enable authorised development works.

15. Sediment and Erosion Controls

For developments that include more than 2500sqm of disturbance:

A Soil and Water Management plan (SWMP), in accordance with section 2.3 of the Blue Book, must be prepared and certified by a suitably qualified professional.

For sites larger than 250sqm and less than 2500sqm of disturbance:

An Erosion and Sediment Control Plan (ESCP) must be prepared by a suitably qualified person in accordance with the following considerations and documents:

- Sites that have slopes exceeding 20% (measured in any direction across the site), and/or where works are within the high-water mark or adjacent to a waterway or watercourses are considered environmentally sensitive areas. These sites require a site-specific ESCP which must be prepared and certified by a suitably qualified professional,
- The guidelines set out in the NSW Department of Housing manual 'Managing Urban Stormwater: Soils and Construction Certificate – Volume 1, 4th Edition (2004)' (the Blue Book), and
- The 'Guidelines for Erosion and Sediment Control on Building Sites' (Department of Planning, Housing and Infrastructure).

The ESCP must include the following as a minimum:

- Site Boundaries and contours,
- Approximate location of trees and other vegetation, showing items for removal or retention (consistent with any other plans attached to the application),
- Location of site access, proposed roads and other impervious areas (e.g. parking area and site facilities),
- Existing and proposed drainage patterns with stormwater discharge points,
- Locations and methods of all erosion and sediment controls that must include sediment fences, stabilised site access, materials and waste stockpiles locations, location of any stormwater pits on the site and how they are going to be protected,
- North point and scale,
- Type of erosion control measures to divert and slow run-off around and within the site.

Environmentally sensitive areas (i.e. Sites that have slopes exceeding 20% and/or where works are within the high-water mark or adjacent to a waterway or watercourses) must also consider:

- Identify and mark any environmentally sensitive areas on and immediately next to the site and how you will protect these, including any appropriate buffer zones (for example, marking them out as 'no-go' areas),
- Details on vegetation you will clear, as well as areas of vegetation you will keep (mark no go areas),
- Detail on soil information and location(s) of problem soil types, especially dispersive soils and potential or actual acid sulfate soils,
- Location of any natural waterways that could receive run-off and how these will be protected these from run-off.

For sites smaller than 250sqm or where the disturbance is less than 50sqm:

Run-off and erosion controls must be implemented to prevent soil erosion, water pollution or the discharge of loose sediment on the surrounding land by:

- Diverting uncontaminated run-off around cleared or disturbed areas, and
- Erecting a silt fence and providing any other necessary sediment control measures that will prevent debris escaping into drainage systems, waterways or adjoining properties, and
- Preventing the tracking of sediment by vehicles onto roads, and
- Stockpiling top soil, excavated materials, construction and landscaping supplies and debris within the lot.
- Identifying any environmentally sensitive areas on and immediately next to the site, and demonstrating how these will be protected (for example, by designation as no-go areas).

Details demonstrating compliance with the relevant requirements above are to be submitted to the Certifier, and the measures implemented, prior to the commencement of works.

Reason: To ensure no substance other than rainwater enters the stormwater system and waterways.

DURING BUILDING WORK

16. **Protection of Existing Street Trees**

a) All existing street trees in the vicinity of the works shall be retained during all construction stages, and the street tree(s) fronting the development site shall be protected by tree protection fencing in accordance with Section 4 of AS 4970-2009 Protection of trees on development sites. As a minimum the tree protection fencing for street tree(s) fronting the development site shall consist of standard 2.4m panel length to four sides and in accordance with Australian Standard 4687-2007 Temporary Fencing and Hoardings, unless otherwise directed by an Arborist with minimum AQF Level 5 in arboriculture. All fencing shall be located to allow for unrestricted and safe pedestrian access upon the road verge.

b) All street trees within the road verge are protected under Northern Beaches Council development control plans, except where Council's written consent for removal has been obtained. The felling, lopping, topping, ringbarking, or removal of any tree(s) is prohibited. No excavated material, building material storage, site facilities, nor landscape materials are to be placed within the canopy dripline of street trees.

Reason: Street tree protection.

17. **Tree and Vegetation Protection**

a) Existing trees and vegetation shall be retained and protected, including:

- i) all trees within the site not approved for removal, including trees and vegetation nominated for retention on the approved Plans,
- ii) all trees and vegetation located on adjoining properties,
- iii) all trees and vegetation within the road reserve.

b) Tree protection shall be undertaken as follows:

- i) tree protection shall be in accordance with AS 4970-2009 Protection of trees on development sites, and any recommendations of an approved Arboricultural Impact Assessment,
- ii) existing ground levels shall be maintained within the tree protection zone of trees to be retained, unless authorised by an Arborist/Project Arborist with minimum AQF Level 5 in arboriculture,
- iii) removal of existing tree roots at or >25mm (Ø) diameter is not permitted without consultation with an Arborist/Project Arborist with minimum AQF Level 5 in arboriculture,
- iv) no excavated material, building material storage, site facilities, nor landscape materials are to be placed within the canopy dripline of trees and other vegetation required to be retained,
- v) structures are to bridge tree roots at or >25mm (Ø) diameter unless directed by an Arborist/Project Arborist with minimum AQF Level 5 in arboriculture on site,
- vi) excavation for stormwater lines and all other utility services is not permitted within the tree protection zone, without consultation with an Arborist/Project Arborist with minimum AQF Level 5 in arboriculture including advice on root protection measures,
- vii) should either or all of v) or vi) occur during site establishment and construction works, an Arborist/Project Arborist with

minimum AQF Level 5 in arboriculture shall provide recommendations for tree protection measures. Details including photographic evidence of works undertaken shall be submitted by the Arborist/Project Arborist to the Principal Certifier, viii) any temporary access to, or location of scaffolding within the tree protection zone of a protected tree or any other tree to be retained during the construction works is to be undertaken using the protection measures specified in sections 4.5.3 and 4.5.6 of AS 4970-2009 Protection of trees on development sites, ix) the activities listed in section 4.2 of AS 4970-2009 Protection of trees on development sites, shall not occur within the tree protection zone of any tree on the lot or any tree on an adjoining site, x) tree pruning from within the site to enable approved works shall not exceed 10% of any tree canopy, and shall be in accordance with AS 4373-2007 Pruning of amenity trees, xi) the tree protection measures specified in this clause must: be in place before work commences on the site, be maintained in good condition during the construction period, and remain in place for the duration of the construction works.

c) The Principal Certifier must ensure that:

i) If activated, the arboricultural works listed in a) and b) are undertaken and certified by an Arborist/Project Arborist as complaint to AS 4970-2009 Protection of trees on development sites, and any recommendations of an approved Arboricultural Impact Assessment.

Reason: Tree and vegetation protection.

18. Road Reserve

The applicant shall ensure the public footways and roadways adjacent to the site are maintained in a safe condition at all times during the course of the work.

Reason: Public safety.

19. Survey Certificate

A survey certificate prepared by a Registered Surveyor is to be provided demonstrating all perimeter walls columns and or other structural elements, floor levels and the finished roof/ridge height are in accordance with the approved plans.

Details demonstrating compliance are to be submitted to the Principal Certifier when the external structure of the building is complete.

Reason: To demonstrate the proposal complies with the approved plans.

20. Property Boundary Levels

The Applicant is to maintain the property boundary levels. No approval is granted for any change to existing property alignment levels to accommodate the development.

Details demonstrating compliance are to be submitted to the Principal Certifier.

Reason: To maintain the existing profile of the nature strip/road reserve.

21. Waste Management During Development

The reuse, recycling or disposal of waste during works must be done generally in accordance with the Waste Management Plan for this development.

Details demonstrating compliance must be submitted to the Principal Certifier.

Reason: To ensure demolition and construction waste is recycled or reused and to limit landfill.

BEFORE ISSUE OF THE OCCUPATION CERTIFICATE

22. Landscape Completion

a) Landscape works are to be implemented in accordance with the approved Landscape Plan(s) (drawing DA10 by JAH dated 14/05/25), and inclusive of the following conditions:

i) landscape works are to be contained within the legal property boundaries,

ii) planting shall be installed as indicated on the approved Landscape Plan(s) unless otherwise imposed by any conditions, iii) one (1) native tree shall be installed within the property boundaries; be a minimum pre-ordered planting size of 75 litres; generally selected from Northern Beaches Council's Native Planting Guide, or Council's Tree Guide; to achieve at least 6 metres height at maturity; meet the requirements of AS2303 – Tree Stock for Landscape Use; planted into a prepared planting hole 1m x 1m x 600mm depth generally, backfilled with a sandy loam mix or approved similar, mulched to 75mm depth minimum and maintained, and watered until established; and shall be located at least 3.0 metres from buildings and other trees or more, at least 1.5 metres from common boundaries; and located either within garden bed or within a prepared bed within lawn,

iv) mass planting shall be installed in a garden bed prepared with a suitable free draining soil mix and minimum 75mm depth of mulch,

v) all proposed tree planting shall be positioned in locations to minimise significant impacts on neighbours in terms of blocking winter sunlight to living rooms, private open space and where the proposed location of trees may otherwise be

positioned to minimise any significant loss of views from neighbouring and nearby dwellings and from public spaces,
vi) where swimming pools are part of the development works, selected planting shall comply with the planting and care requirements of AS1926.1 for a non-climbable zone.

b) Prior to the issue of an Occupation Certificate, details shall be submitted to the Principal Certifier, certifying that the landscape works have been completed in accordance with any conditions of consent.

Reason: Environmental amenity.

23. Condition of Retained Vegetation

a) Prior to the issue of an Occupation Certificate, a report prepared by an Arborist/Project Arborist with minimum AQF Level 5 in arboriculture shall be submitted to the Principal Certifier, assessing the health and impact on all existing trees required to be retained on the approved Plans or as listed in the Arboricultural Impact Assessment, including the following information:

- i) compliance to any Arborist recommendations for tree protection generally and during excavation works,
- ii) extent of damage sustained by vegetation as a result of the construction works,
- iii) any subsequent remedial works required to ensure the long term retention of the vegetation.

Reason: Tree and vegetation protection.

24. Stormwater Disposal

The stormwater drainage works shall be certified as compliant with all relevant Australian Standards and Codes by a suitably qualified person. Details demonstrating compliance are to be submitted to the Principal Certifier prior to the issue of an Occupation Certificate.

Reason: To ensure appropriate provision for the disposal of stormwater arising from the development.

25. Waste Disposal Verification Statement

On completion of demolition work:

- a signed statement must be submitted to the Certifier verifying that demolition work, and any recycling of materials, was undertaken in accordance with the waste management plan approved under this consent, and
- if the demolition work involved the removal of asbestos, an asbestos clearance certificate issued by a suitably qualified person, must be submitted to the Certifier within 14 days of completion of the demolition work.

Reason: To provide for the submission of a statement verifying that demolition waste management and recycling has been undertaken in accordance with the approved waste management plan.

26. Swimming Pool Requirements

The Swimming Pool shall not be filled with water nor be permitted to retain water until:

(a) All required safety fencing has been erected in accordance with and all other requirements have been fulfilled with regard to the relevant legislative requirements and relevant Australian Standards (including but not limited) to:

- (i) Swimming Pools Act 1992;
- (ii) Swimming Pools Amendment Act 2009;
- (iii) Swimming Pools Regulation 2018
- (iv) Australian Standard AS1926 Swimming Pool Safety
- (v) Australian Standard AS1926.1 Part 1: Safety barriers for swimming pools
- (vi) Australian Standard AS1926.2 Part 2: Location of safety barriers for swimming pools

(b) A certificate of compliance prepared by the manufacturer of the pool safety fencing, shall be submitted to the Principal Certifier, certifying compliance with Australian Standard 1926.

(c) Filter backwash waters shall be discharged to the Sydney Water sewer mains in accordance with Sydney Water's requirements. Where Sydney Water mains are not available in rural areas, the backwash waters shall be managed onsite in a manner that does not cause pollution, erosion or run off, is separate from the irrigation area for any wastewater system and is separate from any onsite stormwater management system. Appropriate instructions of artificial resuscitation methods.

(d) A warning sign stating 'YOUNG CHILDREN SHOULD BE ACTIVELY SUPERVISED WHEN USING THIS POOL' has been installed.

(e) Signage showing resuscitation methods and emergency contact

(f) All signage shall be located in a prominent position within the pool area.

(g) Swimming pools and spas must be registered with the *Division of Local Government*.

Details demonstrating compliance are to be submitted to the Principal Certifier prior to the issue of an Occupation Certificate.

Reason: To protect human life.

ON-GOING CONDITIONS THAT MUST BE COMPLIED WITH AT ALL TIMES

27. Landscape Maintenance

a) If any landscape materials/components or planting under this consent fails, they are to be replaced with similar materials/components.

b) Trees, shrubs and groundcovers required to be planted under this consent are to be mulched, watered and fertilised as required at the time of planting.

c) If any tree, shrub or groundcover required to be planted under this consent fails, they are to be replaced with similar species to maintain the landscape theme and be generally in accordance with the approved Landscape Plan(s) and any conditions of consent.

d) The approved landscape planted areas, whether containing lawn, gardens or planters shall in perpetuity remain as planting under the development consent, and shall not be replaced with any hard paved surfaces or structures.

Reason: To maintain local environmental amenity.

28. Swimming Pool/Spa Motor Noise

The swimming pool / spa motor shall not produce noise levels that exceed 5dBA above the background noise when measured from the nearest property boundary.

Reason: To ensure that the development does not impact on the acoustic privacy of surrounding residential properties.

In signing this report, I declare that I do not have a Conflict of Interest.

Signed

Simon Ferguson Tuor, Planner

The application is determined on 06/06/2025, under the delegated authority of:

Steven Findlay, Manager Development Assessments
