RE: DA2019/1340 - 100 / 0 Meatworks Avenue OXFORD FALLS NSW 2100

I strongly object to this application for a number of reasons.

Firstly, the further destruction of of the green environment should not be permitted. We have already lost too many trees and bushland and as a result, homes to much wildlife that has had to find new homes. Taking more away is irresponsible.

Having more secluded structures in bushland would vastly increase the risk and/or danger of bushfires. Have we not learnt anything from our current fire catastrophe ?

The fact that the school is nearby and will increase the amount of construction vehicles past the school is dangerous. Additional traffic, if completed, would also be unfavorable.

The junction onto Iris St and the the junction at Warringah Rd is already at unable to cope with the existing traffic at school zone times and the additional trucks and subsequent traffic would exacerbate the situation. The junction at Warringah Rd is not coping with the current traffic levels and it has increased since the Aquatic Drive/ Wakehurst Pkwy junction has opened. The Government Rd side could become gridlocked even more frequently than it already is.

Finally, please, please, please do not even consider opening the road onto wakehurst pkwy so that traffic can get to the site without going past the school. The turning at Oxford Fall Road is already dangerous enough.
