RE: DA2021/0520 - 16 Robertson Road NORTH CURL CURL NSW 2099

I am the owner on the southern side of the DA. Whilst essentially the DA is of similar bulk to the existing structure I wish the following to be assessed:

Window size and placement in kitchen and media rooms.

This planned size of windows for these two rooms is 5.4 metres. In addition, placement of a media room in this location will by definition locate TVs, stereos, gaming etc. Noise penetration to my residence will be significant in my bedroom spaces and as such, reduce my ability to live in relative harmony. I request that both these windows be reduced in size to reduce light penetration into my home at night, be fixed and double glazed to limit noise.

The inclusion of these design requests will significantly improve livability in my home and reduce neighbour stress into the future as these spaces are used by a growing family.
