RE: DA2019/1340 - 100 / 0 Meatworks Avenue OXFORD FALLS NSW 2100

I am concerned about the increase in traffic this will cause on oxford falls road. Currently it is incredibly difficult to turn right onto oxford falls road after leaving the school with traffic already banked back and queuing across the intersection. Having an increase in heavy vehicle traffic past the school on such a small road would increase the likelihood of accidents. This development application should include improvement in the intersection with oxfordfalls road and widening of the road to more safely accomodate increased light and heavy vehicle usage around the existing school
